1ST ANNUAL REPORT

NEB. REV. STAT. §83-104 REVIEW OF NEBRASKA DEPARTMENT OF HEALTH AND HUMAN SERVICES (DHHS) STATE INSTITUTIONS

March 15, 2021

Jerall Moreland, Deputy Public Counsel/Ombudsman for Institutions
Julie L. Rogers, Public Counsel/Ombuds

TABLE OF CONTENTS

Attachments for Lincoln Regional Center

Attachments for Norfolk Regional Center

Attachments for Whitehall

Attachments for Hastings Regional Center

Attachments for YRTC-Lincoln

Attachments for YRTC-Geneva

Attachments for YRTC-Kearney

INTRODUCTION

Passed by the Nebraska Legislature in July 2020, Neb. Rev. Stat. §83-104 requires the Office of Public Counsel (also referred to as the Ombudsman's Office) to conduct an annual physical review of the following state institutions within the Nebraska Department of Health and Human Services (DHHS):

1. The Youth Rehabilitation and Treatment Center-Geneva;
2. The Youth Rehabilitation and Treatment Center-Kearney;
3. Any other facility operated and utilized as a Youth Rehabilitation and Treatment Center under state law;
4. The Hastings Regional Center;
5. The Lincoln Regional Center;
6. The Norfolk Regional Center; and
7. The Beatrice State Development Center.

Further, Neb. Rev. Stat. §83-104 requires the Office of Public Counsel (Ombudsman's Office) to report to the Legislature on or before March 15, 2021, for the 2020 calendar year[1] on the condition of such DHHS state institutions. This report summarizes the efforts of the Ombudsman's Office in its physical reviews of each institution, the collection of inspection reports regarding each facility, staffing information for each institution, and reports received by the Ombudsman's Office.

Background

Before the statutory requirement, facility visits to state institutions by the Ombudsman's office were generally initiated because of individual case complaints and reports made to the office or through identification of specific systems issues. The catalyst to this report requirement is one of the statutory responses to the crisis that unfolded at the YRTC-Geneva in August of 2019. This crisis necessitated the sudden relocation of the female youth being served there to YRTC-Kearney, a facility that served male youth up until that point, due to the seriously poor conditions of YRTC-Geneva. [2] In the year leading up to the crisis, the Ombudsman's Office received a total of three complaints regarding youth residing at YRTC-Geneva: two complaints in October 2018 about the school and one complaint in February 2019 about a youth's desire for a 60-day notice. No complaints were received about the conditions of the institution.

[1] Neb. Rev. Stat. §83-104 sets forth that beginning in 2021 after the initial March report, each annual report will be submitted on or before December 15 of each calendar year for the period of December 1 through November 30.
[2] "The Deterioration and Closure of Geneva Youth Rehabilitation and Treatment Center, Special Report of Investigation" by the Office of the Public Counsel/Ombudsman and Office of Inspector General of Nebraska Child Welfare. https://nebraskalegislature.gov/pdf/reports/public_counsel/Geneva_Special_Report_2021.pdf

In January of 2020, the Nebraska Legislature's Health and Human Services Committee issued a report with several recommendations.[3] Recommendation number nine read, "Require an annual facilities review by the Ombudsman. The Legislature should consider requiring an annual review by the Ombudsman of all 24-hour residential facilities under DHHS's jurisdiction and a subsequent report to the Legislature on those reviews by the Ombudsman." Legislative Bill 1144 was introduced with such requirements in January of 2020, passed by the Nebraska Legislature on July 31, 2020, and approved by Governor Ricketts on August 11, 2020.

For the Nebraska Legislature to continue its role in guiding and facilitating the goal of improving not only the YRTC-system, but all state institutions under DHHS, the legislature has expressed its mandate for the Ombudsman's Office to enhance its jurisdictional authority by increasing its exposure at state institutions. This focused role will assist with changes that strengthen agency effectiveness and highlight the quality of care to those Nebraskans residing in our state institutions.

Annual Physical Review & Report Process

For the reporting period, the Ombudsman's Office conducted site visits, which included physical reviews, at each of the above-listed state institutions. Note, however, that due to the COVID pandemic, multiple visits to the facilities since March of 2020 were limited by the need to follow state guiding principles for the safety of those residing and working at each of the DHHS state institutions. During the majority of 2020, there were periods in which the office suspended all visits to state institutions that reported positive cases of COVID. During this time the office remained operational while adhering to CDC guidelines and limiting personal contact. When it was necessary to visit facilities, Ombudsman personnel wore personal protective masks and observed maximized social distancing. The office continued to receive information and updates from each facility regarding the impact and challenges the pandemic had on their operations, and delved into case complaints by alternative means such as the utilization of virtual tools.

The following is organized by institutions under "behavioral health" that are hospitals or other licensed facilities, and institutions under the Office of Juvenile Services, or Youth Rehabilitation and Treatment Centers (YRTCs). For this report, those listed under "behavioral health" are those that statutorily fall within the Divisions of Developmental Disabilities (Beatrice State Developmental Center) and Behavioral Health (Public Psychiatric Hospitals) which include the Lincoln, Norfolk, and Hastings Regional Centers. Within the Lincoln Regional Center's organization is the adolescent sex offender program at the Whitehall campus. During a majority of this reporting period, the Hastings Regional Center was operated as an adolescent residential substance abuse treatment facility, but in the fall of 2020, the program moved to the Whitehall campus. The Office of Juvenile Services is within the Division of Children and Family Services. Organizationally, this is different than how DHHS currently functions—all institutions serving

[3] "Report to the Nebraska Legislature on the Youth Rehabilitation and Treatment Centers" by the Health and Human Services Committee, January 22, 2020. https://nebraskalegislature.gov/pdf/reports/committee/health/yrtc_2020.pdf

adults are under one umbrella, and all institutions serving youth are under another, with both areas reporting to the DHHS chief operating officer.

This report provides summaries concerning observations and documentation reviews related to the internal and external conditions of each of the DHHS state institutions. The voluminous attachments include all inspection reports, federal compliance documentation, state licensing compliance, and staffing information for each institution and program as outlined in Neb. Rev. Stat. §83-104.

BEHAVIORAL HEALTH OVERVIEW

HOSPITAL OR LICENSED STATE INSTITUTIONS

Beatrice State Development Center (BSDC)

The Beatrice State Development Center (BSDC) is a state institution licensed as intermediate care facilities for individuals with intellectual or developmental disabilities operated under DHHS's Division of Developmental Disabilities. BSDC plays an important role in Nebraska's developmental disabilities system.

BSDC is a 24-hour state and federally funded residential treatment institution. BSDC is located in Beatrice, NE, and is divided into individually licensed Intermediate Care Facilities (ICF) for individuals within the larger campus area.

Several visits were made to this facility in 2020. Generally, the outside grounds of the campus are well kept. The campus is comprised of many buildings. The infrastructure required to provide services and housing for the residents at BSDC is significant. The campus has structures for individual's housing needs, dining, medical services, administrative services, religious functions, and recreation.

While most buildings on the campus are being utilized, a few appear to be no longer in use or limited to storage and sit vacantly. As should be expected, a campus as old as BSDC (over 130 years) has many buildings or structures on it that are dated, and in 2017, the campus went through a conditions analysis to determine the long-term structural needs of the facility. As a result, there are visible signs of several construction projects.

Remodeling projects were completed in living cottages and concrete work around campus was finished as well. Some of these projects are scheduled for completion in 2021. As for the interior design of cottages, depending on the building, the layout is essentially the same. Lake Street, Solar Cottage, and the State buildings each have their unique features. Most units have separate bedrooms, bathrooms, a kitchen, a common area for individuals, and a laundry room. General cleanliness of all the homes was observed and individual rooms were fairly organized and clean.

Based on the documentation provided to the Ombudsman's Office, surveys conducted at BSDC by the DHHS Public Health-Licensure Unit were made known. The reports cover regulatory and compliance issues. The survey findings are based on observations, interviews, and records review. These items and the actions taken by BSDC based on these findings are attached. (See Attachments B1 through B3.)

Generally, the facility's crisis stabilization unit is visited during Ombudsman's Office visits. The crisis stabilization unit provides an important program for individuals and other stakeholders. The purpose of the program is to intake unstable individuals from the community and prepare them for transitioning back to the community stabilized. The unit comprises of four different

wings and generally houses one to three individuals per wing, depending on the individual's needs.

Overall in 2020, a shift change was observed at BSDC during the COVID Pandemic which required staff to take temperature checks before facility entry to job posts. Like many institutions throughout the country, BSDC has staffing challenges and presents its share of staff injuries to this office (See Facility Staff Information Attachment B4), with these issues being compounded due to the number of staff COVID positive cases.

Issues identified for review in 2021:

1. COVID plan, response, and impact to staff and individuals.
2. There is a defined work order system utilized by DAS and DHHS to assure minor construction projects are identified, tracked, and completed. In regards to major construction projects, the projects are tracked on a summarized list. The information that can be obtained from access to this information can provide a comprehensive view of the condition of a facility.
3. Address issues identified in reports received by the Office of Public Counsel (See attachments B5 and B6), including staffing levels, retention rates, and turnover.

In 2020, the Ombudsman's Office received contact from staff and family members of residents. Two major complaints reported about BSDC pertained to how BSDC processed grievances, and the other reported issue concerned staffing levels at BSDC. Staffing is a challenge at BSDC and is an ongoing issue that the Ombudsman's Office is following closely.

Lincoln Regional Center (LRC)

The Lincoln Regional Center (LRC) is a 250 bed, Joint Commission-accredited state psychiatric hospital. DHHS's Division of Public Health licensure unit verifies LRC is licensed and meets statutory requirements as a Mental Health Substance Use Treatment Center and Psychiatric Hospital. (See Licenses, Attachment L1.)

Several visits were made to this facility. Generally, the outside grounds of the campus are well kept. The campus is comprised of several different buildings. The main patient buildings are building 3, 9, 10, and 14. There is also an administrative building and a building used predominantly for storage. The infrastructure required to provide services and housing for the residents of this psychiatric hospital is different than other state institutions in that most services can be provided to a patient without transportation out of their assigned building. The campus has structures for individual's housing needs, dining, medical services, administrative services, religious functions, and recreation.

Most buildings on the campus are being utilized, however, one building is no longer in use and is used for limited storage, but essentially sits vacant. It is my understanding that the building is

waiting to be demolished. As should be expected, a campus as old as LRC, which originally opened in 1870, has many buildings or structures that are dated.

Of note with this campus is the current situation it finds itself in. In September of 2019, the Joint Commission (J-Co), the accreditation body for Center for Medicare and Medicaid Services (CME) surveyed the Lincoln Regional Center (LRC) and found deficiencies in the physical structure of buildings 3, 5, and 10 that may pose as ligature risks. These buildings serve as behavioral health treatment and housing units for a diverse range of patients with mental health conditions. To address the deficiencies in the physical structure, a mitigation plan outlined the use of temporary staff to address the risks until the physical building modifications could be completed. The increase of staff was recognized during our visit. The changes in operations were noticeable and drove patients' complaints to our office.

LRC will continue to operate under their mitigation plan until the ligature plan is completed. The ligature plans involve renovations to the above-identified buildings to reduce possible patient safety risks as outlined, and to improve overall patient cares spaces. The construction project for the ligature plan was launched on January 11, 2021, and is currently scheduled to be completed in March 2022. (See Project letter, attachment L2)

Attached you will find facility staffing levels. Additionally, there were 63 patient assaults on staff in the calendar year 2020 for LRC main campus. (See Facility Staffing Information, Attachment L3)

Issues identified for review in 2021:

1. COVID plan, response, and impact to staff and individuals.
2. There is a defined work order system utilized by DAS and DHHS to assure minor construction projects are identified, tracked, and completed. Major construction projects are tracked on a summarized list. The information that can be gleaned from a review of these systems will help provide a comprehensive view of the condition of the facility.
3. Ligature point renovation. The Ombudsman's Office will work to understand and address any major disruptions to patients and the impact the renovation will have on the facility's ability to intake needed patients for care as it undergoes this renovation.
4. Address issues identified in reports received by the Office of Public Counsel (See Inspection Forms, Attachment L4 and Occupancy Permits, Attachment L5), including staffing levels, retention rates, and turnover.

In 2020, the Ombudsman's Office received over 50 reports of complaint about LRC, mostly from the patients themselves, but some from staff and families as well. These complaints ranged from COVID concerns to operational changes due to the ligature mitigation plan to reasons of placement at LRC.

Norfolk Regional Center (NRC)

The Norfolk Regional Center (NRC) is a 120 bed, Joint Commission-accredited state psychiatric hospital. It is operated by DHHS.

The first thing you notice when visiting NRC is a large wire gate around the campus. The gate is approximately 15-20 ft. high with razor wire wrapped around the top. There are two main points of entry. The first for deliveries, transports, and emergency vehicles, the other for staff and public access. To gain entry, there is a voice button for identification. An NRC staff must buzz the public in for vehicle access to the building. Once you gain access inside the gated construction, there is a main public entry area with a phone. Visitors need to use this phone to gain entry inside the main area of the building. Essentially, comparing this campus to others across the state, one observes that it is easier to see a live body at a correctional facility or Veterans Home or other state institution for questions or help than it is at the NRC.

After gaining vehicle access to the parking grounds of the facility, there is a three-story brick hospital with several walk-out basements and egress points. Additionally, there are internal fences on both ends of the building to control independent yard access. The main building on the NRC campus, which houses all patient services, is dated over 50 years. The grounds are well kept. Other buildings located inside the fence seem to be utilized. Besides the main three-story building, there is a newer constructed maintenance building, paved lots for parking, a structure being used for covered parking and storage, a gazebo, and basketball courts outside the internal gates on the end of the main building.

The infrastructure of the main building allows for all patient services. The building has space for individual's housing needs, a cafeteria area, medical services, administrative services, religious functions, recreation, and other essential programming. Patient Living areas are Unit 1- West, Unit 2-West and East, Unit 3-West and East.

Based on the documents received from NRC, several surveys were conducted by the DHHS Public Health-Licensure Unit, about NRC. The reports cover regulatory and compliance issues. The survey findings based on observations, interviews, and records review are attached. (See Surveys, Attachment N1)

Attached you will find facility staffing levels. Additionally, there were 20 staff injuries related to assault staff in the calendar year 2020. (See Facility Staffing Information, Attachment N2)

Issues identified for review in 2021:

1. COVID plan, response, and impact to staff and individuals.
2. There is a defined work order system utilized by DAS and DHHS to assure minor construction projects are identified, tracked, and completed. Major construction projects are tracked on a summarized list. The information that can be gleaned from a review of these systems will help provide a comprehensive view of the condition of the facility.

3. Address any issues identified in the Inspection reports received by the Office of Public Counsel (See Inspections Report, Attachment N3), including staffing levels, retention rates, and turnover.

In 2020, the Ombudsman's Office received over 50 reports of complaint related to LRC, mostly from the patients themselves, but some from friends and family members as well. These complaints ranged from COVID concerns to operational changes due to new leadership, to clinical team decisions to lack of staffing and access to legal law library.

Whitehall

The Whitehall Campus is located in the northeast quadrant of the city of Lincoln, Nebraska. It is licensed and accredited as part of the Lincoln Regional Center and considered an extension of the Lincoln Regional Center, a Joint Commission-accredited state psychiatric hospital. DHHS's Division of Public Health licensure unit verifies the Whitehall is licensed and meets statutory requirements as a Mental Health Substance Use Treatment Center. (See License, Attachment W1)

Whitehall, until recently, solely addressed the treatment needs of male adolescents who have sexually offended. In the fall of 2020, the Hastings Juvenile Chemical Dependency Program (JCDP) was relocated from the Hastings Regional Center to Whitehall. There are currently two distinct programming offerings on the Whitehall campus. With the addition of the JCDP, the immediate changes to facility operations were recognized in the fall of 2020.

In part, due to the functional changes of the facility, the Ombudsman's Office conducted several announced and unannounced visits to Whitehall. One of the visits, conducted on October 8, 2020, occurred about a week after the JCDP youth moved to Whitehall from the Hastings Regional Center. At that time, the census included eight sex offender treatment program youth and six JCDP youth. There were signs that the facility was working out the many logistics in combining two facility programs into one.

In regards to the layout of the campus, youth living quarters are determined by what programs the youth are participating in. Each youth has his bedroom in the living quarters. The insides of the youth cottages are dated. The youth rooms were generally clean and mostly neat. The recent carpet installation was a noticeable improvement in the youth cottages. Additionally, new lights in the youth cottages (Warner House and Community Life cottages) were noticed. The campus is comprised of several other structures. Some Administrative offices are located in the TAB building, with others located in the Knight House. There is a Whitehall Mansion on the campus with other buildings used by maintenance and a separate school building with a library for the use of both programs.

Generally, the outside grounds of the campus were well kept. There was a noticeable phone line connected to the building that could present a security concern. We discussed this with facility

administration and were told that the phone line is Windstream's and will be taken down during the CAT 6 voice/VOIP line project, which has begun.

Based on the documents provided by Whitehall, several surveys were conducted by DHHS's Public Health-Licensure Unit, on the Whitehall campus. The reports cover regulatory and compliance issues. The survey findings based on observations, interviews, and records review are attached (See Surveys, Attachment W2)

Attached you will find facility staffing levels. Additionally, there were 4 staff injuries related to assault staff in the calendar year 2020. (See Facility Staffing Information, Attachment W3)

Issues identified for review in 2021:

1. COVID plan, response, and impact to staff and individuals.
2. There is a defined work order system utilized by DAS and DHHS to assure minor construction projects are identified, tracked, and completed. Major construction projects are tracked on a summarized list. The information that can be gleaned from a review of these systems will help provide a comprehensive view of the condition of the facility.
3. Ongoing progress on the following projects: Camera system and Windstream project.
4. Address any issues identified in reports received by the Office of Public Counsel (See Occupancy Permits, Attachment W4), including staffing levels, retention rates, and turnover.

Historically, reports of complaint from Whitehall are low in number. Generally, we see an issue or two brought to our attention. In 2020, after the move of the JCDP program to the Whitehall campus, the Ombudsman's Office did receive a related report of complaint about Whitehall, relating to the proper guidelines for securing a youth when acting out.

Hastings Regional Center

The Ombudsman's Office visited the Hastings Regional Center on various occasions throughout 2020. The campus is located on the west edge of Hastings. Through the better part of 2020, the Hastings Juvenile Chemical Dependency Program (JCDP) was operating on that campus. In the building the program was operating in at the time, the youth living area looked very dated. The facility was utilized to deliver residential substance abuse treatment for adolescent males (presently, as mentioned previously, administered in Lincoln on the Whitehall campus). Several buildings at HRC have been torn down, which has created open space on the campus. There were several construction projects throughout campus, which included the building of two new cottages, a building structure for a school and cafeteria, and an administration building. The grounds were busy and there were some trees on the ground waiting to be cleared on the south side of the campus. Several buildings were also going through demolition.

At the present time, the building where the JCDP was housed is not operating with any program in it. There are two brand new cottages at the HRC. The plan was formerly for these two cottages

to be used as living quarters for the chemical dependency program for boys in a college dorm-style setting and provide classification flexibility in housing placement. However, DHHS decided to repurpose the campus and the JCDP was relocated from HRC to Whitehall in October 2020.

At this time, the campus is being converted to house an all-female Youth Rehabilitation and Treatment Center (YRTC). The new cottages are currently going through renovations which include hardening of the walls, raising ceilings, and filming windows. The new cottages, even without the changes to who they will serve, probably would have eventually needed reinforcement to the structure. Additionally, some HRC staff that worked with the JCDP were assigned to YRTC-Kearney to create a seamless transition upon the female youth moving to the HRC campus, and will continue to work with them as the HRC becomes a YRTC.

DHHS, Division of Public Health licensure unit verified HRC was licensed and met statutory requirements as a Mental Health Substance Use Treatment Center and a Residential Child-Caring Agency while on the Hastings campus. The certificates are expired. (See Licenses, Attachment H1.)

The Ombudsman's Office was made aware of a risk assessment conducted on the HRC campus that evaluates the potential adverse impact of buildings, grounds, equipment, occupants, and internal physical systems on the safety and health of clients, staff, and other people visiting the facilities. (See Risk Assessments, Attachment H2.)

Attached you will find facility staffing Information. Additionally, there were zero assaults on staff in the calendar year 2020. (See Facility Staffing Information H3.)

Issues identified for review in 2021:

1. The transition of the HRC to a YRTC in order to serve female youth on campus under the Office of Juvenile Services.
2. There is a defined work order system utilized by DAS and DHHS to assure minor construction projects are identified, tracked, and completed. Major construction projects are tracked on a summarized list. The information that can be gleaned from a review of these systems will help provide a comprehensive view of the condition of the facility.
3. Address any issues identified in the Inspection reports received by the Office of Public Counsel (See Inspections Report, Attachment H4), including staffing levels, retention rates, and turnover.

OFFICE OF JUVENILE SERVICES

YOUTH REHABILITATION AND TREATMENT CENTER (YRTC) SYSTEM

The Office of Juvenile Services within the Division of Children and Family Services at DHHS operates the Youth Rehabilitation and Treatment Centers (YRTCs), 24-hour state institutions to serve youth within Nebraska's juvenile justice system. As recently as 2019, there were two YRTCs: one for girls in Geneva and one for boys in Kearney. Currently, there are YRTCs in Kearney, Lincoln, Geneva (not operational as a YRTC currently), and soon-to-be Hastings.

Over the last 16 months, DHHS has implemented many initiatives throughout the YRTC system. The initiatives represent major changes incorporated into facilities operated by the Office of Juvenile Services. These initiatives indicated a fundamental shift in how care is delivered to youth. Some of these initiatives, such as repurposing of space and changes to gender placement at facilities, created necessary, albeit, unforeseen changes in facility operations, functioning, and building structure need throughout the system.

In regards to operational changes, the Ombudsman's Office observed, significant renovations to several of the state institutions. With more stability to the system, the hope is that a better understanding of the facility conditions and changes necessary to right the ship will become apparent in 2021.

The Ombudsman's Office experienced increased complaints in 2020 related to YRTC system changes. In 2020, the Ombudsman's Office received over 25 reports of complaints related to the YRTC system. The complaints were received from staff, youth and family members of youth. The issues ranged from youth placement to safety, and to communication concerns.

Based on the many changes to the system, the majority of the issues that were identified in the complaints were ongoing, in part, due to the functional and fundamental changes of the use of our Office of Juvenile Services state facilities. The Ombudsman's Office conducted several announced and unannounced visits to facilities across the YRTC system. In 2021, facilities operated by the Office of Juvenile Services are continuously being monitored and examined.

The following observations will provide a brief point in time view of the facility's operations under the Office of Juvenile Services in 2020: 1) YRTC-Lincoln, 2) YRTC-Geneva, 3) YRTC-Kearney, and 4) Hastings Regional Center -soon to become a YRTC for female youth (see above observations made under Behavior Health Overview).

YRTC - Lincoln

In 2019, the discussion between DHHS and Lancaster County was initiated to discuss facility space—utilizing a portion of the Lancaster County Youth Services Center as an additional YRTC. Shortly following, DHHS entered a 5-year contract with Lancaster County to lease space

within the same building as the Lancaster County Youth Services Center. The Lancaster County Youth Services center provides for the detention of youth being processed through the juvenile justice system, or youth who have been adjudicated and ordered by a criminal court to serve a specified period of time.

YRTC – Lincoln was established in 2020. With the addition of a newly created state facility, it became very important to the Ombudsman's Office to comprehend the new facility's mission and gain an understanding of general rules, responsibilities, and operations of the new YRTC. A request was made for YRTC-Lincoln policies. These were provided to the office promptly.

To continue data collection and understanding, the Ombudsman's Office began conducting announced and unannounced visits. Familiar with the Lancaster County Youth Services Center from previous Ombudsman cases, the facility design was not new. However, of interest was how the populations between the two facilities were sharing facility space for services such as school, recreation yards, cafeteria, and other essential service needs. (See Inspection reports, Attachment YLF 1.)

The housing unit where the youth reside at YRTC - Lincoln has two separate living pods—one for males and one for females. Each youth has a private room in the pod. The pods have a small common area for different uses for such things as phone calls, showers, and leisure activities. The pods are separated by a larger multi-purpose area designed for additional individual or group activities. Both the female and male pods share the larger multi-purpose area, which means the youth in each pod have opportunities for visual observations of each other.

As with the other YRTC's, YRTC - Lincoln will work toward American Correctional Association (ACA) accreditation. It is also understood that the facility will participate in the Performance-Based Standards (PbS) Project sponsored by the Council for Juvenile Correctional Administrators.

As of December 31, 2020, there were a total of 47 employees at the Lincoln Facility. Additionally, there was 19 youth to staff assaults. (See Facility Staffing Information, Attachment YLF 2.)

Issues identified for review in 2021:

1. COVID plan, response, and impact to staff and individuals.
2. There is a defined work order system utilized by DAS and DHHS to assure minor construction projects are identified, tracked, and completed. Major construction projects are tracked on a summarized list. The information that can be gleaned from a review of these systems will help provide a comprehensive view of the condition of the facility.
3. Address any issues identified in the reports received by the Office of Public Counsel, including staffing levels, retention rates, and turnover.
4. Gain an understanding of the programming utilized at YRTC – Lincoln and the appropriate youth population best served in this new program.

YRTC – Geneva

On August 19, 2019, female youth from YRTC-Geneva were relocated to YRTC- Kearney after conditions on the Geneva campus was deemed insufficient and Geneva could not continue to care for the girls on this campus. The move to Kearney presented many challenges but was made due to the safety and well-being of the youth.

In 2020, the Ombudsman's Office conducted several visits on the Geneva campus. During this time, significant repair and refurbishing work on campus was observed. Of particular interest, the LaFleshe building formally used as living quarters for behavioral youth, was completely renovated in early 2020, and services were re-established at YRTC - Geneva for female youth who were going to be transitioned back into the community. YRTC - Geneva no longer has youth on its campus as the transition services were discontinued on the Geneva campus during the summer of 2020.

The YRTC - Geneva administration still exists on the campus at the writing of this report. These days, ever since the last half of 2020, the quietness of the campus is apparent—youth are not seen walking to classes or going to recreation. Instead, what is noticeable is a quiet campus comprised of many buildings sitting idle.

Buildings at YRTC - Geneva include four cottages that were used as youth living quarters, a chapel placed almost in the middle of the campus with an adjacent food service building, a maintenance building still being used by staff, and other buildings that were used for daycare, recreation, and training purposes. The building formerly used as the administration building is currently being used as a Medicaid call center.

Attached you will find facility staffing information. Additionally, there were zero assaults on staff in the calendar year 2020. (See Facility Staffing Information G1.)

