LB 977 would exempt implements of husbandry from statutory weight and load limits when operated on highways other than the Interstate.

The potential increase in the weight of these vehicles could have a negative impact on the condition of the highways and bridges that they will be operated on. Variables such as the additional weight and the frequency of operation on the highways will determine the degree of damage to the highway surface or bridge.

At the time this fiscal note was prepared on 1/29/16 a fiscal note had not yet been received from the Department of Roads as to their estimate of the potential damage in dollar terms. If a fiscal note is received from the department this fiscal note will be revised to include it.
