LB 682 requires that any school district in the state with fewer than 650 students in grades kindergarten through twelve for at least two consecutive school years shall form an allied system with at least three other school districts with less than 650 students so the minimum number of students in the system is 1,300. The allied system shall be formed on or before July 1, 2015. If the system is not formed by this date, then the Commissioner of Education is required to form the system. School districts with 650 or more students may join an allied system.

School districts in an allied system are required to participate in an interlocal agreement which shall include having the same yearly calendar and daily schedule beginning in school year 2016. The districts are not required to combine or coordinate revenue, spending, taxation, state aid or any financial elements.

It is assumed the State Department of Education can handle the requirements of the bill with regard to forming and monitoring allied systems using existing staff and resources in FY2014-15 and beyond.

The bill applies to public school districts in the state. Seventy-five percent of the school districts (188 out of 249) in the state will be required to form allied systems. School personnel will experience a workload increase to develop interlocal agreements which must include like school calendars and daily schedules. It is possible that changes to school calendars or schedules may have a fiscal impact for some school districts. It is unknown if the requirement for the allied systems to have interlocal agreements will result in any cooperative arrangements which will impact school expenditures and revenues.

<p>COMMENTS: The requirements placed upon the Commissioner of Education are contingent in nature—only if school districts fail to comply—although if ever needed, such requirements could incur a nominal fiscal impact to the Department. Such contingent actions and associated costs cannot be predicted; therefore, no fiscal impact can be assigned to the Department at this time.</p> <p>There is insufficient information available to measure or predict any fiscal impact to school districts for joining an alliance, although it is likely that there would be costs associated with homogenizing school calendars and class periods. Any such costs would add to a school district's general fund operating expenditures (GFOE)—the primary "needs" component of the TEEOSA State Aid formula—which may result in a small increase to the aggregate computation of State Aid two fiscal years after the alliance-joining costs are incurred.</p>

Explanation of Estimate:

Monitoring and implementation of “allied” systems would involve no new staff with the review responsibility being assimilated into day-to-day operations and delegated to existing staff members. Communication and data processing costs would be incurred, but at low usage rates. The potential of travel to build awareness and support would be an ongoing expense, but would be at a percentage designated as “low” within travel budgets.