Issues identified for review in 2021:

1. Determine when YRTC- Geneva Administration will no longer be housed on the Geneva campus and understand what the campus will be utilized for in the future.
2. Address any issues identified in reports received by the Office of Public Counsel (See email on construction work/remodeling in the Admins building that involved the Fire Marshall, Attachment G2, Fire Drill dated 8/5/2020, Attachment G3), including staffing levels, retention rates, and turnover.

YRTC - Kearney

YRTC - Kearney is located in Kearney, NE, and has been serving both male and female youth since August of 2019. It has gone through different operational models since the addition of females being served on its campus. Although a large campus, there is a significant amount of planning that is needed to maintain the operations of the two programs. In part due to the function changes of the facility, the Ombudsman's Office conducted several announced and unannounced visits on this campus.

Although, a non-state licensed facility, the YRTC- Kearney is accredited under the American Correctional Association (ACA). It also participates in Performance-Based Standards (PbS) project reviews sponsored by the Council for Juvenile Correctional Administrators and is currently under contract with the Missouri Youth Services Institute (MYSI) for assistance with implementing basic principles of the MYSI therapeutic and rehabilitative model approach.

Generally, the outside grounds of the campus are well kept. The campus is comprised of many buildings. The infrastructure required to provide services and housing for the youth is significant. The campus has structures for youth housing needs, cafeteria, medical services, administrative services, religious functions, and education and recreation areas. Dixon, the name of a building on campus, has generally been used for new intakes to the facility and for those youth who need to be separated for behavioral issues. With the addition of females, this has changed on many occasions as well. As for the interior design of each cottage, the layout is essentially the same for the male youth cottages. Those cottages have barrack-style living quarters on the second floor with a congregate restroom. The first level has three basic sections. Those sections being a game/rec area, bathroom area with showers, and a TV multi-purpose area. General cleanliness of the dorm areas was observed. Where the multi-use areas were utilized, at times they could be cluttered and somewhat organized but clean. Any issues were brought to the facility's attention and handled immediately.

YRTC - Kearney went through many operational changes in an attempt to work out the many logistics in combining two facility programs—serving males and females—on one campus. The changes led to the girls being placed at Morton Living Unit which allows for individual rooms. The facility also purchased two portable trailers for classroom use by the girls.

The Ombudsman's Office was made aware of a standards compliance reaccreditation audit conducted by the Commission on Accreditation for Corrections, July of 2020. (See the Standards Reaccreditation Audit, Attachment K1.)

Attached are the facility staffing levels and staff injuries by severity (See Facility Staffing Information, Attachment K2.)

Issues identified for review in 2021:

1. COVID plan, response, and impact to staff and individuals.
2. There is a defined work order system utilized by DAS and DHHS to assure minor construction projects are identified, tracked, and completed. Major construction projects

are tracked on a summarized list. The information that can be gleaned from a review of these systems will help provide a comprehensive view of the condition of the facility.

3. Address any issues identified in reports received by the Office of Public Counsel (See Food Establishment Inspection Report, Attachment K3), including staffing levels, retention rates, and turnover.

W 436	SPACE AND EQUIPMENT CFR(s): 483.470(g)(2) The facility must furnish, maintain in good repair, and teach clients to use and to make informed choices about the use of dentures, eyeglasses, hearing and other communications aids, braces, and other devices identified by the interdisciplinary team as needed by the client. This STANDARD is not met as evidenced by: . Based on record review, interview and observation, the facility failed to ensure training for 1 of 1 client (Client 2) who refused to wear their prescribed corrective lenses. This deficient practice had the potential to affect all clients who utilized adaptive or supportive equipment. Facility census was 16 at the time of the survey. Findings: Record review of Client 2's 2/10/2020 Vision Examination, 4/1/2020 Annual Nursing Evaluation, 5/13/2020 Adaptive Equipment list, and 5/13/2020 Individual Support Plan (ISP) revealed Client 2 utilized corrective lenses. Observations throughout the survey (8/3/2020 from 4:25pm-6:25pm, 8/5/2020 from 11:25am-12:05am, and 8/6/2020 from 9:30am-9:55am) identified Client 2 failed to wear their prescriptive eye glasses and when asked, Client 2 stated they did not have glasses to wear. Interview with Client 2's Coverage Qualified Intellectual Disability Professional (QIDP) A, on 8/6/2020 at 11:00am confirmed Client 2 refused	W 436

IMPORTANT NOTICE – PLEASE READ CAREFULLY

Good Afternoon Dawn Urbaschek:

RE: Lake Street ICF, Beatrice

On August 26, 2020 we conducted an onsite revisit to verify that the facility had achieved and maintained compliance with the deficiencies cited at the August 5, 2020 survey. The attached CMS 2567 shows your facility was found to be in substantial compliance at this time.

The Centers for Medicare and Medicaid Services (CMS) has been notified of the results of our revisit.

If you have any further questions, please contact our office.

Thank you,

Sharon Brandt, C.L.S.S.Y.B.

W 249	PROGRAM IMPLEMENTATION CFR(s): 483.440(d)(1) As soon as the interdisciplinary team has formulated a client's individual program plan, each client must receive a continuous active treatment program consisting of needed interventions and services in sufficient number and frequency to support the achievement of the objectives identified in the individual program plan. This STANDARD is not met as evidenced by: Based on observations, interviews and record review, the facility failed to ensure client training programs were implemented as outlined in the Individual Support Plans (ISPs) for 1 of 6 clients in the sample (Client 3). This failure had the potential to affect all clients residing at the facility. Facility census was 67 at the time of the survey. FINDINGS: Review of Client 3's ISP, dated 7/3/19, revealed it included three programs which focused on the training of the basic skills of making a choice, grasping and the picking up of items. All three of these training programs specified the schedule and frequency for implementation of training procedures "should be practiced whenever there is a functional or situational reason to do so". Observations during the survey identified Client 3 to sleep (eyes closed with their head down, leaning forward or to the side) a significant period of time during scheduled daily activities.	W 249

W 249	Continued From page 1 Observations found staff failed to wake Client 3 or engage Client 3 in a manner that interrupted the sleeping and reengaged Client 3 in the activities taking place. Specifically: 1) Observations on 12/10/19 from 3:00pm -3:40pm identified Client 3 to attending Music Group in the Chapel. From 3:05pm - 3:40pm, Client 3 was observed to have their eyes closed and head leaning forward and tilted to the right. Client 3 did not open their eyes or lift their head during these 35 minutes. Staff A, seated directly to the right of Client 3, did not attempt to wake Client 3 during this time. 2) Observations on 12/11/19 from 12:13pm - 12:40pm identified Client 3 to be in the "Pay It Forward" home room. Client 3 was observed to have their eyes closed and head leaning to the right. Staff B went over to Client 3 and asked "would you like to help" and moved Client 3 to an area where a painting activity was taking place. Staff B spoke to Client 3 about what Staff B was painting but did not physical engage Client 3 in the activity. Client 3 remained with their eyes closed and their head leaning to the right until 12:40pm when another staff escorted Client 3 to lunch. 3) Observations on 12/11/19 from 4:15pm - 4:45pm identified Client 3 to be at home (753 Solar) in the living room, sitting in front of the television (TV). The TV was on, but Client 3 was observed to have their eyes closed, with their head leaning forward. At 4:14pm Staff C entered the living room and asked Client 3 if they wanted to help Staff C make the evening meal. Client 3 looked up at Staff C as Staff C took Client 3 in to the kitchen area. At	W 249

W 249	Continued From page 2 4:18pm, Client 3 was observed to be in the kitchen area with their eyes closed and their head hanging forward. Staff D and Client 3's Qualified Intellectual Disability Professional (QIDP) were observed to verbally interact with Client 3 during this time and were unsuccessful in waking Client 3. At 4:45pm, Client 3 was taken to their bedroom to rest prior to the evening meal. 4) Observations on 12/12/19 from 11:30am - 12:00pm identified Client 3 to be the Pay It Forward home room. Client 3 was at observed to have their eyes open and seated next to Staff E. Staff E was gluing items on to small white paper sacks. At 11:33am Client 3 was observed to repeatedly blink their eyes and began to yawn. Client 3 was observed to have their eye closed and their head leaning to the right within 18 seconds of yawning. Both Staff E and Staff F tried to "wake" Client 3 by talking directly to Client 3, rubbing Client 3's arm and putting an item in Client 3's hand. From 11:34am - 12:00pm, Client 3 was observed have their eyes closed with their head leaning to the right. Interviews with Staff E and Staff F (during the 12/12/19 observation in the Pay It Forward home room) confirmed Client 3 was sleepy on most days and was every difficult to keep awake when sleepy. Staff E stated Client 3 could sleep "through anything". Staff F stated it was common to have Client 3 sleep through lift transfers in a sling and personal cares. When interviewed on 12/16/19 at 2:30pm, Client 3's QIDP confirmed Client 3 was sleepy or slept much of the time Client 3 was in their wheelchair.	W 249

E 018	Continued From page 2 full scale emergency exercises. This failure has the potential to affect all clients residing at the facility and all staff employed by the facility. The facility census was 67 at the time of survey. Findings: Review of the facility's policy titled, "Emergency Preparedness and Planning," (dated 05/20/2019) the policy revealed during an emergency and/or testing exercises, the facility will document names of clients and on-duty staff, vehicle transportation, transfer locations, and medical needs. Review of the facility's Emergency Preparedness documents titled, "Incident Action Plan (IAP)" and "Individual Supported Evacuation Tracking Log," (dated 11/04/2019) failed to identify client departure and arrival time, transportation, relocation destination, and on-duty staff assigned to specific clients. Interview on 12/16/2019 at 2:15 pm, the Administrator verified the evacuation tracking log was incomplete and failed to document the necessary emergency tracking information for clients and on-duty staff. DEPT. OF HEALTH AND HUMAN SERVICES

Pete Ricketts, Governor

received 1-3-2020

January 3, 2020

Greg Penner
Administrator
Solar Cottages Icf
3052 3056 3060 Pet Blv 753 743 723 715 Solar
Beatrice, NE 68310

Dear Mr. Penner:

The enclosed report documents a finding of noncompliance with the ICF certification regulations for Solar Cottages Intermediate Care Facility For Intellectually Disabled following the survey at your facility completed on December 17, 2019 by representatives of the Nebraska Department of Health and Human Services Division of Public Health.

The violations found must be corrected to avoid disciplinary action against the facility's license. Therefore, a written statement of compliance must be submitted to the Department within 10 working days of receipt of this letter. The statement of compliance must include for each deficiency cited:

1) Action(s) that will be taken to correct the deficiency;
2) The procedure for implementing the corrective action(s);
3) How the facility will monitor its corrective actions/performance to ensure that the violation is being corrected and will not recur, i.e. what program will be put into place to monitor the continued effectiveness of the systemic change to ensure that solutions are permanent;
4) Identify person(s) by position, not individual name, who will be responsible for monitoring and ensuring that compliance is achieved and continues;
5) A realistic date by which each violation will be corrected (which should be within 45 days of the exit of the survey); and
6) Signature of the administrator or other authorized official and date.

If you fail to submit and implement a statement of compliance, the Department may initiate disciplinary action against the facility license.

If you have any questions regarding this correspondence, contact this office.

Sincerely,

Mark Luger

RE: Solar Cottages ICF #ICFDD17

Dear Mr. Penner:

IMPORTANT NOTICE – PLEASE READ CAREFULLY

On January 13, 2020, DHHS representatives conducted surveys to determine whether your facility was in compliance with Federal Condition of Participation requirements, State Licensure regulations, and Life Safety Code Requirements for Intermediate Care Facilities for Individuals with Intellectual Disabilities. Enclosed you will find the CMS-2567's documenting the results of that survey. All references to regulatory requirements contained in this letter are found in Title 42, Code of Federal Regulations and Title 175 NAC 17Regulations Governing Licensure of Intermediate Care Facilities for Individuals with Intellectual Disabilities.

PLAN OF CORRECTION (POC)

A POC for each deficiency cited must be submitted to DHHS.AcuteCareFacilities@nebraska.gov **NO LATER THAN 10 calendar days after receipt of the CMS-2567's**. Failure to submit an acceptable POC timely may result in the imposition of Disciplinary Action.

An acceptable POC must include:

- The plan of correcting the specific deficiency. The plan should address the processes that lead to the deficiencies cited;
- The procedure for implementing the acceptable plan of correction for the specific deficiency cited;
- The monitoring procedure to ensure that the plan of correction is effective and that specific deficiency cited remains corrected and/or in compliance with the regulatory requirements;
- The title of the person responsible for implementing the acceptable plan of correction;
- **PROVIDE THE DATE WHEN CORRECTION ACTION WILL BE COMPLETED.** Correction dates should be no later than forty-five calendar days from the exit date of the survey or **February 21, 2020.**

NOTE: Remember to attach copies of any auditing tools; education; revised or new policies/processes.

SIGNATURE ON FIRST PAGE OF THE 2567's: The first page must be signed by the provider/supplier representative and faxed to 402-742-8319.

We will notify you whether your plan of correction is or is not acceptable via email. Subsequently, if your plan of correction is **not accepted, you must submit an addendum to your plan of correction within ten (10) calendar days of the notification.**

We thank you and your staff for your cooperation and assistance during the survey. If you have any questions regarding this correspondence, please contact this office.

Sincerely,

Mark Luger - Program Manager II

***PLEASE NOTE**: We are moving toward a more paperless system. As a result, your survey information is being emailed to you. You are being sent a survey letter, and a copy of the survey report form (CMS-2567). We hope our conversion to utilize less paper is a convenient process for you, don't hesitate to contact one of the staff assistants if you have any questions. THANK YOU!*

Good Morning, Mr. Penner:

PLEASE NOTE: The individual to whom this is addressed is to confirm receipt to sender.

Attached is a copy of the results from the Revisit survey with complaints recently completed at your facility.

Your opinion is important to us and we would like your feedback regarding the survey process. Please complete an evaluation about this survey by clicking on the link below:

Dear Mr. Penner:

An unannounced visit was made to Solar Cottages ICF on March 16-18, 2020, by representatives of this Department. The purpose of the visit was to investigate a complaint on non-compliance with regulatory requirements received by our office.

The following are the general allegations of non-compliance and conclusions:

ALLEGATION:
The facility fails to ensure systems are in place to protect clients from clients with adverse behaviors.
The facility fails to ensure staff safely transfer clients via mechanical lifts.

FINDINGS:
The facility had systems and processes in place to protect clients from clients with adverse behaviors. Facility staff could identify processes and supports in place. Observations revealed staff were able to implement supports. At the time of the investigation, the facility was found to be in compliance with the regulations.

The facility had systems and processes in place to safely transfer clients via mechanical lifts. Facility staff could identify processes and supports in place. Observations revealed staff were able to implement supports. At the time of the investigation, the facility was found to be in compliance with the regulations.

These findings are related to regulations under the Licensure Unit's regulatory authority. Since each division has unique statutory and regulatory obligations and guidelines, it may be possible that your facility will receive additional findings from other divisions who have also participated in the investigation/assessment of these same or similar allegations.

Sincerely,

Mark Luger

Dear Mr. Penner:

An unannounced visit was made to Solar Cottages on September 21, 2020-September 23, 2020, by a representative of this Department. The purpose of the visit was to investigate a complaint on non-compliance with regulatory requirements received by our office.

The following are the general allegation(s) of non-compliance and conclusions:

ALLEGATIONS:

1) The facility fails to protect clients from staff abuse.

2) The facility failed to ensure sufficient staffing to meet client needs.

FINDINGS:

1) The facility had systems and policies in place to respond to and address staff to client abuse, neglect, and mistreatment. At the time of the onsite survey investigation, the facility was found to be in compliance with the regulation.

2) The facility had systems and policies in place to provide the necessary and appropriate supervision to meet client needs. At the time of the onsite survey investigation, the facility was found to be in compliance with the regulation.

These findings are related to regulations under the Licensure Unit's regulatory authority. Since each division has unique statutory and regulatory obligations and guidelines, it may be possible that your facility will receive additional findings from other divisions who have also participated in the investigation/assessment of these same or similar allegations.

Ms. Dawn Urbaschek, Administrator
400 State Building
3104, 3070, 3071 State Ave
Beatrice, NE 68310

Dear Ms. Urbaschek:

An unannounced visit was made to 400 State Building on March 3, 2020, by representatives of this Department. The purpose of the visit was to investigate a complaint on non-compliance with regulatory requirements received by our office.

The following are the general allegation of non-compliance and conclusions:

ALLEGATION:
The facility fails to ensure residents are free from abuse.

FINDINGS:
Observations and interviews revealed no evidence of staff to client abuse during the recertification survey. Record review and interview revealed the facility had systems and policies in place to address and prevent abuse, neglect, and mistreatment of clients by staff. Record review and interviews revealed the facility implemented its policies, investigated staff to client abuse allegations, and implemented safeguards to protect clients which met the requirements necessary according the regulatory standards. At the time of the onsite survey investigation, the facility was found to be in compliance with the regulation.

These findings are related to regulations under the Licensure Unit's regulatory authority. Since each division has unique statutory and regulatory obligations and guidelines, it may be possible that your facility will receive additional findings from other divisions who have also participated in the investigation/assessment of these same or similar allegations.

Sincerely,

Mark Luger

PLAN OF CORRECTION

Provider/Supplier Name:	400 State Building	Survey Date
STREET ADDRESS, CITY, ZIP:	3104, 3070, 3071 State Ave Beatrice, NE 68310	2/11/2020
	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER 28-	4SE111

CITED TAG #	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	COMPLETION DATE
W197	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY - ALONG WITH A DESCRIPTION OF HOW THE ACTION WILL CORRECT OR IMPROVE THE PROCESSES THAT LEAD TO THE CITED DEFICIENCY:**	
	For Client 2: Client 2 was discharged from the Beatrice State Developmental Center (BSDC) on 2/21/20.	2/21/2020
	For Client 3: During a recent Public Health survey on 2/3/20, it revealed that Client 3 actively and independently participated in their environment requiring little to no staff interventions related to daily living and developmental skills. Observations revealed that Client 3 is independent or capable of demonstrating developmental and daily living skills with the focus of the facility's services directed at behavioral or mental health needs. Review of Client 3's Individual Support Plan (ISP) dated 6/27/19 identified the individual as an effective verbal communicator who communicated wants, needs and thoughts using long complex grammatically correct statements; to possess strengths/skills in several areas of independent living skills; is able to withdraw, secure, carry and spend small amounts of money; and completed custodial, recycling and vehicle detailing work, earning $305.90 over the last 30 days.	3/27/2020
	Client 3's records include a letter dated 5/24/19 from the Facility Administrator to an attorney regarding Client 3's arrest and pending charges. The letter identified that Client 3 had been at the facility's Crisis Stabilization Unit (CSU) from 10/31/18-4/1/19 and could be readmitted on 5/28/19. The letter described the services provided as "treatment and habilitative care in the CSU, which has been designed to provide behavioral, psychiatric and medical interventions to Nebraskans who have been determined to be developmental disabled and who, by reason of mental health crisis, drug abuse, or other circumstances are struggling in their community placement".	3/27/2020
	On February 27, 2020, the QIDP received a letter addressed to Client 3 from Dawn Sybrant, Interim Program Manager with DHHS Medicaid and Long-Term Care as notification that Medicaid funding for Intermediate Care Facility for the Developmentally Disabled (ICF/DD) services will be terminated as Client 3 no longer meets the level of need criteria for ICF/DD services. A Notice of Action letter states that Client 3's Medicaid funding for ICF/DD services will be discontinued after April 27, 2020. The Notice of Action letter reason for the decision states "review of the 2/14/20, BSDC 400 State Building recertification survey found you do not need ICF/DD services as you do not have developmental needs requiring continuous active treatment services".	3/27/2020

	BSDC facility administration is working with the DHHS Department of Developmental Disabilities in regards to options for funding.	3/27/2020
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
	On February 27, 2020, the QIDP received a letter addressed to Client 3 from Dawn Sybrant, Interim Program Manager with DHHS Medicaid and Long-Term Care as notification that Medicaid funding for Intermediate Care Facility for the Developmentally Disabled (ICF/DD) services will be terminated as Client 3 no longer meets the level of need criteria for ICF/DD services. A Notice of Action letter states that Client 3's Medicaid funding for ICF/DD services will be discontinued after April 27, 2020. The Notice of Action letter reason for the decision states "review of the 2/14/20, BSDC 400 State Building recertification survey found you do not need ICF/DD services as you do not have developmental needs requiring continuous active treatment services".	3/27/2020
	BSDC facility administration is working with the DHHS Department of Developmental Disabilities in regards to options for funding.	3/27/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
	BSDC facility administration is working with the DHHS Department of Developmental Disabilities in regards to options for funding.	3/27/2020
	D. THE TITLE OF THE PERSON RESPONSIBLE FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY: (Do not put the staff names).	
	The ICF Administrator is the responsible person for monitoring and to ensure compliance.	3/27/2020
W249	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY - ALONG WITH A DESCRIPTION OF HOW THE ACTION WILL CORRECT OR IMPROVE THE PROCESSES THAT LEAD TO THE CITED DEFICIENCY:**	
	For Client 1, staff will be re-inserviced on appropriate training techniques and implementation of the Individual Support Plan (ISP) program "Dining Etiquette" dated 11/27/19, to ensure staff are offering napkins or prompting Client 1 to wipe face whenever eating or drinking; to have a napkin available at every meal or snack and to occur at every given opportunity as appropriate.	3/27/2020
	For all other individuals residing within the State Building ICF, staff will be re-inserviced on mealtime programs as outlined in the Individual Support Plan (ISP).	3/27/2020
	A monitoring system will be developed to ensure implementation of the ISP and mealtime programs will be completed by Compliance Specialists, QDDPs, Home Managers and DTSS.	3/27/2020
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	

	For Client 1, staff will be re-inserviced on appropriate training techniques and implementation of the Individual Support Plan (ISP) program "Dining Etiquette" dated 11/27/19, to ensure staff are offering napkins or prompting Client 1 to wipe face whenever eating or drinking; to have a napkin available at every meal or snack and to occur at every given opportunity as appropriate.	3/27/2020
	For all other individuals residing within the State Building ICF, staff will be re-inserviced on mealtime programs as outlined in the Individual Support Plan (ISP).	3/27/2020
	A monitoring system will be developed to ensure implementation of the ISP and mealtime programs will be completed by Compliance Specialists, QDDPs, Home Managers and DTSS.	3/27/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
	A monitoring system will be developed to ensure implementation of the ISP and mealtime programs will be completed by Compliance Specialists, QDDPs, Home Managers and DTSS.	3/27/2020
	D. THE TITLE OF THE PERSON RESPONSIBLE FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY: (Do not put the staff names).	
	The ICF Administrator will be the responsible person for monitoring and to ensure compliance.	3/27/2020
	NOTE: Please remember to attach any supporting documentation - education provided; auditing tools; new or revised policies and procedures, etc.

