LB 345 would establish Small Business Innovation Act. The Department of Economic Development (DED) would be directed to establish a statewide pilot program to support and assist up to 40 Nebraska-based growth businesses. It is stated in legislative intent that \$200,000 General Funds be appropriated in FY11-12 and FY12-13 to carry out the act. LB 345 would also lower the total amount of tax credits granted under the Community Development Assistance Act by \$200,000 in FY11-12 and FY12-13. DED would be required to submit a report to the Legislature regarding program accomplishments on December 1, 2013 and the act would terminate on January 1, 2013.

An additional \$200,000 in General Funds would be appropriated to DED in FY11-12 and FY12-13 and expended as state aid. It is estimated that existing agency staff could carry out necessary administrative functions. Assuming a full allocation of the tax credits under the Community Development Assistance Act, there would be a \$200,000 General Fund revenue savings as a result of a lower amount of tax credits claimed under the program.