W 197	ACTIVE TREATMENT CFR(s): 483.440(a)(2) Active treatment does not include services to maintain generally independent clients who are able to function with little supervision or in the absence of a continuous active treatment program. This STANDARD is not met as evidenced by: Based on observations, record review, and interviews the facility failed to ensure that 2 of 4 sampled clients admitted to the facility had developmental needs requiring continuous active treatment services. This had the potential to affect all clients residing at the facility. The facility census was 18 at the time of the recertification survey. Findings: A. Client 2 1) Observations on 2/3/2020 (4:50pm-6:25pm), 2/4/2020 (11:40am-12:26pm), and 2/5/2020 (7:15am-7:45am) revealed Client 2 actively and independently participated in their environment and required little to no staff interventions related to daily living and developmental skills. These observations identified Client 2: a. Verbally communicated clearly and effectively their wants and needs and asked direct and appropriate questions to direct support staff and the surveyor.	W 197

W 197	Continued From page 1 b. Independently prepared meals and snacks using the stove, oven, microwave, and toaster: (1) breakfast- cooked oatmeal and mixed with banana and honey; made toast and prepared coffee, milk, and juice; (2) lunch-assisted staff to cook a grilled cheese sandwich, and prepared their own vegetables and drinks; (3) supper-prepared 3 baked burritos, a bowl of blue berries, and drinks. Client 2 independently took food temperatures and verified said temperatures with staff to ensure food was safe to eat. Client 2 asked staff for assistance in use of the stove and oven for correct cooking temperatures and due to fear of hot surfaces. Client 2 was knowledgeable about and utilized oven mitts to prevent burns from hot pots and pans. c. Client 2 ate independently. Client 2 took single bites, adequate in size, chewed bite before swallowing, and either paused or set fork down on the plate between bites. The client took sips of their drink(s) between bites. The client did not talk with food in their mouth. Client 2 had no episodes of gagging or coughing that would indicate choking or difficulties with drinking or feeding themselves. d. Possessed the basic developmental skills of toileting, maintaining privacy, dressing, grooming, and personal hygiene cares needed for independence. e. Independently completed laundry and clothes care tasks. f. Used leisure time appropriately by making personal phone calls, prepared game console and played video games, took naps in their bedroom,	W 197

W 197	Continued From page 2 completed personal shopping in the community (with 2 staff), played cards/board games, and watched television (game shows and news channels). Client 2 was able to have conversations regarding current news events with direct support staff and the surveyor. g. Was able to read, tell time, and had writing skills. Client 2 would request they be provided "quiet time" between work activities and leisure time in order for the client to write letters to their attorney, a local judge presiding over a case involving Client 2, local politician(s), and the surveyor. h. Possessed basic telephone and computer skills, including accessing internet websites for music entertainment during meal and leisure times. i. Observations revealed the facility provided Client 2 with two to one staffing supervision levels at all times during waking hours from 6:00am to 11:00pm. Constant visual supervision and 15-minute checks were provided when Client 2 utilized the bathroom, slept in their room, and leisure time on the living unit. During transitions from the living unit, when completing janitorial job tasks, and when in the community staff were positioned directly on either side of Client 2 due to behavioral risks. j. During observations o n 2/4/2020 (11:40am-12:26pm) and 2/5/2020 (7:15am-7:45am) Client 2 displayed and engaged in verbal and physical aggression toward direct support staff, supervisory staff, and the surveyor which included:	W 197

W 197	Continued From page 3 (1) Yelling and screaming in a loud voice (2) Verbally threatening to do staff bodily harm (3) Using profanity, racist comments, name calling, belittling and derogatory remarks (4) Invading direct care staffs personal space, lunging at staff in an intimidating manner (flaying arms out at their sides and posturing by thrusting chest forward), and threatening physical harm (5) Punching a table and walls with a closed fist while yelling and cursing at direct support staff (6) Flipped over then shoved an eight foot (wood and metal) table across the day room. This caused three chairs to be flipped over and miscellaneous items on the table (paper, pens, hand sanitizer, Kleenex, etc.) to be strewn in the day room and hallway. (7) Kicked and tipped over a love seat then shoved the loveseat toward the supervisor who was sitting in the living-room area. 2) Record review of the following documents identified Client 2 (admitted to the facility on 11/22/19) was independent and required no training programs for basic skill acquisition to address daily living skill developmental deficits. The facility's provision of active treatment services was focused on the client's behavioral and mental health needs. a. Review of the "Assessment Admission/Discharge" (dated 11/26/19) identified Client 2 was independent in the following skills: feeding, drinking, grooming, dressing, bathing, mobility/ambulation, and receptive/expressive communication. The client was able to: read survival words and simple printed material,	W 197

W 197	Continued From page 4 instructions, tell time (and associated events related to time periods), perform errands, and make small purchases with cash money, writing checks, or use of a debit card. b. Client 2's Individual Support Plan (ISP, dated 11/22/19 (admission) and subsequent meetings dated 11/26/19 and 12/19/19) identified that Client 2 was an emergency placement at the facility due to aggressive behaviors, property damage, significant safety concerns, and law enforcement involvement in the community. On 11/25/19 (three days after admission) Client 2 was placed in emergency protective custody (EPC) with law enforcement and transferred from the facility to the Lincoln Crisis Center due to significant safety concerns, threats, maladaptive behaviors, and for mental health evaluation. Client 2's ISP identified the client was able to verbally communicate wants and needs. Client 2 independently groomed (used a disposable razor for shaving), dressed, toileted, completed laundry/clothing care, bathed/showered, read, walked/ambulated, utilized money/debit card/write checks, and could tell time. Client 2 independently fed themselves, made/prepared their own meals, completed table setting steps, cleaned-up after meal, expressed food preferences and dislikes, and assisted staff with meal planning. The client independently participated in recreational activities which included playing X-box, lifting weights, free-style rapping, writing music, watching sports, and playing basketball, cards, and the drums. Client 2 independently navigated a computer, phones, and electronic devices. Client 2 was knowledgeable about and could independently	W 197

W 197	Continued From page 5 take their medications. The ISP documented that Client 2 identified they were most proud of being a published author, political advocate, being athletic, and completing custodial jobs and cleaning cars with great detail. The ISP included no evidence that the facility had implemented active treatment training and teaching of daily living skills (as identified above) for Client 2. Further review of the ISPs identified Client 2 had skill maintenance programs for medication administration, money management, and bedroom cleaning/maintenance, even though Client 2 was independent in these skills. The ISP identified the facility developed six behavior programs to address Client 2's behaviors which included a goal to increase pro-social communication and goals to decrease property destruction, verbal aggression, physical aggression, and suicidal and homicidal ideations. The ISP identified multiple rights restrictions specific to behavioral, safety, and suicidal/homicidal precautions including: psychotropic medications (Prazosin and Quietiapine), 2:1 supervision, 15-minute visual checks, all sharps locked unless in use, limited access to fire starting materials/lighters, scheduled phone calls to guardian, no access to internet, no horror or rated 'R' movies, and a crisis safety plan addressing physical and mechanical restraints. c. Review of the "Annual Independent Living Skills Assessment Summary" (dated 12/19/19) identified Client 2 was independent in all areas of self-help skills including toileting, personal hygiene, hand	W 197

W 197	Continued From page 6 washing, bathing, applying lotion, oral hygiene, grooming, dressing/undressing, eating, being appropriate while eating, and mealtime activities. Client 2 was independent in areas of home living skills including dining, meal preparation, meal-time clean up, clothing care (washing, drying, and putting away items), and household care chores. The assessment identified the client needed minimal verbal prompting when utilizing the stove/oven or completing tasks such as vacuuming, mopping, emptying garbage, and cleaning windows/mirrors. The social developmental skills section of the assessment identified Client 2 enjoyed being around and socializing with others. Client 2 had skills to engage with other when socializing and human sexuality needs. The client was independent in all areas of safety skills, medication administration, and cognitive skills of money management, utilization of numbers (dates, social security numbers, etc.), time concepts, reading, writing, and identification of colors. Client 2 was independent in recreation/leisure, community integration, and shopping skills. The assessment identified Client 2's independent living skills needed to addresss teaching the client how to take responsibility for their aggressive behaviors and in appropriate social actions. d. Review of the "Transition Planning: Individual Risks, Protections, Supports and Services" (dated 12/19/19) identified Client 2 was capable of recognizing hazardous environments, independently ambulated and transferred in/out of vehicles, and independently completed all daily living skills. This assessment identified Client 2 required no direct occupational, physical,	W 197

W 197	Continued From page 7	W 197		

recreation, and/or specialty healthcare therapies. Client 2 was employed and paid by the facility for completing custodial jobs. Client 2 had two to one staffing (6:30am - 11:00pm and when off of the living unit) for training/safety needs, and for staff to be immediately available to provide needed redirection and intervention for behavioral risks. Client 2 had a BSP, safety plan, and crisis intervention plan to address the client's verbal and physical aggressions, property destruction, elopements, and suicidal and homicidal ideations/attempts. This document identified that these behavioral plans, "sometimes they are not successful in protecting me and others when I am aggressive."

e. Review of the "Nutritional Evaluation" (dated 12/17/19) identified Client 2 ate independently. Client 2 was able to express food preferences and dislikes. Client 2 preferred to and independently prepared their own meals. The client assisted with meal planning, food preparation, table setting and clearing. Client 2 was diagnosed with GERD (Gastroesophageal reflux disease).

f. Review of the "BSP Post Admission Report," (dated 12/19/19) identified that from 11/22/19 - 12/15/19 Client 2 had no incidents of property destruction, did not engage in suicidal and homicidal ideations, and no attempts to elope. This report identified that Client 2 was independent in daily living skills to be successful in community placement. The BSP was implemented to provide supports so that Client 2 would be able to manage their behaviors and mental health symptoms and decrease targeted aggressive behaviors.

W 197	Continued From page 8 g. Review of the "Evaluation and Management" (admission history and physical, dated 12/31/19) identified Client 2 was diagnosed with autism spectrum disorder (history of developmental disability), mood disorder, personality history, and GERD. The physician identified that Client 2 had a full scale IQ of 86. (This IQ diagnosis was identified in 7/29/15 comprehensive IQ evaluation assessment received as collateral documentation at the time of Client 2's admission.) h. Review of the "Annual Dental Examination" (dated 12/11/19) revealed that the dentist identified Client 2 was independent and had "Very good oral care. [Client 2] does floss. Periodontal health very good." i. Review of Client 2's "Admission Psychological Assessment" (dated 12/6/19) identified the following diagnoses: Autism spectrum disorder (by history and without intellectual impairment), generalized anxiety disorder, post-traumatic stress disorder, and paranoid personality disorder. The facility's Psychologist identified in this assessment that based on the cognitive and psychological testing results that Client 2 "would not and does not meet the criteria for an intellectual disability"; but due to the identified Autism spectrum disorder (by history) deemed Client 2 eligible for developmental disability services. j. Review of the documents completed by the facility's Psychiatrist titled "Evaluation and Management" (dated 12/19/19, 12/26/19, 1/9/2020, and 1/24/2020) revealed Client 2 was prescribed psychotropic medications Prazosin and	W 197

W 197	Continued From page 9 Quietiapine for behavior management. These documents identified Client 2's diagnoses to be Autism spectrum disorder (by history and without intellectual impairment), paranoid personality disorder, post-traumatic stress disorder, and generalized anxiety disorder. 3) Record review of General Event Reports (GERs) and associated documents identified Client 2's involvement in incidents of physical aggression to staff and law enforcement involvement. a. Review of a GER and Preliminary Event Review (PERs) revealed an incident occurred on 11/25/19 in which Client 2 was transferred to the Mental Health Crisis Center in Lincoln. According to the GER and PER, due to safety concerns, threats made to staff and Client 2's unwillingness to participate in medication changes or medication beyond their current regimen, the Clinical Services Administrator contacted the Nebraska State Patrol (NSP). Client 2 was determined to be a risk to themselves and others and the NSP initiated emergency protective custody and transported Client 2 to the Mental Health Crisis Center. b. Review of a GER and T-Logs (electronic communication log) revealed an incident occurred on 2/10/2020 in which Client 2 physically attacked staff. According to the GER and T-Log, a supervisor was delivering a message to Client 2 from nursing staff and the subject of law enforcement surfaced within the conversation. Client 2 shoved the supervisor and tried to break the supervisor's phone. Client 2 grasped the supervisor's throat and lunged forward, hitting the	W 197

W 197	Continued From page 10 supervisor with closed fists. Client 2 continued to aggress toward the supervisor, requiring three staff to physically intervene with Client 2's aggression. 4) Interviews with Client 2 and facility staff verified Client 2 was independent in or capable of demonstrating developmental and daily living skills and resided at the facility due to behavioral or mental health needs. a. During interviews on 2/3/2020 at 5:10pm (in the presence of Staff F and J) and 2/5/2020 at 7:18am (in the presence of Staff B and I) Client 2 confirmed that the facility was the fifth placement they had been in since May 2019. Client 2 identified they had to go to court because of an incident at one of the former service providers. Client 2 reported they were taken by law enforcement to a local crisis center after being admitted to the facility because they were being aggressive. Client 2 reported they were independent in cleaning their bedroom and the living unit, laundry tasks, showering/bathing, personal hygiene, shaving, eating, drinking, tooth brushing and flossing, dressing, and grooming. Client 2 reported they earned pay for janitorial work and were able to independently utilize money/debit card to purchase personal items. Client 2 identified they were able to communicate verbally, in writing, and on the phone with facility staff, their attorney, guardian, and other politicians. Client 2 verified they had written a book in 2015 about being autistic.	W 197

W 197	Continued From page 11	W 197		

Client 2 confirmed they were independent in meal preparations, cooking, serving, and clean-up after the meal. Client 2 reported being able to follow recipes and menus provided by the facility. Client 2 verified they know how to use the microwave, toaster, stove, and oven.

Client 2 reported they planned their recreation and leisure time and didn't like staff telling them what to do. Client 2 liked to go the facility's gym to play basketball and lift weights, play video games against staff, watch television, play cards, call family members, complete personal errands, and/or hang out on the living unit.

Client 2 verified they had training programs for behaviors and medication administration programs. Client 2 revealed their medication program was to check off the electronic medication sheet. Client 2 admitted to refusing to participate in the program because the client already knew how to take their medications. According to Client 2 they could independently take their medications and knew the names of medications, dosage, the rationale for use, times, and how to take the medications.

b. Interview with Staff F on 2/4/2020 at 4:52 pm and 2/5/2020 at 3:20pm, confirmed Client 2 was independent and did an excellent job with completing personal hygiene, grooming, showering, toileting, dressing/undressing, brush and floss teeth, shaving, and eating/drinking. Staff F added that Client 2 would shower up to three times per day because the client cared about their appearance. Client 2 independently used an electric razor to shave their head daily. Client 2 was capable of doing all steps to preparing and

W 197	Continued From page 12 cooking their meals independently, but did occasionally ask for staff assistance with the stove/oven. Client 2 was capable of doing janitorial work independently and wanted to get a job in the community doing such. Client 2 completed medication administration and knew their meds, but wanted staff to deliver and provide Client 2 their medications. Client 2 could communicate their wants and needs verbally and in writing. Staff F verified they had read a 400 page book that Client 2 authored and published. Staff F verified that Client 2 had behavior support plans to address verbal and physical aggression, elopement, and suicidal thoughts. According to Staff F, Client 2 had a hard time controlling their anger and rage which caused the client to yell and scream, get in staffs face, use lots of curse words, threaten to harm staff and property, and elope. Staff F reported that Client 2 repeatedly stated they wanted a reason to sue the facility for 2.1 million dollars as Client 2 had tried to sue the State of Nebraska Corrections Department. According to Staff F, Client 2 tried to bait staff into arguments by using verbal aggression and threats so the client could get a reaction from staff and a reason for Client 2 to become violent. Staff F revealed during incidents of aggression Client 2 would repeatedly talk about being in prison for four years and that Client 2 knew how beat up staff. Staff F did not know why Client 2 was at the facility, except the client was provided structure. Staff F identified that Client 2 was not like some of the other clients that needed assistance with their daily living skills. c. Interview with Staff I on 2/6/2020 at 10:13am confirmed Client 2 was at the facility instead of jail	W 197

W 197	Continued From page 13 or the regional center. Staff I verified Client 2 was independent in showering, toileting, personal hygiene, dressing/undressing, brushing teeth, grooming/shaving, eating, and drinking. Client 2 had skills to complete steps for meal preparation, cooking, serving, eating, and completing clean-up. Staff I identified Client 2 independently made their own oatmeal and coffee each morning and got their own snacks and drinks. Client 2 communicated independently verbally and in writing. Client 2 wrote several letters per week to various providers, politicians, judges, and the facility. Staff I verified Client 2 had programs addressing medication administration and behavior and safety plans. According to Staff I, Client 2 knew their medications, why they were prescribed, could independently take them, and how document on the facility's electronic MAR (medication administration record). Staff I reported Client 2 was at the facility for their anger management issues. According to Staff I, Client 2 yelled, screamed, threatened harm, made insulting remarks, got face to face with staff and screamed, and was physically aggressive toward staff. Client 2's behaviors were unpredictable and aggressive. Staff I reported they believed based on Client 2's behaviors and skills that the client had more mental health needs than developmental disability needs. d. Interview with Staff A on 2/6/2020 at 11:38am, identified Client 2 was at the facility due to behavioral problems in community based services which resulted in Client 2 being in legal trouble. Staff A confirmed Client 2 was independent with skills for showering, toileting, personal hygiene, dressing/undressing, brushing teeth,	W 197

W 197	Continued From page 14 grooming/shaving, eating, drinking, and taking their medications. Client 2 was able to cook independently with a few staff prompts. Client 2 was able to speak their mind and communicate verbally and in writing. Staff A identified that Client 2 had programs for medication administration, money management, and behavior and safety plans. However, Client 2 refused to participate in the medication program and told staff it was their job to get the client's medications and complete the documentation. Staff A verified Client 2 knew their medications and how to take them. Staff A confirmed Client 2 was verbally aggressive, destroyed property, physically aggressive, and eloped one time from the facility but not off of the campus. Staff A reported Client 2 displayed verbal aggression and threatened staff daily. Client 2 would posture and get nose to nose with staff while screaming and using profanity. Client 2 punched walls, and threw chairs/furniture and items from tables. Staff A verified that Client 2 was sent to a local crisis center due their aggressions and for evaluation a couple of days after being admitted to the facility. When asked what active treatment skills were being taught to Client 2, Staff A replied that Client 2 was not being taught active treatment skills. Staff A reported Client 2 did not belong at the facility, as the client did not need the facility's help for skill acquisition of basic daily living skills. According to Staff A, the facility did not have the supports to meet Client 2's specific behavioral or mental health needs. e. Interview with Staff B on 2/6/2020 at 12:51pm, confirmed Client 2 had programs to address bedroom maintenance/cleaning, medication administration, money management, and	W 197

behavior/safety plans to address the clients verbal and physical aggressions. Staff B verified Client 2 did very well with cleaning and room maintenance, knew how to take their medications, and how to use money. Staff B confirmed Client 2 was independent in laundry tasks, eating, drinking, toileting, showering, dressing/undressing, gave themselves haircuts, shaving, and tooth brushing/flossing. Client 2 had meal preparation skills, cooked well, used the stove/oven and microwave. But Client 2 acted like they couldn't cook so that staff would cook for the client. Staff B verified Client 2 cooked their own breakfast and lunch each day. Staff B verified that Client 2's behavior/safety plans were to address Client 2's verbal (screaming and yelling) and physical aggression, threatening harm to others/staff, getting face to face with staff and posturing, belittling, property destruction (flipping tables and throwing objects) and inappropriate social skills (cursing and eloping). Staff B reported Client 2 knew right from wrong and had no remorse for their behaviors. According to Staff B, Client 2 refused facility supports and teaching of new skills to deal with their anger management and behaviors. Staff B stated, "We can't teach if he won't accept our help." Staff B reported they did not know what else the facility could do to help address Client 2's aggressive behaviors and mental health needs. Staff B identified that Client 2 would benefit from supports or treatment at another facility better equipped to meet Client 2's aggressive and mental health needs.

f. Interview with Client 2's Qualified Intellectual Disabilities Professional (QIDP-B) on 2/10/2020 at 1:17pm, confirmed Client 2's ISP included: (a)

W 197	Continued From page 16 maintenance programs for medication administration, money management, and bedroom cleaning' and (b) six programs to address Client 2's social communication, verbal aggression, physical aggression, property destruction, and suicidal and homicidal ideations. QIDP-B verified Client 2 was independent in grooming/shaving, tooth brushing/oral cares, shower/bathing, toileting, dressing/undressing, eating/drinking, communicating wants and needs, and basic meal preparations skills. QIDP-B reported Client 2 was not confident using the stove and needed minimal verbal prompting when doing meal preparations. Staff also provided prompting to Client 2 to complete clean up tasks after meals as Client 2 usually refused. QIDP-B reported Client 2 was very independent and capable of completing day to day living activities and tasks. QIDP-B confirmed that Client 2 did not have an intellectual disabilities diagnosis, however, the clients Autism diagnosis qualified them for services. The facility was the fifth placement for Client 2 since being approved in May 2019 for developmental disabilities services. Currently Client 2 was involved in a court case regarding a behavioral/assaultive incident toward a staff and their vehicle at the previous community based provider where Client 2 received services. When asked why Client 2 was receiving services at the ICF/ID facility, QIDP-B replied that Client 2 needed help with their mental health, aggressions, and the facility provided a more structured environment. QIDP-B verified that Client 2 received mental health services and 1:1 therapies with a facility psychologist. QIDP-B identified that Client 2 and	W 197

W 197	Continued From page 17 their guardian refused medication changes for mental health stabilization and treatment as recommended by the facility's physicians. Additionally, Client 2 was not open to learning new coping mechanisms to address their aggressions. According to QIDP-B, if Client 2 could get their mental health and aggression stabilized they could have an independent life in the community. When asked if Client 2 belonged and was in need of ICF/ID level care, QIDP-B replied "No." B. Client 3 1) Observations on 2/3/2020 (5:00pm-6:00pm), 2/4/2020 (11:30am-11:50am), 2/5/2020 (8:13am-8:15am and 9:03am-9:45am), 2/6/2020 (1:00pm-1:45pm) and 2/7/2020 (7:45am - 8:20am) revealed Client 3 to actively and independently participate in their environment requiring little to no staff interventions related to daily living and developmental skills. Observations identified Client 3: a. Verbally communicated clearly and effectively with direct support staff, peers and the surveyor. b. Possessed the basic developmental skills (eating/drinking, toileting, dressing, grooming/hygiene) needed for i independence and privacy. c. Used leisure time appropriately d. Independently made coffee, set the table, cleaned kitchen areas, and loaded the dishwasher e. Used a microwave to reheat food and read/interpreted food preparation directions f. Was able to read, identify numbers and possessed rudimentary writing skills g. Accurately conversed on current events with	W 197

W 197	Continued From page 18 direct support staff, peers and the surveyor h. Possessed rudimentary computer skills i. Wore a watch and accurately identified the time Observations identified the facility provided Client 3 with supervision levels ranging from constant visual supervision to staff positioned directly at Client 3's side due to the potential for behaviors. 2) Review of Client 3's records identified Client 3 as independent or capable of demonstrating developmental and daily living skills, with the focus of facility's services directed at behavioral or mental health needs. Specifically: a. Review of Client 3's Individual Support Plan (ISP) dated 6/27/19 identified Client 3: - As an effective verbal communicator who communicated wants, needs and thoughts using long complex grammatically correct statements. - To possess strengths/abilities in several areas of independent living skills. Client 3 independently used the restroom in familiar areas and was capable of demonstrating many independent living skills. - As able to withdraw, secure, carry and spend small amounts of money. - Completed custodial, recycling and vehicle detailing work, earning $305.90 over the last 30 days. - Had three skill training programs: to document	W 197

W 197	Continued From page 20 occupational therapy. d. Client 3's Psychological Assessment dated 6/18/19 identified the following diagnoses: Mild Intellectual Disabilities, Neurodevelopmental Disorder associated with prenatal alcohol exposure, Posttraumatic Stress Disorder and Conduct Disorder, Unspecified Onset, callous/lack of empathy type. e. Client 3's 5/28/19 MHBCIP outlined a plan to address Client 3's "target program behaviors" of physical and verbal aggression, self-injurious behaviors and suicidal/homicidal precautions. Behaviors included physical violence in various forms, along with the use of sharp or blunt objects to harm others. The plan also included the use of physical restraint as needed. f. Client 3's 12/16/19 Individualized Safety Plan addressed safety concerns related to behaviors of physical and verbal aggression, self-injurious behaviors and suicidal/homicidal ideation. The safety plan outlined supervision levels based on the occurrence of behaviors and identified the following restrictions: - Increased staff ratios for off campus activities - Use of vehicle safety locks and devices to prevent removal of seat belts during transportation - Restricted access to sharps (knives, scissor, razors, or any items easily converted to a weapon) - On-person and area searches related to access to sharps - Limited and supervised access to phone calls and computers. W 197	Continued From page 21 g. Client 3's record included a 5/24/19 letter from the facility administrator to an attorney regarding Client 3's arrest and pending charges. The letter identified Client 3 had been at the facility's Crisis Stabilization Unit (CSU) from 10/31/19-4/1/19 and could be readmitted to the facility on 5/28/19. The facility's letter described the services provided as "treatment and habilitative care in the CSU, which has been designed to provide behavioral, psychiatric and medical interventions to Nebraskanswho have been determined to be developmentally disabled and who, by reason of mental health crisis, drug abuse, or other circumstances are struggling in their community placements." h. Client 3's record included a 9/20/19 Order of Probation resulting from Client 3's conviction of Assault in the Third Degree, a Class I Misdemeanor committed on or about 5/12/19. Further review of the document identified Client 3 was to complete a probation period of 12 months. One of the conditions of this probation was for Client 3 to "follow all programming terms at Beatrice Statement Developmental Center." The facility licensed and certified as 400 State Building operates the CSU and is located at Beatrice State Developmental Center. 3) Interviews with Client 3 and facility staff confirmed Client 3 as independent in or capable of demonstrating developmental and daily living skills and resided at the facility due to behavioral or mental health needs. Specifically: a) Client 3 (interviewed 2/11/2020 at 11:10am in	W 197

W 197	Continued From page 22 the presence of Staff N) confirmed they had been in jail prior to returning to the facility. Client 3 stated they were sent to the facility to do their probation as they "attacked someone" by punching them in the face. Client 3 reported it was a staff person they punched while living in a group home operated by a community provider. Client 3 reported they were independent in eating/drinking, communication, using the bathroom, dressing and grooming. According to Client 3, they knew how to shower and take care of their dentures, but often choose not to complete the tasks as they were "tired" or "not in the mood". Client 3 reported they could make their own meals in the microwave or crock pot and was learning to cook on a stove top. Client 3 reported they took Risperdal and Depakote stating these were the medications they "needed the most" as these medications were for behaviors. According to Client 3, they saw a facility psychologist one time per week to learn how to talk about and express feelings and emotions. Client 3 reported they could get rather upset and "go overboard" in how they reacted. Client 3 confirmed training programs were in place for their behaviors, hygiene, medication administration and money skills. According to Client 3, they had already learned how to take their medication and documented the taking of the medication in their MAR. Client 3 stated they knew how to do all the things listed in the hygiene program and the program was a checklist to make sure hygiene tasks were completed. Client 3 reported they could do most to of the tasks in the	W 197

W 197	Continued From page 23 money program and had a program to help with behaviors. Client 3 reported they were to remain at the facility until they completed their probation at which time their interdisciplinary team would see if they could find an "EFH" (extended family home) that would take Client 3. b) Interview with Staff N (on 2/5/2020 at 9:10pm during an observation of Client 3 cleaning at Bear Creek) confirmed Client 3 required little to no assistance to complete the custodial tasks. Staff N stated their presence was due to Client 3's required supervision levels and to redirect Client 3 should Client 3 rush through the task and miss a step in the cleaning process. c) Interview with Staff I (on 2/6/2020 at 11:05am) confirmed Client 3 was independent in eating/drinking, communication, toileting, dressing, and denture care. According to Staff I, Client 3 would lie about taking a shower, but knew how to shower and possessed grooming/hygiene skills. Staff I reported Client 3's readmission to the facility was due to behaviors that resulted in jail. Staff I reported Client 3's behaviors were anger based and lead to physical aggression. d) Interview with Staff H (on 2/10/2020 at 12:30pm) confirmed Client 3 readmission to the facility due to anger issues, particularly directed at women. Staff H reported Client 3 was ordered to complete their probation at the facility. According to Staff H, Client 3 was independent in eating/drinking, communication, toileting, dressing, denture care and grooming/hygiene.	W 197

Staff H reported Client 3 does not always shower, but had the skills to do so. Staff H reported Client 3 completes both their medication and money programs without staff assistance. Staff H stated Client 3 had a BSP as Client 3's behaviors all came from anger.

e) Interview with Staff G (on 2/11/2020 at 11:59am) confirmed Client 3 was at the facility instead of jail. According to Staff G, Client 3's needs were related to anger issues, primarily physical aggression and verbal threats. Staff G (a female staff) confirmed they had been "attacked" by Client 3 and Client 3 targets women when angry. Staff G reported Client 3 is at the facility to work on anger management, coping skills, medication administration and money skills. Staff G confirmed Client 3 was independent in eating/drinking, communication, bathing/showering, dressing, denture care and groom/hygiene, but would refuse to complete denture care or lie regarding the completion of showers.

f) Interview with Client 3's Qualified Intellectual Disabilities Professional (QIDP), on 2/10/2020 at 2:15pm, confirmed Client 3's ISP included: a BSP with multiple goals specific to target behaviors, a medication administration program in which Client 3 was maintaining progress, a grooming program designed as a task analysis to assess completion of skills and a money program for which Client 3 needed assistance to keep a ledger.

The QIDP confirmed Client 3 was independent in eating/drinking, communication, toileting, dressing and denture care. The QIDP reported Client 3

W 197	Continued From page 25 needed supervision to ensure they completed grooming and hygiene tasks and would lie about showering. According to Client 3's QIDP, Client 3 returned to the facility as they were in jail, having been arrested after attacking a staff person at their community based group home. The QIDP stated Client 3's probation continued through October 2020 and was to take place at the facility. The QIDP stated Client 3 had behavioral and mental health needs which required higher levels of staff supervision. Interview with the facility Administrator on 2/11/2020 at 1:30pm confirmed: 1) Client 2 was admitted to the facility as an emergency placement due to Client 2's aggression in a community based program. The Administrator identified that Client 2 required a structured environment and enhanced supervision (2:1) to address Client 2's aggressive behaviors and mental health needs. According to the Administrator, Client 2 was independent in their daily living skills, medication administration, and required little to no staff intervention for cooking and personal shopping. The Administrator verified that Client 2's plan at the facility's "Crisis Stabilization Unit" (CSU) was established to address Client 2's socially inappropriate behaviors and communications, mental health needs, and medication oversight. 2) Client 3 was readmitted to the facility based on an emergency situation. This readmission occurred after Client 3's arrest and jailing for	W 197

W 249	Continued From page 27 This STANDARD is not met as evidenced by: Based on observations, interviews and record review, the facility failed to ensure mealtime programs were implemented as outlined in the Individual Support Plan (ISP) for 1 of 2 clients in the sample. This failure had the potential to affect all clients residing at the facility. Facility census was 18 at the time of the survey. FINDINGS: Review of Client 1's ISP, dated 11/12/2019, revealed it included a program which focused on using a napkin to wipe Client 1's face during meal or snack time when eating or drinking. The training program specified the frequency for implementation "should occur at every given opportunity as appropriate." Observations identified staff did not implement "Dining Etiquette" ISP program, dated 11/27/2019 during 3 of 4 meals. Observation on 2/3/2020 from 5:19pm - 5:46pm identified Staff C did not offer a napkin or prompt Client 1 to wipe Client 1's face during or after the meal. Observation on 2/4/2020 from 12:33pm - 1:00pm identified Staff D did not offer a napkin or prompt Client 1 to wipe Client 1's face during or after the meal. Observation on 2/5/2020 from 11:55am - 12:54pm identified Staff E and Staff D did not offer a napkin	W 249

DEPT. OF HEALTH AND HUMAN SERVICES

Pete Ricketts, Governor

February 26, 2020

Dawn Urbaschek
400 State Building
3104, 3070, 3071 State Ave
Beatrice, NE 68310

Dear Ms. Urbaschek:

IMPORTANT NOTICE – PLEASE READ CAREFULLY

On February 3 - 11, 2020, DHHS representatives conducted surveys to determine whether your facility was in compliance with Federal Condition of Participation requirements, State Licensure regulations, and Life Safety Code Requirements for Critical Access Hospitals. Enclosed you will find the CMS-2567's documenting the results of that survey. All references to regulatory requirements contained in this letter are found in Title 42, Code of Federal Regulations and 175 NAC Chapter 17 Regulations Governing **Licensure of Intermediate Care Facilities for Individuals with Intellectual Disabilities.**

PLAN OF CORRECTION (POC)

A POC for each deficiency cited must be submitted to DHHS.AcuteCareFacilities@nebraska.gov NO LATER THAN 10 calendar days after receipt of the CMS-2567's. Failure to submit an acceptable POC timely may result in the imposition of Disciplinary Action.

An acceptable POC must include:

- **The plan of correcting the specific deficiency. The plan should address the processes that lead to the deficiencies cited;**
- **The procedure for implementing the acceptable plan of correction for the specific deficiency cited;**
- **The monitoring procedure to ensure that the plan of correction is effective and that specific deficiency cited remains corrected and/or in compliance with the regulatory requirements;**
- **The title of the person responsible for implementing the acceptable plan of correction;**
- **PROVIDE THE DATE WHEN CORRECTION ACTION WILL BE COMPLETED.** Correction dates should be no later than forty-five calendar days from the exit date of the survey or **March 27, 2020.**

NOTE: Remember to attach copies of any auditing tools; education; revised or new policies/processes.

SIGNATURE ON FIRST PAGE OF THE 2567's: The first page must be signed by the provider/supplier representative and faxed to [redacted]

We will notify you whether your plan of correction is or is not acceptable via email. Subsequently, if your plan of correction is not accepted, you must submit an addendum to your plan of correction within ten (10) calendar days of the notification.

We thank you and your staff for your cooperation and assistance during the survey. If you have any questions regarding this correspondence, please contact this office.

Sincerely,

Mark Luger - Program Manager II

W197	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY - ALONG WITH A DESCRIPTION OF HOW THE ACTION WILL CORRECT OR IMPROVE THE PROCESSES THAT LEAD TO THE CITED DEFICIENCY:**	
	For Client 5: During a recent Public Health survey on 8/27/20, it revealed that Client 5 actively and independently participates in their environment requiring little to no staff inteventions related to daily living and developmental skills. Observations identified Client 5 verbally communicated clearly and effectively with direct support staff and the surveyor, possessed basic developmental skills (eating/drinking, dressing, toileting, grooming/hygiene) needed for independence and privacy; used leisure time appropriately; independently set the table; retrieving items from the cupboard; used a microwave to reheat food and put items in the dishwasher; was able to read and identify numbers and accurately conversed on current events with direct support staff.	10/15/2020
	Review of Client 5's records identified Client 5 as independent or capable of demonstrating developmental and daily living skills with the focus of the facility's services directed at behavioral or mental health needs. Review of Client 5's Individual Support Plan (ISP) dated 2/21/20 identified Client 5 as an effective verbal communicator and expressed wants and needs using long complex utterances; receptive and linguistic language skill, as well as cognitive linguistic skills, all fall within normal limits based on informal assessment; possessed strengths/abilities in all areas of independent living skills; independently utilized the restroom in familiar areas, washed hands, bathed and ate/drank; capable of demonstrating other independent living skills, occassionally needing verbal reminders to ensure completion or thoroughness; able to make small puchases, make change, identify coins/bills and made $150.92 in the past 30 days.	10/15/2020
	Client 5's records included a 5/2/2020 assessment by a psychiatrist, stating Client 5 "does not meet eligibility for the Nebraska Developmental Waiver due to not having a developmental disability as defined by Nebraska Statute". This is based on the fact there is no evidence of a developmental disability present before the age of 22. The Facility Administrator met with the ICF/DD Manager, informed of the outcome of Level of Care Review and instructed to begin the referral process to community based services.	10/15/2020

	Initiating in accordance to W Tags, the Beatrice State Developmental Center (BSDC) Administration met with Service Coordination, Community Based Services and Behavioral Health to discuss options for Client 5 to find and secure alternative, less restrictive living arrangements on 9/4/2020. Once identified, a 60 day transition period will begin with a tentative discharge date of November 2, 2020.	10/15/2020
	For all indivdiuals residing in the State Building ICF, the Comprehensive Functional Assessment (CFA) has been reviewed to determine specific developmental deficits requiring active treatment essential for privacy and independence (including, but not limited to: toileting, personal hygiene, dental hygiene, eating, bathing, dressing, grooming, and communication of basic needs). Should any review indicate that an individual did not meet the requirement for the provision of active treatment, findings were submitted to the Facility Administrator. Facility Administrator discussed with Director, Deputy Director of Developmental Disabilities and any others applicable to the situations to develop plans for referral out of BSDC. Information was shared with the ICF Administrator, QDDP and Service Coordinator.	10/15/2020
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
	Client 5's records included a 5/2/2020 assessment by a psychiatrist, stating Client 5 "does not meet eligibility for the Nebraska Developmental Waiver due to not having a developmental disability as defined by Nebraska Statute". This is based on the fact there is no evidence of a developmental disability present before the age of 22. The Facility Administrator met with the ICF/DD Manager, informed of the outcome of Level of Care Review and instructed to begin the referral process to community based services.	10/15/2020

Client 5's 1/21/20 Mental Health/Behavior Crisis Intervention Plan (MHBCIP) outlined a plan to address Client 5's "target problem behaviors" of Lying, Inappropriate verbal/gestural behavior, Physical aggression, Elopement, Stealing, Self-injurious behaviors and Suicidal/homicidal ideations. The plan also included the use of physical restraint as needed. f. Client 5's 7/29/2020 Individualized Safety Plan addressed safety concerns related to behaviors of lying, stealing, elopement, inappropriate verbal and gestural behaviors, physical and verbal aggression, self-injurious behaviors and suicidal/homicidal ideation. The safety plan outlined supervision levels based on the occurrence of behaviors and identified the following restrictions: - Increased staff ratios for various activities - Use of vehicle safety locks and devices to prevent removal of seat belts during transportation - Restricted access to sharps (knives, scissor, razors, or any items easily converted to a weapon) -Restricted access to fire starting materials - On-person and area searches - Limited and supervised access to phone calls and computers. g. Client 5's records included a 5/2/2020 assessment by a psychiatrist, stating Client 5 "does not meet eligibility for the Nebraska Developmental Waiver due to not having a	{W 197}

{W 197}	Continued From page 4 developmental disability as defined by Nebraska Statue. This is based on the fact there is no evidence of a developmental disability present before the age of 22 ..." 3) Interviews with Client 5 and facility staff confirmed Client 5 as independent in or capable of demonstrating developmental and daily living skills and/or did not need to be at the facility. Specifically: a) Client 5 (interviewed 8/31/2020 at 11:10am in the presence of Staff O) confirmed they were independent in eating/drinking, communication, dressing and grooming. According to Client 5, staff were helping Client 5 in learning to cooking and on working skills. Client 5 stated they did not need to be at the facility and wanted to move to Omaha. Client 5 reported they needed to find an apartment and contact "the Omaha Housing Authority." Client 5 also stated they need to "look into Section 8 and sign up for food stamps". b) Interview with Staff N (on 8/31/2020 at 10:30am) confirmed Client 5 required no assistance to complete their vacuuming job. Staff N stated Client 5 was independent in preparing and eating their packed lunch. Staff N reported that when starting to work with Client 5 approximately 2 weeks ago, it was Client 5 who showed Staff N how to complete Client 5's auto detailing job. c) Interview with Staff L (on 8/27/2020 at 4:23pm) confirmed Client 5 had the skills to complete all self-care needs and Client 5 put a lot of importance on their appearance. Staff L reported	{W 197}

{W 197}	Continued From page 5 Client 5 was very "manipulative and clever" and behaviors and safety concerns were the reasons Client 5 was at the facility. d) Interview with Client 5's Qualified Intellectual Disabilities Professional (QIDP) C on 8/31/2020 at 12;15pm, confirmed Client 5's ISP included: a BSP with multiple goals specific to target behaviors and skill training program for: medication administration, arriving on schedule, increasing work time, measurement of portion sizes and caloric intake and meal preparation. QIDP C confirmed Client 5 was independent in eating/drinking, communication, toileting, dressing, oral hygiene and grooming. QIDP C reported Client 5 sometimes needed supervision to ensure they completed these skills. QIDP C stated, based on the regulatory requirement for active treatment, they "did not think" Client 5 needed to be at the facility. e) Interview with the facility Administrator on 8/31/2020 at 1:00pm confirmed the facility had received an assessment from a psychiatrist stating that Client 5 did not meet eligibility requirements for services through the State of Nebraska Department of Developmental Disabilities. (A copy of this assessment was obtained from the facility and referenced above.) According to the Administrator, based on this assessment, Client 5 would not remain at the facility. The Administrator confirmed a meeting was scheduled on 9/4/2020 and parties within the State of Nebraska Department of Health and Human Services were to discuss options for Client 5 and how the facility would transition	{W 197}

NEBRASKA

Good Life. Great Mission.

DEPT. OF HEALTH AND HUMAN SERVICES

Pete Ricketts, Governor

September 3, 2020

Dawn Urbaschek, Administrator
400 State Building
3104, 3070, 3071 State Ave
Beatrice, NE 68310

Dear Ms. Urbaschek:

On August 27-31, 2020, DHHS representatives conducted an onsite revisit to verify that your facility had achieved and maintained compliance with the deficiencies cited during a survey conducted on 2/11/2020. During the revisit survey, the original cited deficiency W-0249 was found to be in compliance, however, the facility was found to be out of compliance with W-0197 and was cited as you will see on the enclosed CMS-2567.

PLAN OF CORRECTION (POC)

A POC for each deficiency cited must be submitted to DHHS.DDBHFacilities@nebraska.gov **NO LATER THAN 10 calendar days** after receipt of the CMS-2567. Failure to submit an acceptable POC timely may result in the imposition of Disciplinary Action.

An acceptable POC must include:

- The plan of correcting the specific deficiency. The plan should address the processes that lead to the deficiency cited;
- The procedure for implementing the acceptable plan of correction for the specific deficiency cited;
- The monitoring procedure to ensure that the plan of correction is effective and that specific deficiency cited remains corrected and/or in compliance with the regulatory requirements;
- The title of the person responsible for implementing the acceptable plan of correction;
- **PROVIDE THE DATE WHEN CORRECTION ACTION WILL BE COMPLETED.** Correction dates should be no later than forty-five calendar days from the exit date of the survey or October 15, 2020.

NOTE: Remember to attach copies of any auditing tools; education; revised or new policies/procedures.

SIGNATURE ON FIRST PAGE OF THE 2567's: The first page must be signed by the facility Administrator or representative.

We will notify you whether your plan of correction is or is not acceptable via email.

We thank you and your staff for your cooperation and assistance during the survey. If you have any questions regarding this correspondence, please contact this office.

Sincerely,

Mark Luger

Hello Jerall,

Please find below the responses to your email earlier this month:

A. Facility Staffing Levels as of December 31, 2020:

1. The number of positions filled as of December 31, 2020: **88 Long-term / 27 Crisis**
2. The number of positions vacant as of December 31, 2020: **32 Long-term / 8 Crisis**
3. The number of positions needed in your HR staffing plan for FY21: **Approximately 138**
4. The number of positions filled in your HR staffing plan for FY21 as of December 31, 2020: **115**
5. The aggregate turnover rate for the period of 12/2019 - 12/31/2020: **8.4% Long-term / 14.8% Crisis**
6. The number of vacant positions as of December 31, 2020 – **same #2**

B. The number of assaults on staff for calendar year 2020 - See attachment

C. Please provide a copy of the most recent inspections or audit reports for calendar year 2020. To include, but not limited to reports from the Fire Marshal's office, DHHS inspections, internal safety, emergency inspections, independent standards audits, Licenses, etc. – See attachments

If you have any further questions please don't hesitate to reach out.

Thank you,

Sarah

D/L	1/21/2020	1130 Hrs.	Home Manager Crisis	406 State	Staff was assisting with a behavior. Individual escalated and exhibited physical aggression and property destruction. Staff was blocking and redirecting so the individual did not harm himself, others or additional property. The individual punched staff in the stomach.	Be mindful of body positioning. Review de-escalation and verbal communication techniques to continue to try.	Minor Clinic / Hospital	M
D/L	1/24/2020	1745 Hrs.	DT Crisis	406 State	Individual was having a behavior. Staff was attempting to stay visual with the individual when the individual spit in staff's face. Individual then swung at staff scratching staff's face in 3 places. Individual also bit staff's left elbow.	Better body positioning and blocking.	Emergency Room	M
D/L	1/24/2020	1715 Hrs.	DT Crisis	406 State	Individual was having an escalated behavior. Individual attacked staff. Staff attempted to redirect individual when individual lowered himself to the floor. Individual continued to attack staff so staff attempted to limit individual's extremities when individual bit the top of staff's right hand.	Better body positioning and blocking.	Emergency Room	M
D/L	2/2/2020	1745 Hrs.	DT Crisis	406 State Ind. Bedroom	Escalated individual became physically aggressive toward staff. Staff placed individual in a physical hold. Individual got a hand free and squeezed and twisted staff's right arm and shoulder.	Attempt further de-escalation techniques.	Emergency Room	M
D/L	2/2/2020	1745 Hrs.	DT Crisis	406 State Ind. Bedroom	Individual was escalated. He was placed in a physical hold. Individual dropped to the floor and his knee landed hard on staff's left hand.	Use better body mechanics	Emergency Room	M

D/L	2/2/2020	1730 Hrs.	DTSS Crisis	406 State Ind. Bedroom	Individual was escalated. Individual attacked staff grabbing staff's face and arms. Individual than pulled staff to the floor injuring staff's knees, right upper arm, left forearm, left side and hand and left forehead.	Use better body mechanics	Emergency Room	M
D/L	2/2/2020	1745 Hrs.	DT Crisis	406 State Ind. Bedroom	While individual was in crisis, staff attempted a side body hug. Individual was very combative and pulled staff down to the floor. Staff fell and hit her left knee with the weight of four (4) people on her knee.	Use better body mechanics	No Medical Treatment	M
D/L	2/9/2020	0730 Hrs.	DT Crisis	406 State	Staff was dealing with a behavior on 406 State when he received multiple scratches / bites including red drainage and abrasions (discolorations) on his left forearm and hand / right tricep, forearm and hand.	Better redirection and body blocking.	Emergency Room	M
D/L	2/10/2020	1415 Hrs.	DT Crisis	406 State Safe Room	Individual was in behavior. Individual was sitting on the floor when he kicked staff in the back of her right knee.	Better body positioning.	No Medical Treatment	M
D/L	2/12/2020	1230 Hrs.	DT Crisis	"D" Building Safe Room	Individual was in behavior. Individual was kicking, hitting and spitting at staff. Individual lowered herself to the floor and continued hitting and kicking. Individual kicked staff's left ribs.	Better redirection and body blocking.	Emergency Room	F
D/L	2/18/2020	1030 Hrs.	ATP Manager	"D" Building Safe Room	Individual was attempting to leave the safe area. Staff stepped in front of individual to body block her from leaving. Individual kicked staff in the left knee.	Staff followed the individuals' safety plan. Staff should be aware of their surroundings and be aware that the individual will kick.	No Medical Treatment	F
D/L	2/18/2020	1027 Hrs.	DT Crisis	"D" Building Safe Room	Individual was aggressive toward staff. Staff attempted to intervene, limiting individual's extremities. Individual kneed staff 4-5 times in the lower back and scratched staff's right hand.	I would suggest that staff utilize de-escalation techniques that don't involve physical interaction with supported individuals.	Minor Clinic / Hospital	F
D/L	2/21/2020	2230 Hrs.	DTSS Crisis	3104 State 1ST Floor Near Entry Door	Individual eloped from 404 State. Staff attempted to body block and cue individual to return to the home. Individual became physically aggressive, punched staff repeatedly in the face, left side jaw and choked. Staff attempted to block and apply physical hold when her right arm hit against the wall and floor.	No information provided.	Emergency Room	M
D/L	2/21/2020	2250 Hrs.	DT Crisis	3104 State 404	Individual started assaulting DTSS. Staff joined in putting individual in a hold. Staff and the individual fell, staff landed on her back, shoulder and left knee. Individual fell on top of staff landing on her right rib and shoulder area.	No information provided.	No Medical Treatment	M

D/L	3/10/2020	1530 Hrs.	DT 311 Lake	Chapel	Staff was attempting to redirect individual due to individual was hitting herself. While staff was holding individual's hand to stop her from hitting herself, individual bit staff's right hand.	Staff should be more attentive when individual is manic.	No Medical Treatment	F
D/L	3/10/2020	1700 Hrs.	DT Crisis	3104 State "F" Bldg. 1st Floor Hallway	Individual was in crisis behavior when he hit staff twice and attempted to bite. Another staff escorted individual backwards when he lunged forward and bit staff on her upper right arm above the elbow. Individual also punched staff in the right side of the head and right shoulder area twice.	Staff followed plans, prompted coping skills and used proper body positioning. Several staff involved. Attempt a hold potentially due to area was limited.	No Medical Treatment	M
D/L	3/10/2020	1720 Hrs.	QDDP Crisis	3104 State "F" Bldg. 1st Floor Hallway	Staff was on the first floor of "F" building talking to staff and going to clock-out. Staff was standing next to the wall when an individual was being escorted through the hallway. Individual stopped and punched staff between the eyes / forehead. Staff's head jerked back and hit the wall as well.	Maintain body positioning / space between individual and staff. It was unknown that individual was there when staff came downstairs. Staff escorting need to position themselves between individual and others.	No Medical Treatment	M
D/L	3/13/2020	0745 Hrs.	DT Crisis	3104 State 402 State	While individual was in a behavior, she bit staff's right arm above the wrist.	Staff is not seeking to go see doctor at this time.	No Medical Treatment	F
D/L	3/15/2020	2030 Hrs.	DTSS Crisis	3104 State 406 State	Individual attacked staff and then grabbed staff's hoodie and dropped himself to the ground taking staff with him injuring staff's lower back area.	More efficient body blocking and redirection.	No Medical Treatment	M
D/L	3/20/2020	2040 Hrs.	DTSS SOLAR	3056 PETERSON	Staff was assisting with a behavior that an individual was having on 3056 Peterson. While this staff was supporting the individual, she kicked staff directly in the right knee.	More staffing to help deal with major behaviors.	No Medical Treatment	F
D.L.	3/31/2020	2010 Hrs.	DT Crisis	3104 State 408 State	Individual wanted a big glass to drink out of but due to his safety plan individual is only allowed 1 - 8oz. and 1 - 14 oz. Individual had behavior, staff intervened and got her right wrist bent backwards.	Staff needed to help when he (Lyle) was called for.	Emergency Room	M
D/L B.C.	4/3/2020	1115 Hrs.	DT Crisis	"D" Building Safe Room	Individual was in a behavior. Staff were escorting individual into the safe area where she bit staff's right arm.	Offer BST support.	No Medical Treatment	F
D/L B.M.	5/29/2020	1402 Hrs.	DT Crisis	402 State	When an individual went to kick staff in the knee, staff stepped back to avoid the kick and her right knee buckled.	Use better body mechanics.	Minor Clinic / Hospital	F
D/L S.L.	6/5/2020	1215 Hrs.	DT Crisis	402 State Safe Room	Individual was in escalated behavior and hit and kicked staff in the stomach multiple times.	Better use of the bean bag protocol.	Emergency Room	F

D/L M.H.	7/1/2020	2122 Hrs.	DT Crisis	408 State Hallway	Individual hit staff on her forearms, jerking staff's upper back. Staff was redirecting the individual back to his bedroom when the individual slammed the bedroom door on staff's foot jerking her lower back.	Use better body mechanics.	No Medical Treatment	M
D/L T.D.	7/5/2020	1700 Hrs.	DT Crisis	406 State	Individual bit his tongue at lunch and had been in and out of behavior all day. Individual was bleeding from the mouth and spitting on staff. Staff also received a little scratch on his right thumb during a behavioral episode.	Individual spit blood mixed with saliva on staff.	No Medical Treatment	M
D/L B.C.	7/5/2020	1700 Hrs.	DT Crisis	406 State	Individual bit his tongue at lunch and had been in and out of behavior all day. Individual was bleeding from the mouth and spitting contacting staff's face, arm, chest, neck, etc.	Individual spit in staff's face, blood mixed with saliva. Have face shields.	No Medical Treatment	M
D/L E.B.	7/8/2020	2000 Hrs.	DT Crisis	402 State Kitchen Area	Individual was having an escalated behavior and grabbing at staff. Staff was redirecting the individual out of the kitchen area when the individual hit staff in the head. Staff and individual fell down to the floor with staff landing on her left knee.	Better body positioning.	No Medical Treatment	F
D/L D.C.	7/17/2020	1400	DT Crisis	406 State	Individual was upset and started hitting staff in the face. Staff attempted to block. Individual grabbed PPE mask that staff was wearing and pulled. The mask caught staff's ear (ripped earing) then grabbed staff by the hair and pulled hurting staff's neck.	Better body blocking and re-direction.	No Medical Treatment	M
D/L T.B.	7/18/2020	1520 Hrs.	DT Crisis	406 State	Individual was having an escalated behavior. Staff encouraged individual to use his coping skills. Individual would not listen and verbally threatened staff. Individual suddenly attacked staff. Staff attempted to hold individual when the individual bit staff's left forearm (breaking skin) and also scratched staff's inner elbow on left arm.	No recommendations provided.	Emergency Room	M
D/L C.L.	7/27/2020	1020 Hrs.	DT Crisis	3RD Floor "D" Building	Individual was fluid seeking (behavior). Staff escorted individual to safe area. Individual lowered himself to the mat on the floor. Individual took staff down with him, landing on staff's right leg. Staff's leg hit the ground and individual rolled onto staff's leg.	Not provided.	No Medical Treatment	M

D/L L.D.	7/28/2020	1845 Hrs.	DT Crisis	406 State	Individual came out of his bathroom and started aggressing toward staff. Individual scratched staff's face several times, punched staff in the face and attempted to bite staff.	Better redirection.	Emergency Room	M
D/L J.F.	7/28/2020	1955 Hrs.	DTSS Crisis	406 State	Individual was fluid seeking (behavior) and became physically aggressive toward staff, hitting staff in the arms and back. Staff attempted to put individual in a Mandt hold and redirect individual back to his bedroom when staff hit his back on the individual's wardrobe.	Better body mechanics	No Medical Treatment	M
D/L G.O.	7/30/2020	0105 Hrs.	DT Solar North	3052 Peterson Ind. Bedroom	Individual began to self-injure himself during a behavioral incident. Staff attempted to redirect and block the individual from hurting himself. Individual scratched staff's hands and arms and hit staff in the chest.	No recommendations provided.	No Medical Treatment	M
D/L L.V.	9/28/2020	0845 Hrs.	DT Crisis	408 State Hallway	Staff attempted to block individual from hitting another staff. Individual grabbed staff by the hair and bit the top of staff's head.	Staff to be aware of the surroundings when redirecting an individual with physically aggressive behavior,	Minor Clinic / Hospital	M
D/L B.C.	11/26/2020	0745 Hrs.	DT Crisis	408 State Ind. Bedroom	Individual was in behavior and fluid seeking. Staff redirected individual as he was trying to hit, kick and bite. Individual bit staff on her right thumb.	Be more aware of hand position when individual is having a behavior.	Emergency Room	M
D/L K.P.	12/12/2020	1510 Hrs.	DT Crisis	3071 State / 411 East living room.	Individual was demanding fast food which he could not have. Individual became upset and punched the television. Staff went to move individual away from the television when individual punched staff in the left jaw and neck area causing staff's head to whip back fast enough to hurt her neck and cause a migraine.	Client was in behavior and hit staff in the face. Staff should use better body mechanics.	No Medical Treatment	M
D/L J.K.	12/15/2020	1200 Hrs.	ATPS	3071 State / 411 East living room.	Staff was redirecting individual to his bedroom when individual grabbed staff's left pinky finger possibly dislocated or broke finger.	None provided.	No Medical Treatment	M

- Medical Complex Score of 1 = 1.0

NOTE

- Total # of FTE's to operate with calculated minimum staffing= 100.23*14=1403.22/10=140(-2 for outliers)=138

Determination of staffing numbers may not be determined just by ratios of staff to individual BSDC has to take into consideration acuity for medically and behaviorally complex individuals. Weights and formula helps determine BSDC staff minimums.

Home	Calculated Minimums*	Outliers
CSU	5	Staffing for crisis is one to one with a float
		• 1 safety plans requires 1 to 1 when in community • 1 safety plan requires 1 to 1 supervision if alarm is not functioning • 1 safety plan requires 1 to 1 supervision when exhibiting precursors, safety concerns or target behaviors

Crisis stabilization unit has a current census of four residents with an average age of 25.

DHHS Public Health – Licensure Unit
Office of DD and Behavioral Health
P.O. Box 94986
301 Centennial Mall South
Lincoln, NE 68509-4986

Dear Mr. Luger,

Please accept this letter as a request to move 3054 Peterson Blvd. and the 8 licensed beds to the Solar Cottages ICF/IDD. We stipulate that by moving the only home attached to the Sheridan Cottage ICF/IDD to the Solar Cottages ICF/IDD, that the ICF/IDD identified as Sheridan Cottages will no longer exist.

This will increase the licensed beds in the Solar Cottages ICF/IDD from 79 to 87. We would like this merger to become official on June 29, 2020.

DHHS Letter

Regarding launch of Litigature project

Attachment L2

NEBRASKA

Good Life. Great Mission.

DEPT. OF HEALTH AND HUMAN SERVICES

Pete Ricketts, Governor

DATE: January 20, 2021

TO: Jerall Moreland, Ombudsman's Office

As a key partner in the behavioral health system, the Division of Behavioral Health (DBH) wants to thank you for your participation in the stakeholder sessions held the week before Christmas. I wanted to provide a summary for you. This communication highlights:

1) Lincoln Regional Center (LRC) ligature point renovation, and
2) 2021 strategic planning sessions.

During the September 2019 Joint Commission survey for the LRC, specific risks related to ligature points were identified. Ligature risks are related to suicide prevention in hospital settings to reduce deaths by suicide while serving the most vulnerable patients. The LRC submitted and was subsequently approved to implement an interim risk mitigation plan. This plan required the LRC to implement increased staffing and patient safety monitoring processes until a permanent resolution could be implemented. In order to implement risk mitigation of the ligature points identified, the LRC must undergo renovations in the three hospital units on the LRC campus. These hospital units serve male and female patients who are court ordered for competency evaluation and restoration or who are mental health board committed to inpatient care and unable to be served by psychiatric hospitals in the community. This construction project launched on January 11, 2021 and is currently scheduled to be completed in March 2022.

The LRC has thoroughly explored various options to ensure the most efficient and least disruptive approach to completing this renovation project. The selected approach allows for the construction to be done the most quickly (one building at a time) while also allowing for the most flexibility in capacity management. We feel this puts the LRC in the best position to continue to meet the needs of the larger behavioral health system. Our team continues to manage capacity for admissions, quarantine and isolation related to COVID-19. This is a complex project and we appreciate the importance of staying in communication.

The initial phase of construction is focused on renovations in Building 10. To accommodate this, the female patients have been moved from Building 10 to Building 3. The men's acute psychiatric program has moved from Building 3 to Building 5. The male forensic program will remain in Building 5.

The LRC is expecting little to no disruption in the capacity for female patients during the renovation project. Female patients will continue to be treated in a building physically separate from our male patients. The LRC is projecting a slight reduction of overall male bed capacity (approximately 10 beds) during the course of renovation.

We want to assure you that the LRC will continue to closely monitor the wait list and prioritize admissions according to statutory requirements. The LRC will offer additional support, such

as consultation provided to community providers who are serving mental health board committed patients awaiting transfer to the LRC, and will work with community providers, DHHS Divisions and Regional Behavioral Health Authorities to explore other innovative alternatives for patients, whenever appropriate.

Additionally, we will meet with the State Court Administrator on a regular basis to answer questions and explore solutions to ensure patients needing competency evaluation and/or restoration continue to be served. With the passing of LB686, outpatient competency restoration will be implemented effective July 1, 2021. This will allow patients needing competency restoration to be served in the community and, when the Court deems appropriate, will likely divert some patients from being admitted to the LRC. This enhancement to the system brings Nebraska into alignment with best practices. Nebraska has been working with the GAINS Center for Behavioral Health and Justice Transformation and state and local key partners to develop and execute an implementation plan for outpatient competency restoration to be readily available on July 1, 2021. Additionally, this will help to ensure that the LRC capacity is more readily available for patients requiring inpatient service at the LRC.

This increased flexibility with outpatient restoration is just one example of how Nebraska's behavioral health system continues to evolve. The DBH strives to lead efforts that will ensure Nebraska becomes the national leader in behavioral healthcare.

In support of the DBH's 2021-2024 strategic planning efforts, it is an opportune time to assess the rehabilitation and treatment continuum at the front door and back door of the LRC. The role of the LRC within the behavioral health continuum of care will also be discussed. The LRC plays a critical role in ensuring Nebraska's most vulnerable citizens receive necessary treatment services that support recovery.

In order to complete this important strategic analysis, the DBH will be bringing together a group of key stakeholders in February 2021. These key stakeholders will include representatives from other DHHS Divisions, Regional Behavioral Health Authorities, community based hospitals and other behavioral health service providers, the Courts and other advocates. The DBH will be working with leaders across these agencies and systems to identify the most appropriate participants.

We will begin your requested updates via a call on January 28th at 2:00CST. You will be receiving a calendar invite with call in information from Peter Snyder. If this time does not work for you, or if you have any questions, please contact Pete Snyder at [redacted]. We look forward to partnering with you all in these planning efforts.

Ombudsman's Contact

Snyder, Peter [redacted]
To: "Moreland, Jerall" <[redacted]>

Wed, Feb 17, 2021 at 10:57 AM

In addition to the information in the spreadsheet I sent you last week for item #6 this is the additional information:

A. Facility Staffing Levels as of December 31, 2020:

1. The number of positions filled as of December 31, 2020

   505

2. The number of positions vacant as of December 31, 2020

   121

3. The number of positions needed in your HR staffing plan for FY21

   626

4. The number of positions filled in your HR staffing plan for FY21 as of December 31, 2020

   505

5. The aggregate turnover rate for the period of 12/2019 - 12/31/2020

   19%

6. The number of vacant positions as of December 31, 2020

   121

B. The number of assaults on staff for calendar year 2020

63

Please let me know if you have any additional questions regarding this information.

Thanks,

Peter Snyder, M.Ed.; C.T.R.S.

There were 63 patient assaults on staff in calendar year 2020 for LRC main campus. There were 67 patient assaults on staff in calendar year 2020 if we include the Whitehall campus.

We are working on making sure we have all the other information sent to you this week.

Thanks,

Peter Snyder, M.Ed.; C.T.R.S.

				Total Fire Extinguisher, Class K, 6 Ltr:	1

Inventory & Warranty Report

Generated by: BuildingReports.com

Building: Lincoln Regional Center

The Inventory & Warranty Report lists each of the devices and items that are included in your Inspection Report. A complete inventory count by device type and category is provided. Items installed within the last 90 days, within the last year, and devices installed for two years or more are grouped together for easy reference.

Device or Type	Category	% of Inventory	Quantity
Fire Extinguisher	Fire	100.00%	115

Type	Qty	Model #	Description	Manufacture Date
New (under 90 days)

Last Annual Insp. Date: 5-8-2019 **Elevator Speed:** **Elevator Capacity:** **Code Year:** **Manufacturer:**

	ELEVATORS — Devices Tested/Test Requirement	ASME A17.2 Item #	Pass	Fail	N/A	Results/Notes
IN CAR	1 Must make door reopening device operable.	1.1.1	X			
	2 Must make car and floor sill's level.	1.3.1.1	X			
	3 Must make emergency light operable.	1.5.1(b)	X			
	4 Must make emergency Alarm Bell/Phone operable.	1.6.1	X			
	5 Must make restrictors work outside 18" zone to 4" max open.	1.18.1	X			
MACHINE ROOM	6 Ensure permanent/unobstructed access to machines/controls.	11.1.3	X			
	7 Must provide ample, guarded, machine room lighting.	2.3.1	X			
	8 Must provide sufficient heating/cooling for equipment	2.6.1	X			
	9 Must provide lockable mainline and lighting disconnects.	2.11.1	X			
	10 Must have fire extinguisher adjacent to controls/machine areas	2.7	X			
	11 Clear of non-elevator storage, flammables, from oil, grease, dirt.	2.5.1	X			
	12 Current relief test records tag/plate for pressure testing 1 year	2.31.1	X			Tested April 2020
	13 Must provide current governor test tag/plate 1/5 year.	2.13.2.1 (b) (6)			X	
	14 MCP tasks w/dates, tests, repairs, callbacks, oil usage. 2013+	2.40.1			X	
CAR TOP	15 Must make car top stop switch operable.	3.1.1	X			
	16 Must make car top inspection station operable.	3.3.1	X			
	17 Must make car top light and GFCI outlet operable.	3.2.1	X			
	18 Must make hoist way venting clear and louvers operable.	3.11.1			X	
	19 Check that a standard railing is provided where required.	3.4.3.1 (b)			X	
	20 Must keep all ropes free from rust/kinks/broken strands.	3.23.1			X	
Fire	21 Must test Fire Service Phase One & Two monthly.	6.5.2 & 6.5.3	X			
	22 Must maintain monthly fire service testing log in control room.	6.1.1	X			
HOISTWAY	23 Must maintain door closing foot pound pressure within limits.	1.8.1	X			
	24 Must properly adjust door equipment on car & hall doors.	3.17.1	X			
	25 Must maintain door gibs and retainers if provided to code.	1.7.1	X			
	26 Escutcheons intact, secure. Access switches & limits work OK.	4.5.1	X			
PIT AREA	27 Must provide pit ladder on all pits over 30", on P.U. side of door.	5.1.1(b)	X			
	28 Must maintain a dry pit, clean and paint pit equipment.	5.1.1(e)	X			
	29 Must make pit stop switch operable, locate adjacent to ladder.	5.1.1(c)	X			
	30 Must make pit light operable, switch adjacent to ladder, 18" high	5.1.1(d)	X			
	31 Sump cover must be grated or 5-2" holes to allow water inside	5.1.1 (e)	X			
	32 Must keep pit equipment rust free, clean to bare metal, paint	5.10-14	X			
	ESCALATORS					
	33 Must keep handrails free from cuts, cracks, pinch points and other hazards.	7.3				
	34 Must keep covers secure, no tripping hazards, maintain open area for access.	7.4				
	35 Must keep safety decals or signs in good shape for passengers to read.	7.6				
	36 Must keep stationary comb plates and escalator step edges which mesh	7.7.1				
	37 Must maintain gap between moving step and stationary skirt panel 3/16-1/4.	7.17.1				
	38 Must keep excessive play or rocking movement in steps to a minimum.	7.9.1(b,1)				
	39 Current MCP tasks w/dates, tests, repairs, callbacks, start-up guide. 2013+	7.19.1

Sprinkler Inspection Certificate

For

Lincoln regional center B 3
801 west prospector
Lincoln, Ne 68522

This inspection was performed in accordance with NFPA 101, EDITION 2012, LIFE SAFETY CODE, NFPA 72, EDITION 2010, FIRE ALARM SYSTEMS, NFPA 25, EDITION 2011,WATER-BASED FIRE PROTECTION SYSTEMS and other regulatory standards applicable to this inspection.

This Inspection was performed in accordance with applicable NFPA Standards. The subsequent pages of this report provide performance measurements, listed ranges of acceptable results, and complete documentation of the inspection. Whenever discrepancies exist between acceptable performance standards and actual test results, notes and/or recommended solutions have been proposed or provided for immediate review and approval.

Quarterly Inspection

Inspection & Testing

Generated by: BuildingReports.com

Building: Lincoln regional center B 3

The Inspection & Testing section lists all of the items inspected in your building, which are then categorized by the applicable code reference. The most recent inspection is listed in the far right column and is based on the Finish Date of that inspection. The latest inspection uploaded in each previous quarter appears in the four columns to the left. Passed=P, Failed=F, Replaced=R

EC 02.03.05 EP 02 Six-month testing of tamper switches and vane-type and pressure-type water-flow devices. Quarterly testing of mechanical water-flow devices. NFPA 72-2010 Table 14.4.5; NFPA 25-2011 Table 5.1.1.2.

Valve shall be operated and signal receipt shall be verified to be within the first two revolutions of the hand wheel or within one-fifth of the travel distance, or per the manufacturer's published instructions. (2010 ed.) (NFPA 72 Table 14.4.2.2 (14i.1))

lincoln, ne 68522

This inspection was performed in accordance with NFPA 101, EDITION 2012, LIFE SAFETY CODE, NFPA 72, EDITION 2010, FIRE ALARM SYSTEMS, NFPA 25, EDITION 2011,WATER-BASED FIRE PROTECTION SYSTEMS and other regulatory standards applicable to this inspection.

This Inspection was performed in accordance with applicable NFPA Standards. The subsequent pages of this report provide performance measurements, listed ranges of acceptable results, and complete documentation of the inspection. Whenever discrepancies exist between acceptable performance standards and actual test results, notes and/or recommended solutions have been proposed or provided for immediate review and approval.

Inventory & Warranty Report

Generated by: BuildingReports.com

Building: Lincoln regional center B 5

The Inventory & Warranty Report lists each of the devices and items that are included in your Inspection Report. A complete inventory count by device type and category is provided. Items installed within the last 90 days, within the last year, and devices installed for two years or more are grouped together for easy reference.

Device or Type	Category	% of Inventory	Quantity
Supervisory Signal	Alarm	29.17%	7
Tamper Switch	Alarm	29.17%	7
Waterflow Switch	Alarm	29.17%	7
Post Indicator Valve	Valve	4.17%	1
Drain	Device	4.17%	1
Control Valve	Valve	4.17%	1

Device Type	Qty	Model #	Type	Description	Install Date
In Service - 90 Days - 1 Year					
Control Valve	1				03/02/2020
Drain	1		Main		03/02/2020
Post Indicator Valve	1				03/02/2020
Supervisory Signal	7				03/02/2020
Tamper Switch	6				03/02/2020
Tamper Switch	1		Control Valve	Supervisory	03/02/2020
Waterflow Switch	3				03/02/2020
Waterflow Switch	4		Vane	Alarm	03/02/2020

Zone Address Report

Generated by: BuildingReports.com

Building: Lincoln regional center B 5

The Zone Address Report lists all of the devices and items that have an individual address, or are grouped together under a common zone. The device type, location and description are included for your reference. For more information on the device, use the link provided under ScanID.

Address	Device Type	Location	Type	ScanID
Control Panel 1				
Zone/Address: s-2				
	Tamper Switch	1st Closet closet by reception center		59342382

Inventory & Warranty Report

Generated by: BuildingReports.com

Building: Lincoln regional center B 10

The Inventory & Warranty Report lists each of the devices and items that are included in your Inspection Report. A complete inventory count by device type and category is provided. Items installed within the last 90 days, within the last year, and devices installed for two years or more are grouped together for easy reference.

Device or Type	Category	% of Inventory	Quantity
Waterflow Switch	Alarm	16.67%	3
Tamper Switch	Alarm	38.89%	7
Supervisory Signal	Alarm	33.33%	6
Post Indicator Valve	Valve	5.56%	1
Drain	Device	5.56%	1

Device Type	Qty	Model #	Type	Description	Install Date
In Service - 90 Days - 1 Year					
Drain	1		Main		03/02/2020
Post Indicator Valve	1		Ground		03/02/2020
Supervisory Signal	6				03/02/2020
Tamper Switch	2				03/02/2020

Waterflow Switch	3		Vane	Alarm	03/02/2020

Sprinkler Inspection Certificate

For

Lincoln regional center B 14
801 west prospector
Lincoln, Ne 68522

This inspection was performed in accordance with NFPA 101, EDITION 2012, LIFE SAFETY CODE, NFPA 72, EDITION 2010, FIRE ALARM SYSTEMS, NFPA 25, EDITION 2011,WATER-BASED FIRE PROTECTION SYSTEMS and other regulatory standards applicable to this inspection.

This Inspection was performed in accordance with applicable NFPA Standards. The subsequent pages of this report provide performance measurements, listed ranges of acceptable results, and complete documentation of the inspection. Whenever discrepancies exist between acceptable performance standards and actual test results, notes and/or recommended solutions have been proposed or provided for immediate review and approval.

Inspection & Testing

Generated by: BuildingReports.com

Building: Lincoln regional center B 14

The Inspection & Testing section lists all of the items inspected in your building, which are then categorized by the applicable code reference. The most recent inspection is listed in the far right column and is based on the Finish Date of that inspection. The latest inspection uploaded in each previous quarter appears in the four columns to the left. Passed=P, Failed=F, Replaced=R

EC 02.03.05 EP 02 Six-month testing of tamper switches and vane-type and pressure-type water-flow devices. Quarterly testing of mechanical water-flow devices. NFPA 72-2010 Table 14.4.5; NFPA 25-2011 Table 5.1.1.2.

Valve shall be operated and signal receipt shall be verified to be within the first two revolutions of the hand wheel or within one-fifth of the travel distance, or per the manufacturer's published instructions. (2010 ed.) (NFPA 72 Table 14.4.2.2 (14i.1))

Wet Pipe Fire Sprinkler Systems

Generated by: BuildingReports.com

Building: Lincoln regional center B 14

This section lists out all the devices and components that have been associated with a Wet Pipe System and provides details as to type of component, pressure readings, response time, etc. If a component has an OK checkbox that is checked, then that component was actually tested. However, for Pass/Fail test results, see the Inspection and Testing section.

I 000	Initial Comments On 10/5/20-10/8/20, DHHS Public Health representatives conducted a licensure survey to determine compliance with 175 NAC 9, Licensure Regulations for Hospitals. The facility was out of compliance with the regulations identified below at the time of survey: 9-006.08 Infection Control; 9-006.09 G5 & G7 Pharmacy; 9-006.09 H2 Dietary.	I 000		
I 470	0-006.08 Infection Control Each hospital must provide a sanitary environment to avoid sources and transmission of infections and communicable diseases. There must be an active program for the prevention, control and investigation of infections and communicable diseases. This Standard is not met as evidenced by: Based on staff interviews, review of the facility infection control plan, Infection Control (IC) meeting minutes for 2019 and 2020 and quality data information related to Infection Control the facility failed to have implemented an active infection control program since September of 2019. The facility failed to: Perform surveillance of infections to ensure nosocomial (Health Care Acquired) infections are identified, investigated and controlled; to have a Legionella prevention program for water safety; lacked a system for early detection of outbreaks and prevention; lack of monitoring for treatment appropriateness including failure to have an antibiotic stewardship program to prevent the development and spread of drug resistant organism; lack of any documentation of staff monitoring to ensure infection control policies are followed and corrective action plans developed if needed. The facility census was 87 at the time of the survey.	I 470

I 470	Continued From page 1 The deficient practice has the potential to affect all patients. Findings are: A. Record review of the facility document titled "Infection Control Plan" last reviewed 11/18 notes the responsibilities of the Infection Control Coordinator (ICC) who is responsible for ongoing and systematic surveillance of risk or potential for infection, compiles monthly/quarterly patient infection rates, including any healthcare-associated infections, monitors staff infection rates. The ICC presents monthly/quarterly patient infection reports to the Infection Control Committee, Medical Staff and to the Performance Improvement/ Risk Management Committee. The IC plan also includes mandatory reporting of communicable disease to local and state community Public Health agencies. The plan identifies Infection Risk Reduction and Prevention strategies, Monitoring and Accountability for the committee to investigate, control and develop prevention strategies for healthcare-associated infections. The pharmacy reports patient infections resulting in antibiotic use to the Infection Control Committee. The Multi Drug Resistant Organisms are to be monitored throughout the year with chart reviews for any indicated cases to assess IC practices and educate staff as needed. Hand hygiene is to be monitored to maintain compliance to greater than 90 %. The only IC activity found was related to the facility Covid 19 pandemic plan that was part of Emergency Planning. B. Review of data titled Overall Patient Infection Rates found there has not been any surveillance or reporting since September of 2019. Data for Employee Infection reporting found no reports since September of 2019. A report titled	I 470		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:	(X2) MULTIPLE CONSTRUCTION	(X3) DATE SURVEY COMPLETED
	520003	A. BUILDING: _____ B. WING _____	10/08/2020

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETE DATE
I 470	Continued From page 2 "Antibiotics used" for 2020 lists antibiotics used by month with type of infection such as upper respiratory, dental, skin. The report does not identify the patient or unit or any culture reports. There were no surveillance reports to demonstrate IC was monitoring the nosocomial (Health Care Acquired) infections of patients. The last document titled "Action Taken" related to IC was second quarter of 2019 related to cleaning of med rooms, kitchens on the units and coffee machines. C. Record review of Infection Control meeting minutes noted that the IC committee began meeting in July 2020 and had meetings for July, August, and September 2020. All 3 meetings lacked any discussion of surveillance data, infection rates of patients and staff or any monitoring of staff compliance with IC policies and procedures. There were no Antibiotic Stewardship meeting minutes or reports. D. Staff interview on 10/7/20 at 9:30 AM with the Director of Nursing (DON) who is also the Infection Control Coordinator could identify COVID facility policies but stated that Physician's Assistant (PA #1) reviews labs, symptoms, antibiotic use and does surveillance reports. The reports go to the IC committee. The DON took over the role as IC Coordinator this summer and noted that the previous PA who was doing Infection Control left in January of 2020. The DON confirmed that there were no IC meetings prior to July 2020. The DON confirmed there was no antibiotic stewardship committee. The DON confirmed there has not been any monitoring of staff compliance with IC policies and procedures such as handwashing or COVID precaution compliance.	I 470		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:	(X2) MULTIPLE CONSTRUCTION	(X3) DATE SURVEY COMPLETED

I 470	Continued From page 3 E. Staff interview with PA 1 on 10/7/20 at 1:15 PM revealed being new on the IC Committee. The previous PA left 1/2/20 and did not orient me to Infection Control. The PA identified attendance at 1 meeting in August of 2020 and was not asked to provide any reports. The PA stated " I have no IC surveillance data, no antibiotic stewardship committee." The PA was aware the previous PA provided reports at the Medical Staff meetings on infections. The PA stated "I am not sure exactly what my role is, we are trying to figure out what the previous PA did." F. Based on staff interviews and policy review, the facility failed to prevent and control the transmission of potential infections related to Legionella, as evidenced by lack of any policy to assess and promote water safety to prevent the growth of coliform spore bacteria that promotes Legionella (as required for all health care facilities since 2017). Meeting with staff members on 10/5/2020 at 11:00am, the Facility Operations Officer, Maintenance Supervisor and Compliance Staff member, revealed that the facility had not been aware of or established any plan for Legionella risk/mitigation of the facility water system. Maintenance Supervisor related that Housekeeping staff flush drains weekly with bleach but no flushing of lines or monitoring of water systems had been formalized. A discussion of the tool-kit available on the DHHS (Department of Health and Human Services) website which referenced CDC (Center for Disease Control) and ASHRAE (American Society of Heating Refrigeration Air conditioning	I 470

must be removed from the pharmacy or storage area only by personnel designated in hospital policies and in accordance with state and federal law.
9-006.09G7 The supply of drugs, devices and biologicals must be checked on a regular basis to ensure expired, mislabeled, unlabeled or unusable products are not available for patient use and are disposed of in accordance with hospital policies and state and federal law.
9-006.09G8 Information relating to interactions, contraindications, side effects, toxicology, dosage, indications for use, and routes of administration for drugs, devices and biologicals must be available to staff.

This Standard is not met as evidenced by:
PART 1 (9-006.09 G5)
Based on record review, observations and staff interview, the facility failed to consistently monitor the medication refrigerator temperatures to ensure the temperature maintained a range from 32 degrees to 40 degrees Fahrenheit. This occurred in 6 of 7 medication refrigerators in the facility.

Findings are:

A. A tour of the medication refrigerator in the pharmacy, on the 5 patient units and in the MCM (Medication Cabinet Machine) room were identified as containing medications the pharmacist identified as needing a temperature range of 32-40 degrees Fahrenheit revealed the following:
-The Pharmacy medication refrigerator lacked a temperature log. The thermometer currently read 40 degrees F.
-Unit 1 West medication refrigerator lacked a temperature log. The thermometer currently read

advertising for applicants to apply for the newly classified Dietary Manager position. The FOO further revealed that a contract with a Registered Dietitian was not secured, and the staff were to use the Dietitians at Beatrice State Developmental Center (BSDC) - another State facility who employs three (3) Dietitians.
The Food Service Supervisors did not have a phone number to call for Dietitian questions/direction but were to send e-mail communication.

Review of staff working in the dietary department for September and October 2020, revealed a total of 5.5 dietary staff positions plus a prn (as needed) position were all vacant. The current dietary staff and supervisors were working multiple days in a row (up to 13) without a day off and were also working on average 20 - 40 hours of overtime per pay period to cover the shifts to prepare meals and clean the kitchen.

Staff interview with Food Service Supervisors (2) on 10/6/2020 at 9:35am revealed that the pay scale and volume/complexity of work required in the kitchen were causing dietary staff to leave and go work elsewhere for $3- $5 more per hour for less work required than the kitchen positions.

Review of the menu for the facility revealed the staff were required to prepare and serve hot meals 3 times daily with the exception of Continental Breakfast on Saturday/ Sunday and the occasional sack lunch offering of sandwich meals. To meet the demands of the regular menu service of hot meals to patients, the current staff of 7 employees
were working multiple hours of over-time and with very limited days off from the facility. A total of

K 000	INITIAL COMMENTS The facility must meet the applicable provisions of the 2000 Edition of the Life Safety Code of the National Fire Protection Association. This facility is governed by Chapter 19, "Existing Health Care Occupancies" of the 2000 Edition of the National Fire Protection Association [NFPA], Chapter 101: Life Safety Code. The Norfolk Regional Center Hospital is a three story's with a walk out basement. The facility was built in 1950 and is a Type II (222) construction. The facility is fully sprinkled with smoke detection in the corridors and spaces open to the corridors. The Norfolk Regional Center Hospital was found to be not in compliance with the requirements for participation in Medicare/Medicaid at 42 CFR 482.41 Life Safety from Fire, and the related National Fire Protection Association (NFPA) Standard 101 - 2000 edition. K 918	Electrical Systems - Essential Electric Syste CFR(s): NFPA 101 Electrical Systems - Essential Electric System Maintenance and Testing The generator or other alternate power source and associated equipment is capable of supplying service within 10 seconds. If the 10-second criterion is not met during the monthly test, a process shall be provided to annually confirm this capability for the life safety and critical branches. Maintenance and testing of the generator and transfer switches are performed in accordance with NFPA 110. Generator sets are inspected weekly, exercised under load 30 minutes 12 times a year in 20-40 day intervals, and exercised once every 36 months for 4 continuous hours. Scheduled test under load conditions include a complete simulated cold start and automatic or manual transfer of all EES loads, and are conducted by competent personnel. Maintenance and testing of stored energy power sources (Type 3 EES) are in accordance with NFPA 111. Main and feeder circuit breakers are inspected annually, and a program for periodically exercising the components is established according to manufacturer requirements. Written records of maintenance and testing are maintained and readily available. EES electrical panels and circuits are marked, readily identifiable, and separate from normal power circuits. Minimizing the possibility of damage of the emergency power	K 918

Provider/Supplier Name:	Norfolk Regional Center	Survey Date
STREET ADDRESS, CITY, ZIP:	1700 North Victory Rd, Norfolk, NE 68701	10/8/2020
	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER 28-	9/19/3323
	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE VIOLATION)	COMPLETIONDATE
CITED TAG #	K-211: Means of Egress - General CFR(s): NFPA 101: This STANDARD is not met as evidenced by: Based on observation and interview, the facility failed to maintain corridors free of obstructions. The corridors width was 8' wide. This deficient practice could delay evacuation of residents and staff during an emergency.	
K-211	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure all means of egress are free from obstructions.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
K-211	NRC Quality Assurance Coordinator (QAC) will update the NRC Decorations policy and procedure to ensure a minimum of 6' 8" clearance is maintained in all points of egress.	10/27/2020
K-211	NRC QAC will complete an audit of NRC grounds to ensure compliance with the NRC Decorations policy and procedure and remove all items not in compliance. The results of the audit will be reported to Administrative Council.	11/13/2020
K-211	NRC QAC will update the NRC Environment Inspection Form to reflect the change in policy.	10/27/2020
K-211	NRC QAC will update the NRC Bi-Annual Environmental Inspection Form to reflect the change in policy.	10/27/2020
K-211	NRC will educate all staff on the revised NRC Decorations policy.	12/18/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
K-211	NRC QA department will complete an audit to ensure all environment inspection forms to ensure accurate completion. The audit will be reported to NRC Environment of Care Committee (EOCC). The audit will continue for at least 90 days of 100% compliance.	2/1/2021
K-346	NRC QA Department will conduct an audit of all NRC employee files to ensure staff training has been completed. The results will be reported to Administrative Council. The audit will continue until 100% compliance is achieved.	1/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
I-470	NRC Quality Assurance Coordinator	
CITED TAG #	K-321: Hazardous Areas - Enclosure CFR(s): NFPA 101- This STANDARD is not met as evidenced by: Based on observation and staff interview, the facility failed to assure a door to a hazardous area was provided with a self-closing device and hazardous equipment was located in a fire rated room. The deficient practices would allow fire, smoke and gasses to migrate into the exit corridor.	
K-321	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure all hazardous areas are secured with a self-closing devise and fire rated door.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
K-321	NRC Maintenance Director will install a self-closing device on room L21 (Canteen door).	11/13/2020
K-321	NRC discontinued the use of the pottery kiln and will not use until secured in an area which is separated by smoke partitions and a door which is self-closing.	10/27/2020
K-321	NRC Maintenance Director will get an estimate of cost to install smoke partitions and a self-closing door around the pottery kiln.	12/1/2020

K-321	NRC Maintenance Director will seal all penetrations in the custodial storage room.	11/13/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
I-470	NRC QAC will coordinate an audit of NRC grounds to assess other penetrations and doors needing self-closing devices and ensure all areas are secured. The audit will continue until 100% compliance has been achieved. The results will be reported and discussed in Administrative Council, PIRM, EOCC and all staff meetings.	1/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
I-470	NRC Quality Assurance Coordinator	
CITED TAG #	K-346/K-354: This STANDARD is not met as evidenced by: Based on record review and staff interview, the facility failed to provide a complete policy regarding the procedures to be taken in the event that the fire alarm system was out of service for more than four hours in any twenty-four hour period. The lack of a complete written policy and procedure could result in staff failing to implement interim safety measures in the event of an emergency. This deficient practice affected all occupants.	
K-346/K-354	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure a Fire Watch policy and process is implemented.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
K-346/K-354	NRC QAC will develop a Fire Watch Policy.	11/3/2020
K-346/K-354	NRC QAC will post Fire Watch reminders in all Fire Panels.	11/6/2020
K-346/K-354	All staff will be educated on the Fire Watch Policy and Procedure.	12/18/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
K-346/K-354	NRC QA Department will conduct an audit of all NRC employee files to ensure staff training has been completed. The audit will continue until 100% compliance is achieved. The results will be reported and discussed in Administrative Council, PIRM, EOCC and all staff meetings.	1/1/2021
K-346/K-354	NRC QA Department will complete a survey of staff to ensure they have knowledge of the Fire Watch Process. The results will be reported to EOCC. The audit will continue for at least 90 days of 100% compliance.	4/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
K-346/K-354	NRC Quality Assurance Coordinator	
CITED TAG #	K-353: This STANDARD is not met as evidenced by: Based on observation and staff interview, the facility failed to maintain fire sprinklers free from foreign material and not obstructed. These deficient practices would affect the operating temperature of the fire sprinklers and increased the potential that the sprinkler system would fail to activate as designed during a fire, which would affect all occupants.	
K-353	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure all fire sprinklers are free from obstructions and foreign material.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
K-353	NRC Maintenance Director will ensure all fire sprinklers on NRC grounds are free from dust and lint.	11/13/2020
K-353	NRC Maintenance Director will ensure all fire sprinklers have at least 18" clearance and are free from any items that may obstruct them.	11/13/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	

K-353	NRC QA department will complete an audit to ensure all fire sprinklers are free from dust and lint and are free from obstruction. The audit will continue until 100% compliance has occurred for 90 days. The results will be reported and discussed in Administrative Council, PIRM, EOCC and all staff meetings.	2/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
	NRC Quality Assurance Coordinator	
CITED TAG #	K-712: Fire Drills: This STANDARD is not met as evidenced by: Based on documentation review and staff interview, the facility failed to hold fire drills under varied conditions for 2 of 3 shifts reviewed by not conducting the fire drills at least one hour apart from all other drills on the shift. The facility also failed to conduct a fire drills for the third shift for the first, second, and third quarters of 2020 and the fourth quarter of 2019 for second shift. This condition did not provide simulated training for staff to respond to a fire emergency during various activities and staffing levels, which would affect fire procedure response for all residents. The deficient practice would affect all occupants.	
K-712	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure fire drills are completed at least quarterly under varying conditions for each shift.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
K-712	NRC QAC revised the NRC Fire Drill Schedule.	10/8/2020
K-712	NRC QAC will update the NRC Code Red Policy to reflect the fire drill process.	10/28/2020
K-712	NRC QAC will implement the NRC Fire Drill Schedule.	10/31/2020
K-712	NRC QAC will update the NRC Fire Drill Assessment to ensure the fire pull stations are tested within 24 hours if the drill was completed between the hours of 9pm and 6am.	10/28/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
K-712	NRC QAC will audit all fire drills are completed according to the NRC Fire Drill Schedule and according to policy and procedure. The audit will continue until 100% compliance has occurred for 90 days. The results will be reported and discussed in Administrative Council, PIRM, EOCC and all staff meetings.	2/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
	NRC Hospital Administrator	
CITED TAG #	K-753: Combustible Decorations CFR(s): NFPA 101- This STANDARD is not met as evidenced by: Based on observation and staff interview, the facility failed to prohibit the use of combustible decorations which would allow fire spread within the exit corridor.	
K-753	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure combustible decorations will not allow fire spread within the exit corridor.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
K-753	NRC QAC will update the NRC Decorations policy to reflect the process for treating decorations with flame retardant, including maintaining a list of these items.	11/3/2020
K-753	NRC QAC will update the NRC Environment Inspection Form to reflect the change in policy.	10/28/2020
K-753	NRC QAC will update the NRC Bi-Annual Environmental Inspection Form to reflect the change in policy.	10/28/2020
K-753	NRC QAC will ensure all decorations on unit are allowed per NRC policy and are treated with flame retardant.	11/6/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	

K-753	NRC QAC will audit all areas within NRC to ensure compliance with the NRC decorations policy. The audit will continue until 100% compliance has occurred for 90 days. The results will be reported and discussed in Administrative Council, PIRM, EOCC and all staff meetings.	2/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
	NRC Hospital Administrator	
CITED TAG #	K-918: Electrical Systems - Essential Electric System CFR(s): NFPA 101- This STANDARD is not met as evidenced by: Based on documentation review and interview, the facility failed to provide proper documentation that all of the weekly and monthly load testing was conducted properly. The deficient practices increased the potential that the generator would fail to run during loss of power.	
K-918	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure the generator is tested and monitored as necessary to decrease the likelihood of generator failure during loss of power.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
K-918	NRC Maintenance Director will update the Monthly NRC Generator Testing form to ensure documentation of load is documented and at least 30% of the generator capacity was met.	10/28/2020
K-918	NRC Maintenance Director will develop a monitoring form to document the weekly inspection of the generator which will include the lubrication system, exhaust system, electrical system, belts and hoses, prime mover, water pump, jacket water heater and radiator.	11/3/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
K-918	NRC QAC will audit the completion of the generator monitoring forms. The audit will continue until 100% compliance has occurred for 90 days. The results will be reported and discussed in Administrative Council, PIRM, EOCC and all staff meetings.	11/13/2020
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
K-918	NRC Quality Assurance Coordinator	
CITED TAG #	K-920: Electrical Equipment - Power Cords and Extends CFR(s): NFPA 101- This STANDARD is not met as evidenced by: Based on observation and staff interview, the facility failed to use electrical wiring in a way that would not create a fire hazard.	
K-920	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure all electical wiring is used in a way which does not increase fire hazards.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
K-920	NRC QAC will ensure the holiday lights are removed from all patient living units unless approved through the NRC Decorations policy.	10/28/2020
K-920	NRC QAC will update the NRC Decorations policy to state "daisy chaining" of electrical items is not permitted.	10/28/2020
K-920	NRC QAC will update the NRC Environment Inspection Form to monitor the use of power and electrical cords and ensure "daisy chaining" of electric items does not occur.	10/28/2020
K-920	NRC QAC will update the NRC Bi-Annual Environmental Inspection Form to monitor the use of power and electrical cords and ensure "daisy chaining" of electric items does not occur.	10/28/2020
K-920	NRC Maintenance Director will install permanent wiring in the basement maintenance office and remove the extension cord.	11/6/2020
K-920	NRC will educate all staff on the revised NRC Decorations policy.	12/18/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
K-920	NRC QA Department will conduct an audit of all NRC employee files to ensure staff training has been completed. The audit will continue until 100% compliance has occurred. The results will be reported and discussed in Administrative Council, PIRM, EOCC and all staff meetings.	1/1/2021

K-920	NRC QAC will audit all areas within NRC to ensure compliance with the appropriate use of power and electrical cords. The audit will continue until 100% compliance has occurred for 90 days. The results will be reported and discussed in Administrative Council, PIRM, EOCC and all staff meetings.	2/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
K-920	NRC Quality Assurance Coordinator	

FACILITY STATEMENT OF COMPLIANCE

PROVIDER NAME:	Norfolk Regional Center	Survey Date
STREET ADDRESS, CITY, ZIP:	1700 North Victory Rd, Norfolk, NE 68701	10/8/2020
	Provider License Number:	9/19/3323
	PROVIDER'S STATEMENT OF COMPLIANCE (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE VIOLATION)	**DUE DATE**
CITED TAG #	I-470: 0-006.08 Infection Control-The facility failed to: Perform surveillance of infections to ensure nosocomial (Health Care Acquired) infections are identified, investigated and controlled; to have a Legionella prevention program for water safety; lacked a system for early detection of outbreaks and prevention; lack of monitoring for treatment appropriateness including failure to have an antibiotic stewardship program to prevent the development and spread of drug resistant organism; lack of any documentation of staff monitoring to ensure infection control policies are followed and corrective action plans developed if needed.	
I-470	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure surveillance of infections are identified, investigated and controlled. NRC will re-establish the antibiotic stewardship program. NRC will establish audits to ensure staff compliance of infection control practices.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
I-470	NRC Medical Director assigned the role of Infection Control Coordinator (ICC) to physician assistant.	10/27/2020
I-470	NRC ICC will work with Quality Assurance (QA) Department to re-establish infection control reports; which will include antibiotic stewardship, staff and patient illness.	11/13/2020
I-470	NRC ICC will implement a Antibiotic Stewardship program.	12/1/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
I-470	NRC ICC will work with QA Department to re-establish handwashing audits to ensure compliance is greater than 90% and report to the NRC Infection Control Committee.	12/1/2020
I-470	NRC QA Department will audit Infection Control and Antibiotic Stewardship Committee to ensure they are taking place as scheduled. The audit will continue until 100% compliance has occurred for 90 days. The results will be reported and discussed in Administrative Council, PIRM and all staff meetings.	2/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (<u>By JOB TITLE, not by NAME</u>) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
I-470	NRC Medical Director	
CITED TAG #	I-470: 0-006.08 Infection Control- The facility failed to: Perform surveillance of infections to ensure nosocomial (Health Care Acquired) infections are identified, investigated and controlled; to have a Legionella prevention program for water safety; lacked a system for early detection of outbreaks and prevention; lack of monitoring for treatment appropriateness including failure to have an antibiotic stewardship program to prevent the development and spread of drug resistant organism; lack of any documentation of staff monitoring to ensure infection control policies are followed and corrective action plans developed if needed.	

I-470	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will implement a Legionella prevention program for water safety.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
I-470	NRC QA Coordinator (QAC) will work with NRC Maintenance Director to establish a Legionella policy and procedure.	11/13/2020
I-470	NRC QAC will ensure all applicable staff are trained on the Legionella policy and procedures.	12/1/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
I-470	NRC QAC will establish an audit of the Legionella policy and procedure to ensure compliance. The audit will continue until 100% compliance has occurred for 90 days. The results will be reported and discussed in Administrative Council, PIRM and all staff meetings.	2/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
I-470	Quality Assurance Coordinator	
CITED TAG #	I-560: 9-006.09G Pharmacy Services- Based on record review, observations and staff interview, the facility failed to consistently monitor the medication refrigerator temperatures to ensure the temperature maintained a range from 32 degrees to 40 degrees Fahrenheit. This occurred in 6 of 7 medication refrigerators in the facility.	
	A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure all medication refrigerators are monitored per policy.	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
I-560	NRC QAC will develop a refrigerator monitoring form to track refrigerator temperatures in lieu of electronic monitoring process.	10/27/2020
I-560	NRC QAC will ensure all refrigerators have a temperature monitoring form.	11/6/2020
I-560	NRC DON will ensure all staff are educated on the revised refrigerator monitoring process.	11/13/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
I-560	NRC QA Department will complete an audit to ensure the refrigerator monitoring forms are completed. The audit will continue until 100% compliance has occurred for 90 days. The results will be reported and discussed in Administrative Council, PIRM and all staff meetings.	2/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
I-560	Director of Nursing	
CITED TAG #	I-560: 9-006.09G Pharmacy Services- Based on observation and staff interview the facility failed to ensure that expired medications were removed from stock to prevent use for patient care in 1 of 1 crash carts/medication box.	
I-560	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY: NRC will ensure crash cart medications are removed from the crash cart.**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
I-560	NRC Pharmacy Director replaced all expired medications and added plastic lock to storage bin where medications are located.	10/9/2020
I-560	NRC Medical Director reviewed medications on crash cart to assess need.	10/27/2020
I-560	NRC Pharmacy Director will remove all medications from crash cart inventory per NRC Medical Director feedback.	10/27/2020
I-560	NRC Pharmacy Assistant will update medication tracking form for crash cart medication storage bin.	10/30/2020

I-560	NRC Medical Director will assess items on crash cart for necessity. Based upon feedback from this assessment NRC DON will remove any items that are not necessary and will ensure all items remaining on the crash cart are not expired.	11/13/2020
I-560	NRC DON will ensure all crash cart monitoring forms are updated.	11/13/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
I-560	NRC QA department will complete an audit to ensure all crash cart monitoring forms are completed. The audit will continue until 100% compliance has occurred for 90 days. The results will be reported and discussed in Administrative Council, PIRM and all staff meetings.	2/1/2021
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
	Director of Nursing	
CITED TAG #	I-570: 9-006.09H Dietary Services- Based on observation, interview and record review, the facility failed to employ a dietary director and sufficient number of dietary staff to ensure preparation of approximately 300 meals daily for the facility.	
I-570	**A. ACTION(S) THAT WILL BE TAKEN TO CORRECT THIS DEFICIENCY:**	
	B. THE PROCEDURE FOR IMPLEMENTING THE CORRECTIVE ACTION(S):	
I-570	NRC Hospital Administrator will assign staff assistant to dietary to assist supervisors with clerical duties.	10/13/2020
I-570	NRC Dietary Supervisor will assess current duties and hours of work for options of support from other departments and options to streamline.	10/16/2020
I-570	NRC Clinical Program Manager will work with Personal Development Supervisor to implement work therapy in dietary for cleaning carts/dishes.	10/19/2020
I-570	NRC Dietary Services Supervisor will Implement sack meals for dinner 2x/week to assist during staffing changes.	11/1/2020
I-570	NRC Dietary Services Supervisor will Implement daily continental breakfast to assist during staffing shortages.	11/1/2020
I-570	NRC Dietary Services Supervisor will Adjust dietary staff schedules to maximize use of FTE.	11/1/2020
I-570	Clinical Program Manager will assess ability to maximize use of work therapy positions including reviewing work therapy in other facilities such as corrections.	1/1/2020
I-570	LRC Food Director will tour NRC kitchen and observe process.	11/6/2020
I-570	NRC Dietary Services Supervisor will post the contact information for Beatrice State Developmental Center dietician in Dietary Services and ensure all staff are aware of the contact information.	11/6/2020
I-570	NRC Hospital Administrator will assess options for assistance in getting deep cleaning in the kitchen and dish room completed.	11/15/2020
I-570	NRC Human Resource Business Partner (HRBP) will expedite reclassification of two open food assistant positions to food cooks.	12/1/2020
I-570	NRC HRBP will Contact community businesses to discuss work options including Liberty Center, Workforce Development and the college. Discuss options to include training for college courses.	12/1/2020
I-570	NRC HRBP will provide a weekly status report to Administrative Council regarding all Food Service poisitons.	10/29/2020
	C. THE MONITORING OR TRACKING PROCEDURE(S) TO ENSURE THE FACILITY IS EFFECTIVE IN CORRECTING THE DEFICIENCY AND TO ENSURE THE FACILITY REMAINS IN COMPLIANCE WITH THIS DEFICIENCY:	
	D. IDENTIFICATION OF THE PERSON RESPONSIBLE (By JOB TITLE, not by NAME) FOR ENSURING THE FACILITY REMAINS IN COMPLIANCE WITH THE CITED DEFICIENCY:	
	NRC Hospital Administrator

Jerall Moreland <jmoreland@leg.ne.gov>

Ombudsman's Contact

Whitmire, Don <[redacted]> Wed, Feb 10, 2021 at 7:07 AM
To: "Moreland, Jerall" [redacted]
Cc: "Nespor, Wes" [redacted], "Kahl, Larry" [redacted]

Good Morning Mr. Moreland,

Please see attached information related to your inquiry.

In 2020 we had 20 staff injuries related to assault.

I have attached a copy of our most recent licensure surveys, which includes a copy of our Life Safety Code inspection- which is the fire marshal review. I did speak with our maintenance director who indicated our Fire Marshal was out for the recertification related to the Life Safety Code inspection and indicated we were found to be in compliance after making the modifications associated with the deficiencies noted. We have not received a copy of this report.

In regards to your request on C below, specifically around internal safety, emergency inspections, and independent standards audits can you help me understand what you are requesting?

Thank you.

Don Whitmire, MPA | *Hospital Administrator-Interim for the Norfolk Regional Center*

Indicator	Yes	No	NA	Comments	Corrective Action	Date Corrected
Safety						
Area clean, including Pt rooms. Showers/ bathrooms free of mold/mildew						
Area well lit/no lights out						
Area free of slip/trip hazards and excess staples						
Unit Restraints accounted for.						
Outlet covers are intact.						
All employees are wearing ID badge in plain sight and carrying radios.						
Electrical panel unobstructed						
Security						
All doors secured						
Window Integrity checked						
Badge Readers are working properly						
Sensitive areas are maintained secure/No unusual activity						
Code Green Buttons Accessible						
Other Security Deficiencies						
Hazardous Mat						
EVS utility rooms locked.						
All chemicals are stored properly with appropriate labeling.						
Only hospital approved cleaning supplies in the patient areas.						
Fire						
Fire door/Alarms operable and not obstructed						
No "daisy-chaining" of electrical items.						

Due to Quality Assurance Department by the 15th of each month

Corridors and exits are clear and unobstructed. No items are hung from ceiling or impacting 8' clearance in hallways. Exit signs functioning and pointed in correct direction.						
Fire extinguisher pin in place						
Magnetic doors (in patient area) are latching correctly						
Electrical Panel in staff office is not blocked						
No objects blocking sprinklers						
No decorative lighting is used other than on approved artificial trees.						
Facility Safety						
Gates are operable and no issues with perimeter fence.						
Exterior doors are locked and working properly						
Exterior lights are working

○

8 Must provide sufficient heating/cooling for equipment.
2.6.1
○
○
○

9 Must provide lockable mainline and lighting disconnects.
2.11.1
○
○
○

10 Must have fire extinguisher adjacent to controls/machine areas.
2.7
○
○
○

11 Clear of non-elevator storage, flammables, from oil, grease, dirt.
2.5.1
○
○
○

12 Current relief test records tag/plate for pressure testing 1 year.
2.31.1
○

13 Must provide current governor test tag/plate 1/5 year.
2.13.2.1
(b)(6)

14 MCP tasks w/dates, tests, repairs, callbacks, oil usage. 2013+
2.40.1

CAR TOP

15 Must make car top stop switch operable.
3.1.1

16 Must make car top inspection station operable.
3.3.1

17 Must make car top light and GFCI outlet operable.
3.2.1

18 Must make hoist way venting clear and louvers operable.
3.11.1

19 Check that a standard railing is provided where required.
3.4.3.1 (b)

20 Must keep all ropes free from rust/kinks/broken strands.
3.23.1

FIRE

21 Must test Fire Service Phase One & Two monthly.
6.5.2 & 6.5.3

22 Must maintain monthly fire service testing log in control room.
6.1.1

HOISTWAY

23 Must maintain door closing foot pound pressure within limits.
1.8.1

24 Must properly adjust door equipment on car & hall doors.
3.17.1

25 Must maintain door gibs and retainers if provided to code.
1.7.1

26 Escutcheons intact, secure. Access switches & limits work OK.
4.5.1

PIT AREA

27 Must provide pit ladder on all pits over 30”, on P.U. side of door.
5.1.1 (b)

28 Must maintain a dry pit, clean and paint pit equipment.
5.1.1 (e)

○
○

29 Must make pit stop switch operable, locate adjacent to ladder.
5.1.1 (c)
○
○
○

30 Must make pit light operable, switch adjacent to ladder, 18” high
5.1.1 (d)
○
○
○

31 Sump cover must be grated or 5-2” holes to allow water inside.
5.1.1 (e)
○
○
○

32 Must keep pit equipment rust free, clean to bare metal, paint.
5.10-14
○
○
○

ESCALATORS

33 Must keep handrails free from cuts, cracks, pinch points and other hazards.
7.3
○
○
○

34 Must keep covers secure, no tripping hazards, maintain open area for access.
7.4
○
○
○

35 Must keep safety decals or signs in good shape for passengers to read.
7.6
○
○
○

36 Must keep stationary comb plates and escalator step edges which mesh.
7.7.1
○
○
○

37 Must maintain gap between moving step and stationary skirt panel 3/16-1/4.
7.17.1

38 Must keep excessive play or rocking movement in steps to a minimum.
7.9.1 (b,1)

39 Current MCP tasks w/dates, tests, repairs, callbacks, start-up guide. 2013+

Whitmire, Don <Don.Whitmire@nebraska.gov> Thu, Mar 11, 3:00 PM (23 h
to Devaraju, Usha, Bruegman, James

You are viewing an attached message. Nebraska Legislature Mail can't verify the authenticity of attached messages.

Hello Ms. Devaraju,

My name is Don Whitmire, I am the Interim Hospital Administrator at the Norfolk Regional Center. Our Director of Mainten James Bruegman, forwarded the attached elevator inspection forms he received from you. Mr. Bruegman indicated he had exp concerns with the attached as there were no checkmarks in the pass/fail boxes on the attached but you had verified that we ha all the inspections.

I am wanting to verify this information. I am also wondering if we could have someone from your department send us the con forms with the boxes checked. These reports are required to be turned in as part of our licensure process and I am concerned not complete.

I do need to provide these documents by the end of business tomorrow.

Thank you.

Mark Labouchardiere
Administrator
Lrc Whitehall Prtf
5845 Huntington Avenue
Lincoln, NE 68507

Dear Mr. Labouchardiere:

The enclosed report documents a finding of noncompliance with the licensure regulations for LRC Whitehall PRTF Psychiatric Residential Treatment Facilities -following the survey at your facility completed on August 4, 2020 by representatives of the Nebraska Department of Health and Human Services Division of Public Health.

The violations found must be corrected to avoid disciplinary action against the facility's license. Therefore, a written statement of compliance must be submitted to the Department within 10 calendar days of receipt of this letter. The statement of compliance must include for each deficiency cited:

1) Action(s) that will be taken to correct the deficiency;
2) The procedure for implementing the corrective action(s);
3) How the facility will monitor its corrective actions/performance to ensure that the violation is being corrected and will not recur, i.e. what program will be put into place to monitor the continued effectiveness of the systemic change to ensure that solutions are permanent;
4) Identify person(s) by position, not individual name, who will be responsible for monitoring and ensuring that compliance is achieved and continues;
5) A realistic date by which each violation will be corrected (which should be within 45 days of the exit of the survey); and
6) Signature of the administrator or other authorized official and date.

If you fail to submit and implement a statement of compliance, the Department may initiate disciplinary action against the facility license.

If you have any questions regarding this correspondence, contact this office.

Sincerely,

Mark Luger

N 125	PROTECTION OF RESIDENTS CFR(s): 483.356 (a) Restraint and seclusion policy for the protection of residents. This STANDARD is not met as evidenced by: Based on record review and interview, the facility failed to ensure their restraint and seclusion policy identified their current system of emergency safety intervention in a crisis situation. This had the potential to effect all the clients in the facility. The facility census was 6 at the time of the inspection. Findings: Record review of the facility's policy and procedure manual for the Whitehall facility revealed the policy, Crisis Management and De-Escalation, Policy PC-02, dated 12/2019, revealed a hold can be used up to three (3) minutes in an emergency situation to protect a client in imminent danger of harming themselves or others. Interview with Youth Security Specialist II A on 8/3/2020 at 1:00 P.M. revealed the 3 minute timeframe which was trained as a part of Mandt crisis intervention training and stated that the policy needed to be redone to reflect the Handle with Care guidelines. Interview with the Youth Security Supervisor (Handle with Care trainer) on 8/3/2020 at 2:00 P.M. confirmed the facility no longer utilized Mandt and have implemented the use of Handle with Care stand up holds for interventions requiring a hold until the client has calmed. HASTINGS REGIONAL CENTER

Pro-Active Risk Assessments

To Include New Buildings and Renovations

Prepared by

Grant Johnson, Safety Coordinator

June 15th, 2020

A PRO-ACTIVE RISK ASSESSMENT FOR THE ENVIRONMENT OF THE HASTINGS REGIONAL CENTER

INTRODUCTION

This document is intended to address the environment of the adolescent substance abuse program. It is in response to the JCAHO Environment of Care Standard.

> The organization conducts proactive risk assessments that evaluate the potential adverse impact of buildings, grounds, equipment, occupants, and internal physical systems on the safety and health of clients, staff, and other people coming to the organization's facilities.
>
> And:
>
> The organization uses the risks identified to select and implement procedures and controls to achieve the lowest potential for adverse impact on the safety and health of clients, staff, and other people coming to the organization's facilities.

This report is based on the following inspections:

- A **Suicide Risk Assessment** of the client care buildings and client care areas conducted by members of the Environment of Care Committee
- The **Life Safety Inspections** conducted by the Deputy Fire Marshals
- The **Safety Inspections** conducted by the Safety Coordinator
- The semi-annual **Building Inspections** conducted by the Environment of Care Committee members, Maintenance and other support and staff
- Annual **Alarm checks** conducted by the Safety Coordinator
- **Fire Drill Issues** found during drills or activations
- Various other routes of information or recommendations from Surveyors, Risk Manager, etc.

GENERAL COMMENTS

Hastings Regional Center is a Juvenile Substance Abuse Facility operated by the Nebraska Department of Health and Human Services. It is located on the west edge of Hastings and covers approximately 25 acres. The Hastings Juvenile Chemical Dependency Program (HJCDP) is in Buildings 27, 28 and 29 on the east side of the campus near the entrance. Building 28/29 are used for client living areas. The HJCDP program has a license for 24 youth.

The campus also includes an Administration Building, Maintenance Shop, Power Plant and several other buildings which are not used and will be demolished.

There are 3 main parking lots and several lesser parking areas. The main structures are connected by an underground tunnel system containing pipes for electricity, steam and water. The tunnels are also used for transporting supplies. Travel through the tunnel by the clients is not allowed. Recreation areas are in various outdoor locations and in the chapel.

The facility has procedures and controls in place to enhance safety and mitigate risks:

Client rooms:

- No electric beds.
- No closets or closet rods.
- Velcro curtains in Building 28/29 in client sleeping rooms.
- Sleeping rooms have knobs that lock from outside and have free egress when inside.
- Doors swing out into hallway in Building 28/29.
- No electrical outlets

Restrooms/Bathrooms:

- Shower heads are safety heads in building 28/29.
- Mirrors are polished metal.
- No towel bars in restrooms.
- Shower curtains are attached to the ceiling with a breakaway mechanism.
- Clothing hooks are suicide proof.

Housekeeping:

- Paper bags used in client care areas. Plastic only in locked rooms.
- Housekeeping and maintenance carts have locked doors for hazardous materials.

Physical surroundings/Utilities:

- Building 27 has a generator to supply full power to buildings 27,28, and 29.
- TV's mounted to walls and not allowed in client rooms.
- No toxic plants in client care areas.

- Sprinkler heads are recessed and tamperproof.
- Electrical and mechanical rooms are locked with a key not available to general staff.
- All fire extinguishers in Building 27/28/29 are in locked, marked rooms for client and employee safety.
- Automatic Sprinkler systems in Buildings 27/28/29.
- No smoking on campus.
- Thermostatically limited hot water.
- All appliances brought in by clients and staff are checked by maintenance personnel.
- All man-hole covers were checked to ensure those in client areas could not be easily removed.
- Maps of facility indicate areas where clients are not to walk unescorted, are updated periodically and posted in client care areas.

Security:

- Electronic lock card reader doors for entrance to buildings 3,5,27,28,29.
- No blind spots on units in commons areas Doors to offices/areas not in use are locked.
- Bright LED lit parking lots.
- Employee vehicles are to be locked.
- 2-way radios are available for "all help" calls.
- "STOP" alarms on fire exit doors to warn of someone exiting the area.

Safety:

- Maintenance PPE requirements created for specific duties.
- Medication rooms have locking mechanisms with key available only to Maintenance, nurses and a key that is passed from Med Aide on one shift to Med Aide on the next shift on each unit.
- Medications are counted by nurse and/or Med Aide to ensure proper count.
- Cameras are present when medications are distributed.

Confidentiality:

- Computer and printer in nursing station are not easily reached by clients.
- All employees sign a confidentiality agreement annually and volunteers at the time of orientation.

Policies/Procedures:

- Contraband searches are performed periodically. Training is also completed by Youth Security Supervisors on procedures for thorough searches.
- The treatment team is responsible for evaluating youth's risks and protective factors related to self-harm, suicidality, elopement, substance use and aggressiveness. This information is transmitted to the treatment team and staff by way of the Personal Safety Plan that is completed on each youth the day of admission.
- Threatening Behavior/Violence in the Workplace policy at state and facility level.
- All direct care staff are trained in Crisis Management & De-Escalation techniques.
- CPR and First Aid for all direct care staff.
- A "Personal Safety Plan" is placed on chart of each youth describing signs of losing control or anger; what things help to calm them; what makes them anxious. These are available to direct care staff.
- Charting of any potential threats or behavior by clients which may cause harm to self or others.

Additional procedures/controls/checks put into place in 2017:

Safety

- Building 15 closed and kitchen moved to Building 3.
- Broken windows and doors in vacant buildings were boarded up

Utilities

- Work with LRC electricians to rewire the cafeteria to support kitchen equipment

Emergency

- Simplified Job action sheets to streamline process and make more efficient.
- Trained all staff members on disasters and the Incident Command system. Practice drills held with YSS's.

Security

- Roads through campus were barricaded to prevent unauthorized entry.
- Auctions held on campus to rid surplus supplies in empty buildings

Life Safety

- 30 second delays added to mag door releases to prevent elopement. Approved by Fire Marshall.
- Fire Lane in front of Building 3 was repainted to make for more visibility.

Social Environment:

- Parking lots repainted and cleaned up.

Additional procedures/controls/checks put into place in 2018:

Safety

- A fence was installed around the new construction area to prevent client access
- Broken windows and doors in vacant buildings were boarded up

Utilities

- Electrical upgrades started on the campus
- Kronos badge readers were installed for staff clocking in.

Emergency

- Simplified Job action sheets to streamline process and make more efficient.
- Trained all staff members on snow emergencies.

Security

- Cameras were placed in the tunnels to monitor unauthorized personnel
- Keyed locks were added to improve security on some internal doors

Life Safety

- Corrections noted by the fire marshal were completed quickly.
- Fire Drills were held as expected.

Social Environment:

- Parking lots repainted and cleaned up.

Additional procedures/controls/checks put into place in 2019:

Safety

- A fence was installed around the new construction area to prevent client access
- Broken windows and doors in vacant buildings were boarded up

Utilities

- Campus electrical, water, gas were all updated.
- Unoccupied buildings will be taken off line of all utilities in the summer of 2020.

Emergency

- Simplified Job action sheets to streamline process and make more efficient.
- Trained all staff members on snow emergencies.

Security

- Cameras were placed in the tunnels to monitor unauthorized personnel
- Keyed locks were added to improve security on some internal doors

Life Safety

- Corrections noted by the fire marshal were completed quickly.
- Fire Drills were held as expected.

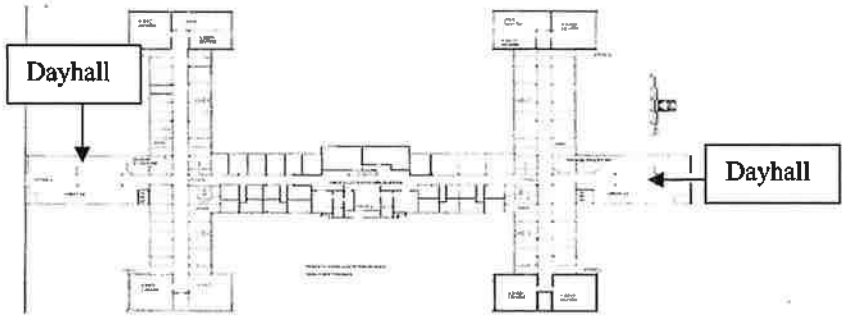
Social Environment:

- Parking lots repainted and cleaned up.

BUILDING 3

- Built in 1937
- 3 story building
- Automatic Sprinkler System

Physical layout of building:



CLIENT UNITS –

- Clients no longer occupy this building,

FIRST FLOOR, SOUTH WING:

- This unit has been shut down and restricted.

SECOND FLOOR, SOUTH WING

- This unit has been shut down and restricted.

GROUND FLOOR

- The **North wing** is occupied by Human Resources personnel.
- The corridor rooms are used for fitness/recreation, staff break room.
- The **SE** wing is used by the Housekeeping and maintenance departments.
- The remainder of the **South** wing has been shut down and restricted.

EXITS

- The front center has a magnetic card reader exit on the first floor. The ground floor has nine exits with magnetic card readers that release 30 seconds after fire alarms are activated. All exit doors are now ADA compliant.
- The former units have fire exit stairwells on the center, east and west wings of each floor that are kept locked and have a STOP alarm activated. All employees in the building have the key to unlock these doors marked with a red plastic ring.

NURSING STATIONS & CLIENT UNITS

- These units have been shut down and access restricted.

CLIENT ROOMS

- No longer located in this building

Building 3

Suicide Risk Assessment

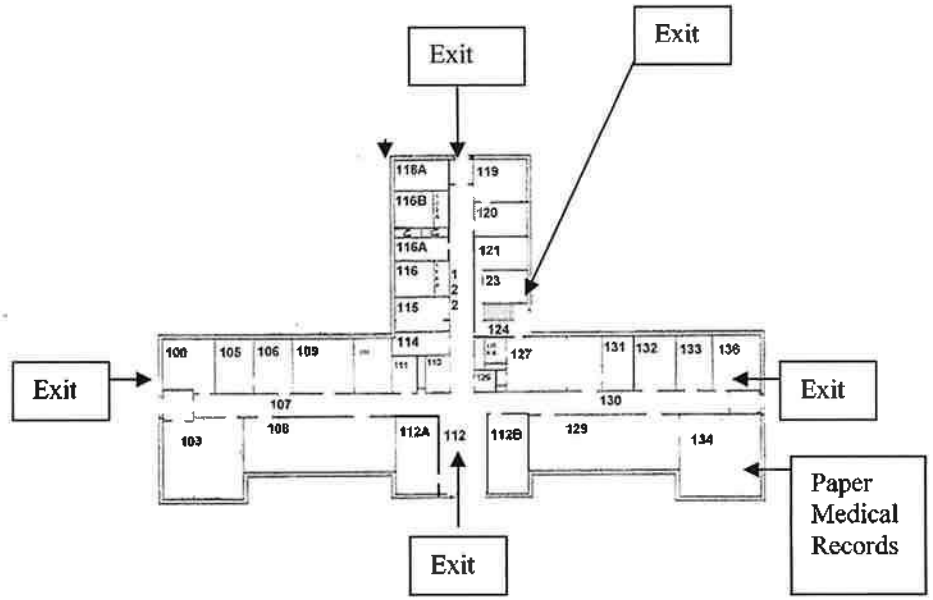
Location	Findings	Person Responsible	Procedure/Control or Repair/Remove
All of Building 3	Has conduit near walls with gap.		• Staff supervise clients. • Suicidality Assessments performed • The Level System assesses the level of observation necessary and whether the level needs to be increased or decreased. • The staffing ratio is 1:4 for days and 1:6 for nights.
	Glass in windows is not safety glass, but panes are small squares.		
	Stairwell doors have push bars for exiting stairwell.		
	Automatic door closures		
	Electrical outlets in corridor extending from wall		
	Door knob on bathroom		
	Pipes under the sink		
	Toilet doors		
	Mounted toilet paper holders		
	Shower knob.		
Bathroom (in main corridor by PVC)	Exposed sink pipes		• Suicidality Assessments performed • The Level System assesses the level of observation necessary and whether the level needs to be increased or decreased.
Hallway	Exposed pipes		Staff supervise clients when room is in use.
Location	**Findings**	**Person Responsible**	**Procedure/Control or Repair/Remove**
Weight room	Weight machines and exercise equipment		• Staff supervise clients when room is in use. • Suicidality Assessments performed
	Bathroom has sink pipes and toilet pipes exposed		

Location	Findings	Person Responsible	Procedure/Control or Repair/Remove
Second Floor Offices	Windows/screens; large openings		Staff supervise clients when room is in use.
	"S" hooks		
	Curtain rod holders		
	Electrical conduit		
	Group Room 280 – curtain rods		
	Client bathroom – Sink and stool pipes and electrical conduit		
First Floor Offices	Sink pipes and electrical conduit in visitor room		Staff supervise clients when room is in use.
	Door closure on entry		
	Locked door to wiring room		
	Curtain rod holders		
	Plant hangers		
	Exam Room – needles, sharps, sink pipes, curtain tracking		
	Hallways have fire alarms extending		
	Cupboard contains heavy duty strapping cords, jump ropes, elastic exercise equipment		• The Level System assesses the level of observation necessary and whether the level needs to be increased or decreased. • The staffing ratio is 1:4 for days and 1:6 for nights.

BUILDING 5

Administration Building

- Built in 1949
- 1 story plus a basement
- Updated sprinkler and alarm system 2020
- Houses the paper medical records



Physical layout of building:

- **EXITS-**
  - 5 exits, one on each side of building, front and back, and one in center, east side.
- **Medical Records**
  - Past medical records are on paper and are being digitally scanned. Present medical records are on computer.
    - These are highly vulnerable to a catastrophe until they are all digitally scanned.
    - The room they are in also has many large windows making them vulnerable to a storm.
- **Security**
- Building has electronic key card door lock entry on all doors. Front entry and east side door are open from 8 a.m. to 4:00 p.m., Monday to Friday only. The switchboard has been relocated to building 3. Most visitors go directly to building 3. Visitors to the Administration building are directed to ring bell for assistance.
- The building underwent major renovation in 2020.
- Cameras are installed in all therapist office, and all common areas of the building.

Bldg 5

Suicide Risk Assessment

Location	Findings	Person Responsible	Procedure/Control or Repair/Remove
Bathrooms	Handicap railings		This building is not accessible to clients. Staff supervise the area if clients are present.
	Exposed pipes up to 24" high		
Electrical/ Fixtures	No locks on		
Basement	Handrails		
Ramp to Building	Handrails		
Windows	Openings are large		
Doors	No piano hinges		
	No suicide-proof knobs		
Mechanical Room/ Equipment	Not accessible – in tunnel		

Chapel –

- **Built in 1954**
- **1 story plus upper level and basement**
- **No Sprinkler or Alarm System**
- **Used for youth recreation.**

Physical layout of building:

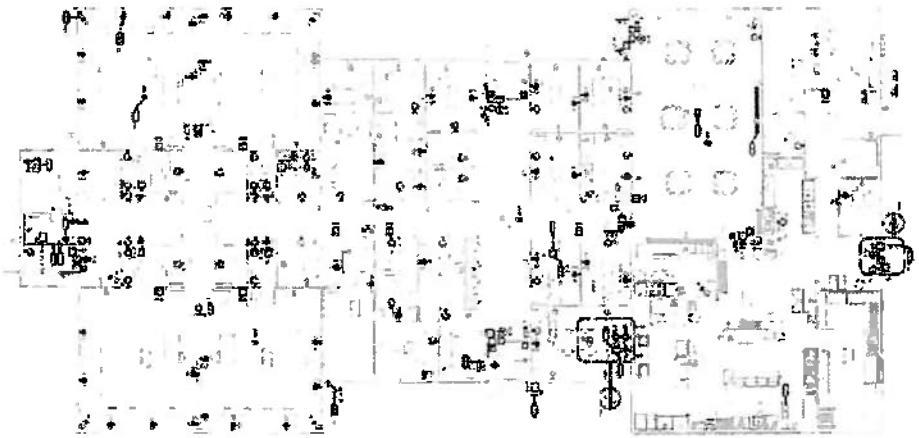
- **EXITS-**
  - 4 exits. 2 on the front side (North) of the building and 1 on each back side (East and West) side.
- **Security**
- Building has keyed locked doors on the front side and back side. The back side exits have STOP alarms that are used to prevent AWOA.
- The upper level is only accessible to authorized staff (Rec, Maint., Safety)
- The basement is used as a storm shelter and currently has nothing in it. It also connects to the tunnel.
- The building will be undergoing major renovation in 2019. This will be updated on the 2020 HVA.

Suicide Risk Assessment

Location	Findings	Person Responsible	Procedure/Control or Repair/Remove
Basement	Steam pipes exposed		Area not accessible to youth. Has padlocked gate.
Bathrooms	Hidden/remote areas – stalls		• Staff supervise clients when room is in use. • Suicidality Assessments performed • The Level System assesses the level of observation necessary and whether the level needs to be increased or decreased.
Upstairs & basement	Not accessible. Padlocked gate.		Area not accessible to youth. Has padlocked gate.

BUILDING 27

- Built in 2019
- Single story building
- Automatic Sprinkler System



Physical layout of building:

- **EXITS-**
  - 5 exits. 1 on the north side, 1 on east side, 1 on west side, and 2 on south side.
- **Security**
- Building has electronic locked doors on all exits.

South Wing:
- Cafeteria, Kitchen, Mechanical and PVC rooms

Middle Wing:
- Group rooms, exam room, evaluation room, admission room, staff break room

North Wing:
- School classrooms, Art Room, Mechanical room

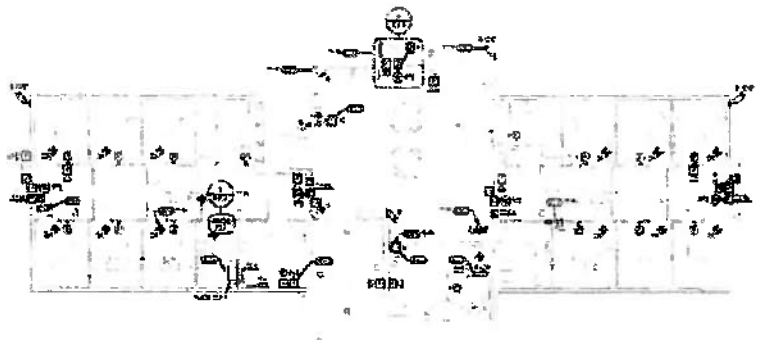
Building 27

Suicide Risk Assessment

Location	Findings	Person Responsible	Procedure/Control or Repair/Remove
Bathrooms	• Automatic door closers • Door knobs		• Staff supervise clients. • Suicidality Assessments performed • The Level System assesses the level of observation necessary and whether the level needs to be increased or decreased. • The staffing ratio is 1:4 for days and 1:6 for nights.
Group/Meeting Rooms	• Automatic door closers • Door hinges • Door knobs		
Exam/Admit Evaluation rooms	•		
Cafeteria	•		
PVC Room and Kitchen	•		
School	•		

BUILDING 28/29

- Built in 2019
- Single story building
- Automatic Sprinkler System
- Mirror Images of each other



Physical layout of building:

- **EXITS-**
  - 3 exits. 1 on the north/south side, 1 on east side, 1 on west side.
- **Security**
- Building has electronic locked doors on all exits.

West/East Wings

- Client rooms, Mechanical Room, Bathrooms and Mechanical Room

Middle Wing

- Day hall, weight room/storm shelter, storage room.

Building 28/29

Suicide Risk Assessment

Location	Findings	Person Responsible	Procedure/Control or Repair/Remove
Bathrooms	• Automatic door closers • Door knobs		• Staff supervise clients. • Suicidality Assessments performed • The Level System assesses the level of observation necessary and whether the level needs to be increased or decreased. • The staffing ratio is 1:4 for days and 1:6 for nights.
Client Rooms	• Automatic door closers • Door hinges • Door knobs		
Weight Room/Storage	•		
Day hall area	•		

Grounds, General

HASTINGS REGIONAL CENTER
Grounds/General

Suicide Risk Assessment

Location	Findings	Person Responsible	Procedure/Control or Repair/Remove
Grounds	Garages by Building 7 – falling in, doors hanging open, lot of junk inside them	Maintenance Dept.	Clients are to walk on sidewalks. Clients have access to the grounds based on a level system which assesses their safety level and are supervised by staff at all times. There are boundary maps to define the safe areas for clients
Roadways	Several bad spots.	Maintenance Dept.	Roadways are repaired as funds permit. The roadways where clients walk have been repaired.

2020 ANNUAL HAZARD VULNERABILITY ASSESSMENT
July 21st, 2020
9:00 AM

Present: Grant Johnson, Safety Coordinator; Ted Buck, Maintenance Supervisor; Marj Colburn, Facility Administrator; James Schulte, Activities Supervisor; Lisa Stramel, Housekeeping/Dietary Supervisor;

The purpose of this meeting is to complete the annual Hazard Vulnerability Assessment for the Hastings Regional Center (HRC). This assessment evaluates the probability, extent of risk and preparedness of HRC for natural, technological and human events and/or hazards. The assessment is completed using the form by the American Society for Healthcare Engineering of the American Hospital Association.

Hastings Regional Center is a Residential Substance Abuse Treatment Facility operated by the Nebraska Health and Human Services System. It is located on the west edge of Hastings and covers approximately 25 acres with several buildings. The Hastings Juvenile Chemical Dependency Program is in Building 3 with a maximum of 24 licensed beds.

The campus also includes an Administration Building, A chapel which has been converted into a gymnasium, Maintenance Shop, and several other buildings which are no longer in use. There are 3 main parking lots and several lesser parking areas.

Each item was reviewed for probability of an event happening; the risk associated with the item in terms of life safety and/or disruption to the facility; and the preparedness of the facility to handle the event through pre-planning, procedures put into place, internal resources and external resources. Each item was reviewed to determine if any changes had taken place in the past year, which would alter the previous scores.

Internal fire, civil disturbance, epidemic and tornado scored the same for vulnerability. As a residential treatment program with all ambulatory young males with no serious medical concerns our risks are lowered for many of the possible events. Contraband searches continue to discover smoking related materials brought in by youth after visits. This was used as a determining factor in the probability of an internal fire. The buildings are fully sprinkled and there is a minimal amount of flammable material so the preparedness was rated "good".

Epidemic was upgraded to a medium probability following the 2020 worldwide Covid-19 Coronavirus pandemic. HRC did have a large disruption but preparedness was good due to all the preventive measures taken.

Civil Disturbance is rated with the same vulnerability due to the backgrounds of the youth and possible gang memberships. All staff are trained in Handle with Care and taught to recognize the warning signs and steps to take to prevent a major disturbance but the threat remains.

A tornado event could cause great health and safety risks but our preparedness is good.

Other weather related events are the vulnerabilities ranked below fire, civil disturbance and tornado. Blizzards, ice storms and severe thunderstorms would all have the same disruption as staffing is the major issue in these types of events. Other issues are minor as the buildings have a generator and there is plenty of food and water available for youth and staff to shelter for several days.

Following are the areas identified as the most vulnerable:

2020 HVA		2019 HVA		2018 HVA	
Event	Rating	Event	Rating	Event	Rating
1. Epidemic	8	1. Tornado	8	1. Tornado	8
2. Tornado	8	2. Civil Disturbance	8	1. Civil Disturbance	8
3. Civil Disturbance	8	3. Fire, Internal	8	2. Fire, Internal	8
4. Blizzard or Ice	6	4. Water Failure	8	3. Water Failure	8
5. Wildfire	6	5. HVAC Failure	8	4. HVAC Failure	8
6. Fire, Internal	6	6. Blizzard or Ice Storm	6	5. Blizzard or Ice Storm	6
7.		7. Temperature Extreme	6	6. Temperature Extreme	6
8.		8. Flood, Internal	6	7. Flood, Internal	6
9.		9. Wild Fire	6	8. Wild Fire	6

The following changes were made to the 2020 Assessment:

- The worldwide Pandemic Covid-19 Coronavirus affected daily operations.
- Electrical, Water, Steam and HVAC failures were reduced due to the new utilities being installed on campus.

The following table shows the location, types and amounts of fuels used by the facility for generators:

Building #	**Type of Fuel**	**Am't of Fuel**	**How long it lasts**	**Supplier**	**Length of time to supply**
3	Diesel	2800 gallons above ground	8 to 10 days which is approx. 14.5 gal/hr.	CPI, Bosselmans, Thompson Oil	Within 24 hours
Lift station (26)	Natural Gas	pipeline	As long as it is not interrupted	Hastings Utilities	Continuous Supply
Power plant (16)	Diesel for generator Natural gas for boiler.	600 gallons above ground of diesel	3 to 4 days	CPI, Bosselmans, Thompson Oil Hastings Utilities	Within 24 hours Continuous supply

Mitigation, Preparedness, Response and Recovery For Hospital Emergency Response Plans						
Emergency Type	**Probability**	**Severity**	**Mitigation**	**Preparedness**	**Response**	**Recovery**
Epidemic	Medium	Health & Safety	• Hazard vulnerability analysis performed. • EOC Emergency policies and procedures. • Following proper procedures during the pandemic. • Staffing protocols keeping interactions between the units minimal •	• DHHS cooperation. • Backup systems testing • Staff training and participation in infection control protocol • Isolation units set up and supply carts made. • Procedures developed for daily temperature checks on both staff and youth. • Visitors suspended during the pandemic. • Regular infection control meetings held.	• Activate emergency procedures, as appropriate. • Internal, external notifications.	• Comprehensive assessment of the response to the pandemic. • Replenish supplies. • Prepare for when it happens again. • Continue to educate staff and youth on preparedness.
Tornado & Severe Thunderstorms & other Weather Related Events	Moderate	Health & Safety	• Hazard vulnerability analysis performed. • EOC Emergency policies and procedures. • Following proper procedures when tornado warnings are in effect. • Updating of storm procedures, storm supplies and emergency procedure cards when indicated. • Staffing protocols for holding staff over when necessary • Extra food supplies kept for disasters and other events.	• Community cooperation. • Backup systems testing • Staff training and participation when warnings are in effect. • Storm carts moved to safer area.	• Activate emergency procedures, as appropriate. • Internal, external notifications • Initial damage assessment. • Call fire department/Adams County Emergency Manager for assistance if appropriate. • Staff held over if necessary. • Meals available for staff held over if necessary.	• Comprehensive damage assessment of critical systems/structure(s), if applicable. • Replenish supplies. • Identification of necessary repair/restoration work and establishment of a repair/restoration timetable. • Post-repair/restoration survey and approval, including certification by the local jurisdiction(s) having authority, if applicable. • Internal and external notification. • Documentation of disaster response and recovery costs. • Review response procedures
Civil Disturbance	Moderate	Health, Safety	• Hazard vulnerability analysis performed • EOC Emergency policies and procedures on "Threatening Behavior and Violence in the Workplace". • Security cameras in place on units and cameras in the cafeteria where more youth are congregated. • Self-locking doors placed on cafeteria doors where large numbers of youth are. • Contraband searches completed to look for hazardous material. • Electronic lock door system for all entry and exit from building and units. • Staff use earbuds on radio to keep conversations secure.	• Staff training through actual occurrences. • Staff training on the signs of gang activity • Staff training in Handle with Care and hold restraint of youth in incident • All front-line staff carry 2-way radios to aid in help calls. • Meetings with Law Enforcement agencies and area schools to familiarize the entities with procedures at Hastings Regional Center and the response we can expect when aid is requested. Also to ensure that extra help is available quickly and that all individuals in community are notified as necessary if a youth absconds.	• Activate emergency procedures, as appropriate. • Internal, external notifications • Initial damage assessment. • Collaborate with the local Law enforcement.	• Replenish supplies. • Internal and external notification. • Documentation via Critical Incident Review (CIR) • Identify issues and resolve through appropriate means.
Fire, Internal	Moderate	Life Threatening	• Frying appliances prohibited; no space heaters allowed. • EOC Emergency policy and procedures in place • Building sprinkled. • Fire equipment tested and maintained on regular basis • No smoking allowed on campus. Contraband searches for smoking materials done after visits.	• Agreements made with LRC and YRTC Kearney for evacuation. • Staff training of YSS's for fire panel responses. • Quarterly fire drills held for all staff. • Knox box with keys to building placed outside for Fire Dept. personnel access.	• Activate emergency procedures, as appropriate. • Internal, external notifications • Initial damage assessment. • Fire Dept. personnel tour campus	• Replenish supplies. • Internal and external notification. • Documentation of disaster response and recovery costs. • Review response procedures

			• Bldg. has little flammable material & bldg. is concrete.

Jacobe, Camella

From: Johnson, Grant
Sent: Monday, February 8, 2021 12:46 PM
To: Jacobe, Camella
Subject: RE: Ombudsman info needed

We had 0 assaults on staff in 2020.

The reports Corinne should have. I know we had a PRTF inspection and child care in 2020. Internal reports I have and can email you as soon as I get a minute.

Ted Buck should have the fire marshal reports and inspections.

Subject: Ombudsman info needed

Grant,

I have the Ombudsman requesting the below information. Could you let me know who I could contact to get this information, so I can get a response back to the Ombudsman by the end of the week?

B. The number of assaults on staff for calendar year 2020

C. Please provide a copy of the most recent inspections or audit reports for calendar year 2020. To include, but not limited to reports from the Fire Marshal's office, DHHS inspections, internal safety, emergency inspections, independent standards audits, Licenses, etc.

Thanks,

Camella Jacobe | *State Compliance Coordinator*

NEBRASKA STATE FIRE MARSHAL'S OFFICE

Contractor's Material and Test Certificate for Aboveground Piping

PROCEDURE
Upon completion of work, inspection and tests shall be made by the contractor's representative and witnessed by an owner's representative. All defects shall be corrected and system left in service before contractor's personnel finally leave the job.

A certificate shall be filled out and signed by both representatives. Copies shall be prepared for approving authorities, owners and contractor. It is understood the owner's representative's signature in no way prejudices any claim against contractor for faulty material, poor workmanship, or failure to comply with approving authority's requirements or local ordinances.

OPERATION ☐ PNEUMATIC ☐ ELECTRIC ☐ HYDRAULIC

PIPING SUPERVISED ☐ YES ☐ NO | DETECTING MEDIA SUPERVISED ☐ YES ☐ NO

DOES VALVE OPERATE FROM THE MANUAL TRIP AND/OR REMOTE CONTROL STATIONS ☐ YES ☐ NO

IS THERE AN ACCESSIBLE FACILITY IN EACH CIRCUIT FOR TESTING? ☐ YES ☐ NO | IF NO, EXPLAIN

MAKE	MODEL	DOES EACH CIRCUIT OPERATE SUPERVISION LOSS ALARM		DOES EACH CIRCUIT OPERATE VALVE RELEASE		MAXIMUM TIME TO OPERATE RELEASE	
		YES	NO	YES	NO	MIN.	SEC.

PRESSURE REDUCING VALVE TEST

LOCATION & FLOOR	MAKE & MODEL	SETTING	STATIC PRESSURE		RESIDUAL PRESSURE (FLOWING)		FLOW RATE
			INLET (PSI)	OUTLET (PSI)	INLET (PSI)	OUTLET (PSI)	FLOW (GPM)

TEST DESCRIPTION

HYDROSTATIC: Hydrostatic tests shall be made at not less than 200 psi (13.6 bars) for two hours of 50 psi (3.4 bars) above static pressure in excess of 150 psi (10.2 bars) for two hours. Differential dry-pipe valve clappers shall be left open during test to prevent damage. All aboveground piping leakage shall be stopped.

PNEUMATIC: Establish 40 psi (2.7 bars) air pressure and measure drop, which shall not exceed 1-1/2 psi (0.1 bars) in 24 hours. Test pressure tanks at normal water level and air pressure and measure air pressure drop, which shall not exceed 1-1.2 psi (0.1 bars) in 24 hours.

TESTS

ALL PIPING HYDROSTATICALLY TESTED AT 200 PSI FOR 2 HRS. | IF NO, STATE REASON
DRY PIPING PNEUMATICALLY TESTED ☐ YES ☐ NO
EQUIPMENT OPERATES PROPERLY ☐ YES ☐ NO

DRAIN TEST | READING OF GAUGE LOCATED NEAR WATER SUPPLY TEST CONNECTION: 35 PSI | RESIDUAL PRESSURE WITH VALVE IN TEST CONNECTION OPEN WIDE 30 PSI

UNDERGROUND MAINS AND LEAD IN CONNECTIONS TO SYSTEM RISERS FLUSHED BEFORE CONNECTION MADE TO SPRINKLER PIPING.
VERIFIED BY COPY OF THE U FORM NO. 85B ☐ YES ☐ NO
FLUSHED BY INSTALLER OF UNDERGROUND SPRINKLER PIPING ☐ YES ☐ NO
OTHER EXPLAIN

IF POWDER DRIVEN FASTENERS ARE USED IN CONCRETE, HAS REPRESENTATIVE SAMPLE TESTING BEEN SATISFACTORILY COMPLETED? ☐ YES ☐ NO | IF NO, EXPLAIN

BLANK TESTING GASKETS

NUMBER USED	LOCATIONS	NUMBER REMOVED

WELDING

WELDED PIPING ☐ YES ☐ NO

IF YES . . .

DO YOU CERTIFY AS THE SPRINKLER CONTRACTOR THAT WELDING PROCEDURES COMPLY WITH THE REQUIREMENTS OF AT LEAST AWS D10 9. LEVEL AR-3? ☐ YES ☐ NO

DO YOU CERTIFY THAT THE WELDING WAS PERFORMED BY WELDERS QUALIFIED IN COMPLIANCE WITH THE REQUIREMENTS OF AT LEAST AWS D10 9. LEVEL AR-3? ☐ YES ☐ NO

DO YOU CERTIFY THAT WELDING WAS CARRIED OUT IN COMPLIANCE WITH A DOCUMENTED QUALITY CONTROL PROCEDURE TO INSURE THAT ALL DISCS ARE RETRIEVED, THAT OPENINGS IN PIPING ARE SMOOTH, THAT SLAG AND OTHER WELDING RESIDUE ARE REMOVED, AND THAT THE INTERNAL DIAMETERS OF PIPING ARE NOT PENETRATED? ☐ YES ☐ NO

CUTOUTS (DISCS)

DO YOU CERTIFY THAT YOU HAVE A CONTROL FEATURE TO ENSURE THAT ALL CUTOUTS (DISCS) ARE RETRIEVED ☐ YES ☐ NO

Contractor's Material and Test Certificate for Aboveground Piping

PROCEDURE
Upon completion of work, inspection and tests shall be made by the contractor's representative and witnessed by an owner's representative. All defects shall be corrected and system left in service before contractor's personnel finally leave the job.

A certificate shall be filled out and signed by both representatives. Copies shall be prepared for approving authorities, owners and contractor. It is understood the owner's representative's signature in no way prejudices any claim against contractor for faulty material, poor workmanship, or failure to comply with approving authority's requirements or local ordinances.

PRESSURE REDUCING VALVE TEST

LOCATION & FLOOR	MAKE & MODEL	SETTING	STATIC PRESSURE		RESIDUAL PRESSURE (FLOWING)		FLOW RATE
			INLET (PSI)	OUTLET (PSI)	INLET (PSI)	OUTLET (PSI)	FLOW (GPM)

TEST DESCRIPTION

HYDROSTATIC: Hydrostatic tests shall be made at not less than 200 psi (13.6 bars) for two hours of 50 psi (3.4 bars) above static pressure in excess of 150 psi (10.2 bars) for two hours. Differential dry-pipe valve clappers shall be left open during test to prevent damage. All aboveground piping leakage shall be stopped.

PNEUMATIC: Establish 40 psi (2.7 bars) air pressure and measure drop, which shall not exceed 1-1/2 psi (0.1 bars) in 24 hours. Test pressure tanks at normal water level and air pressure and measure air pressure drop, which shall not exceed 1-1.2 psi (0.1 bars) in 24 hours.

TESTS

ALL PIPING HYDROSTATICALLY TESTED AT 200 PSI FOR 2 HRS. | IF NO, STATE REASON

DRY PIPING PNEUMATICALLY TESTED ☐ YES ☐ NO

EQUIPMENT OPERATES PROPERLY ☐ YES ☐ NO

DRAIN TEST | READING OF GAUGE LOCATED NEAR WATER SUPPLY TEST CONNECTION: 35 PSI | RESIDUAL PRESSURE WITH VALVE IN TEST CONNECTION OPEN WIDE 30 PSI

UNDERGROUND MAINS AND LEAD IN CONNECTIONS TO SYSTEM RISERS FLUSHED BEFORE CONNECTION MADE TO SPRINKLER PIPING.

VERIFIED BY COPY OF THE U FORM NO. 856 ☐ YES ☐ NO | OTHER EXPLAIN

FLUSHED BY INSTALLER OF UNDERGROUND SPRINKLER PIPING ☐ YES ☐ NO

Contractor's Material and Test Certificate for Aboveground Piping

PROCEDURE
Upon completion of work, inspection and tests shall be made by the contractor's representative and witnessed by an owner's representative. All defects shall be corrected and system left in service before contractor's personnel finally leave the job.

A certificate shall be filled out and signed by both representatives. Copies shall be prepared for approving authorities, owners and contractor. It is understood the owner's representative's signature in no way prejudices any claim against contractor for faulty material, poor workmanship, or failure to comply with approving authority's requirements or local ordinances.

Hi Camella,

As discussed, please see the following information that I am interested in obtaining from YRTC- Geneva and Hastings Regional Center for Calendar year 2020:

Requested Information:

A. Facility Staffing Levels as of December 31, 2020:

1. The number of positions filled as of December 31, 2020
2. The number of positions vacant as of December 31, 2020
3. The number of positions needed in your HR staffing plan for FY21
4. The number of positions filled in your HR staffing plan for FY21 as of December 31, 2020
5. The aggregate turnover rate for the period of 12/2019 - 12/31/2020
6. The number of vacant positions as of December 31, 2020

B. The number of assaults on staff for calendar year 2020

C. Please provide a copy of the most recent inspections or audit reports for calendar year 2020. To include, but not limited to reports from the Fire Marshal's office, DHHS inspections, internal safety, emergency inspections, independent standards audits, Licenses, etc.

If you have any questions, please call and have a great weekend

Yours Truly,

--

Subject: RE: Ombudsman information

Hey Camella,

Here is what we were able to pull together:

We had a some construction work/remodel going on in the Admin building at Geneva in 2020, below are the dates that Fire Marshall was involved. Other than these dates, I don't believe we had any other major construction projects that would have been under my watch at Geneva during 2020.

Fire Marshall Design Plan Review – 2/18
Fire Marshall Project Check ins – 4/8, 5/22, 8/12
Fire Marshall Final Walk-through – 10/8

Thanks,

Kenny Zoeller, C.L.S.S.Y.B.

COMMISSION ON ACCREDITATION FOR CORRECTIONS

STANDARDS COMPLIANCE REACCREDITATION AUDIT

Nebraska Department of Health & Human Services
Youth Rehabilitation and Treatment Center - Kearney
Kearney, Nebraska

July 8 - 10, 2020

VISITING COMMITTEE MEMBERS

Gregory T. Knowlin, Chairperson
ACA Auditor

Roger Chute
ACA Auditor

Randy P. Cross
ACA Auditor

A. Introduction

The audit of the Nebraska Department of Health and Human Services Youth Rehabilitation and Treatment Center – Kearney, Kearney, Nebraska was conducted on July 8-10, 2020 by the following team: Gregory T. Knowlin, Chairperson; Roger Chute, Member; and Randy Cross, Member.

B. Facility Demographics

Rated Capacity:	172
Actual Population:	68
Average Daily Population for the last 12 months:	95
Average Length of Stay:	9 ½ Months
Security/Custody Level:	Medium
Age Range of Offenders:	14-18
Gender:	Male and Female
Full-Time Staff:	156

Administrative -5, Support - 18, Program - 161, Security - 19, Part-Time Staff - 16

C. Facility Description

The Youth Rehabilitation and Treatment Center – Kearney (YRTC – Kearney) is operated by the Nebraska Department of Health and Human Services. The Facility is located at 2802 30th Avenue on the western side of Kearney, Nebraska. Kearney is located in south central Nebraska approximately 130 miles west of Lincoln, Nebraska. YRTC – Kearney opened in 1879, was the only state operated facility for delinquent males. In August 2019 YRTC – Kearney received its first female youths. The Population of youth are classified as medium security, the physical facility is an open campus with 12 foot perimeter fencing being added for additional security in January 2019. Additional extension to the perimeter fence was added in January 2020, with a completion to the addition of the fence being completed in July 2020.

The Dodge Administration Building; Morton, Washington, Lincoln, Bryant, Creighton, and Dickson living units; West Kearney High School; the Dining Hall; Chapel; Boiler Plant; Maintenance Building; and outdoor recreational areas are located on 30 acres on the campus. Most of the buildings are connected with a tunnel system that houses utility services and steam heat pipes. The tunnels also serves as tornado evacuation shelters for the staff and youth.

The Dickson living unit is also called the Behavior Stabilization Unit, which houses male youth that are non-compliant and exhibited assaultive behavior. The youth length of stay in the living unit is a two week process with four phases that must be completed prior to being released. The Bryant living unit is an open unit that houses males that have vulnerable concerns in the general population. During the audit there were nine youth assigned to the living unit. The Creighton, Washington, and Lincoln living units houses male youths in an open unit setting with general population youth.

The Morton living houses the female youths. During the audit there were 15 female youths assigned to the living unit, with a maximum capacity for 42 rooms.

D. Pre-Audit Meeting

On July 7, 2020 at approximately 8:00pm only one team member was able to meet with officials from TRTC – Kearney to discuss information provided by the ACA at Cunningham's on the Lake for dinner. The other two auditors had travel delays.

The chairperson divided standards into the following groups:

Standards # 5A-01 through 6E-14 to Gregory T. Knowlin (Chairperson)
Standards # 1A-01 through 3E-01 to Roger Chute (Member)
Standards # 4A-01 through 4E-07 & 6F-01 through 6G-14 to Randy Cross (Member)

E. The Audit Process

1. Transportation

   The team was escorted to the facility by Nikki Berggren, Juvenile Justice Administrator.

2. Entrance Interview

   The audit team proceeded to the proceeded to the Conference Room B where they met with Facility Administrator, Paul Gordon, Facility Director, Mark Labouchardiere, Facility Program Manager, Cindy Krolikowski, and Nikki Berggren, Juvenile Justice Administrator. The team expressed the appreciation of the Association for the opportunity to be involved with the Youth Rehabilitation and Treatment Center – Kearney in the reaccreditation process.

   Paul Gordon, Facility Administrator escorted the team to the Canteen where the formal entry meeting was held.

   The following persons were in attendance:

   Scott English, Director of School
   Sara Thomas, Clinical Program Director
   Cindy Krolikowski, Facility Program Manager
   Laura Bugay, Mental Health Supervisor
   JoDeen Swartz, Admin. Assistant Compliance
   Gary Leffler, Compliance Specialist
   Joni Suhr, Nursing Supervisor
   Theresa Childers, Food Service Supervisor
   Daniel Cole, Religious Coordinator
   Chris Hellerich, Unit Manager

Tyler Mertens, Unit Manager
James Orme, Food Service Director
Holly Trumball, Unit Manager
Chris Nemetz, Unit Manager
Camella Jacobe, YRTC-Geneva Facility Administrator
Nancy Krueger, Admin. Assistant YRTC – Kearney
Fred Boon, Compliance Specialist
Ralph Healey, Compliance Specialist
Paul Gordon, YRTC – K Facility Administrator
Rita Uldrich, Business Manager
Mark LaBouchardiere, Facilities Director
Nicole Berggren, Juvenile Justice Administrator

It was explained that the goal of the visiting team was to be as helpful and non-intrusive as possible during the conduct of the audit. The chairperson emphasized the goals of accreditation toward the efficiency and effectiveness of correctional systems throughout the United States. The audit schedule was also discussed at this time.

3. Facility Tour

The team toured the entire facility from 10:00 a.m. to 1:30 p.m. on the first day of the audit. The second day of the audit the audit team completed the tour of the facility from 8:10 a.m. to 10:17 a.m. The following persons accompanied the team on the tour and responded to the team's questions concerning facility operations:

Paul Gordon, YRTC – K Facility Administrator
Nicole Berggren, Juvenile Justice Administrator
Ralph Healey, Compliance Specialist
Fred Boon, Compliance Specialist
Gary Leffler, Compliance Specialist
Cindy Krolikowski, Facility Program Manager
Mark LaBouchardiere, Facility Director

The audit team observed Audit notices were posted throughout the facility, and Staff and youth were aware of the audit.

4. Conditions of Confinement/Quality of Life

During the tour, the team evaluated the conditions of confinement at the facility. The following narrative description of the relevant programmatic services and functional areas summarizes the findings regarding the quality of life.

Security:

Security of juveniles and of the facility is achieved through a combination of methodologies. All staff members provide direct, "eyeball", supervision of youth. Primary security duties are assigned to direct care staff. Direct supervision is augmented by 167 motion sensor cameras that have the capability to record and maintain sixty (60) days, minimally, of video. Since the last audit, about 33 acres of the facility have been enclosed by a perimeter fence. Work continues to enhance the fence by adding to the height resulting in a (15) foot "candy cane" type fence. The extensions have not been completed on some gates. The fence is designed to prevent youth from grasping and propelling themselves over the fence. The fence is well maintained with no weak areas observed. The enhanced fence has resulted in a reduction in the number of escapes from the facility.

Exterior doors are locked and are opened electronically. There is control center that is operational and staffed around the clock. Personnel assigned to the control center monitor radio communication, movement of residents, fire alarm system, and cameras. Perimeter fence checks are routinely conducted.

There are two electronic "walk gates" that are opened by swiping the employee badge. There are also two vehicle (truck) gates that are opened remotely or by staff badge. One "man gate" is located on each side of the fence to allow staff to more readily pursue, by foot, youth attempting to escape custody. Finally, there is one additional double truck gate that is padlocked. Knox boxes have been installed as recommended at the previous audit.

Verbal de-escalation is the primary and preferred method of controlling youth behavior. Staff members are well trained in appropriate de-escalation techniques and safe physical management techniques. Use of chemical agents is prohibited.

Tools and culinary equipment were managed at a high level with all areas storing tools doing so in a secure area. Accurate inventories are maintained, and a well-organized system of check-in and check-out is present and is followed. The system includes reconciliation daily or at shift change. Most tools are maintained on shadow boards. Sharps were also securely stored and inventoried. A single staff member is designated to maintain locks and cut new keys when needed.

Custody staff are trained to manage incidents using verbal de-escalation techniques, appropriate physical intervention and self-defense techniques, specifically, Handle with Care. These techniques are reinforced, annually, through planned training.

Environmental Conditions:

The grounds surrounding the facility had no loose papers, clutter or litter of any kind.

The grounds are appropriately landscaped giving the facility a pleasant "curb appeal". Living units are well maintained, neat and orderly. Adequate space is provided for individual counseling and group meetings.

Temperature controls were adequate, in compliance with local statutory requirements, and maintained at a comfortable level during the audit. Use of natural light and artificial light is ample and adds to the pleasantness of the facility. Living areas, the education department, and all other areas of the facility use artificial and natural light in an effective manner making the facility feel comfortable. Noise levels were at acceptable ranges. Air circulation and lighting levels were maintained in compliance with standards.

Provision for garbage pick-up services is provided by the City of Kearney with daily pick-up. There are sufficient covered receptacles available throughout the facility. Potable water is provided by the Kearney public utility company. YRTC-Kearney is connected to the public sewer system. Toilets and washbasins were found to be insufficient in the female housing unit, Morton, and related standard found in non-compliance since the ratio of toilets and sinks was 1:15. Other areas of the facility had adequate numbers of toilets and sinks for the residents and staff in the facility.

The facility was well maintained showing commitment to preventative maintenance. There was no evidence of water damage or pest infestation.

The audit team inspected the janitor closets, rooms housing electrical equipment and pipe chasses. There were no major problems or potential hazards noted in these areas.

The facility was graffiti free.

Sanitation:

During the tour and subsequent visits, the observed the buildings to be clean. There was little indication of the presence of yesterday's dirt. Staff members obviously take pride have "buy in" to the appearance of the facility and demonstrate adherence to the facility's housekeeping plan that involves daily, weekly, and monthly cleanings. Residents are responsible for cleaning their living areas. There were no offensive odors noted in the facility.

Health department inspections of YRTC-Kearney were reviewed and found to be in order. No major deficiencies have been cited.

Fire Safety:

Inspections of fire safety equipment and prevention practices are completed in a thorough and timely manner. The facility's safety officer conducts all inspections and participates in the annual inspections by fire, health and safety officials. Annual inspections of the fire alarm system, sprinkler system, hood suppression system, and fire extinguishers are conducted by Protex Central.

Outside fire protection services are provided by the Kearney Fire Department with response coming from a station located close by, approximately four blocks away with a response time of five minutes or less. Fire extinguishers were located throughout the facility. Fire extinguishers were charged, appeared to be in good working order, and had been inspected monthly with exception of one located in the vocational had not been checked since May 2020; however, there has been no use of the area since that time since the school is on a summer schedule. As noted, the facility utilizes a contract with a licensed vendor who visits the facility and maintains the extinguishers and the hood suppression system in the kitchen. Plans are submitted to the local authority having jurisdiction as required. Fire drills and had been periodically conducted. Youth and staff interviewed knew what they are required to do during these drills. The facility carefully reviews the fire specifications of any furnishing that are being considered for purchase.

The facility, overall, has a good program for the control of flammable, toxic and caustic materials. Control begins with purchase in that the facility purchases chemical that are less hazardous. Bulk chemicals that are hazardous items are stored properly. Proper inventories are maintained, and the documentation clearly indicates the issuance, use and return to storage of these supplies. The team encountered one problem with proper storage of a product, HDQ Neutral, in the barber shop. The team brought to the attention of facility staff who immediately resolved the issue. It was recommended that the Safety Data Sheet books kept in areas when there were hazardous products were maintained be reviewed and that SDS for products kept in the area be removed.

The facility has six back-up generators for use in the event electrical power is disrupted. Five of the generators are natural gas fueled and one is diesel powered. Generators are routinely inspected to assure they are operational when needed.

During the tour, the team noted that the evacuation plans posted in many locations were adequate. The diagrams depicted clear designation of primary and secondary evacuation routes. There was indication of "you are here" making easy to read the plan. It was noted that some of these posted plans bear dates that are several years old, and it was recommended that the dates be updated at the next review.

Food Service:

Food service is located in the renamed Gomez Dining Hall after receiving female youths. The building contains two dining halls, the kitchen, food storage areas, the facility warehouse, and laundry. The food service staff consist of one Food Service Director, one Food Service Supervisor, six Food Service Staff. There are four vacancies during the audit for food service staff. No youth are assigned to work in the Dining Hall.

Three meals are served daily: breakfast from 6:30 a.m. until 7:30 a.m., lunch from 11:30 a.m. until 12:30 p.m., and dinner from 5:30 p.m. until 6:30 p.m. (on weekends, breakfast is one hour later, and lunch is 30 minutes later). Snacks are available at 4:00 p.m. and 8:00 p.m. The menu is developed on a five-week cycle. Menus are approved by a registered dietician. The food service program participates in the USDA Child Nutrition Program. During January 2020 thru June 2020 a total of 64,000 meals were served.

During the audit the dining halls were not being utilized due to COVID-19 and social distancing guidelines that were being adhered to the facility. Each housing unit was escorted to the dining hall, where they received their trays and returned to their housing unit to eat their meals. The kitchen and dining were clean; very clean. All temperatures were checked by the audit team and found to be in compliance with standards. Tool control of the kitchen utensils were accounted for and located on appropriate shadow boards.

Special diets were provided when ordered by medical staff. Religious diets are provided with the approval of the Religious Coordinator.

The audit team ate lunch on Wednesday in the conference room. The lunch meal consisted of meat nachos, salad, mixed berries salad, and a choice of beverage. The meal had adequate portions and the temperature were appropriate. The meal was tasteful and appropriately seasoned. Several youth interviewed about the meals had no complaints about the meals being served at the facility.

Medical Care:

The medical unit is located in a building connected to Creighton cottage. The medical area contains one examination room, two offices, a medication storage area, a general storage area and a dental suite. There is a waiting area for patients that has access to water, a bathroom, educational materials and health pamphlets.

The medical authority is Dr. Rogers and he visits the unit one day a week. Staff includes a full-time nursing supervisor (RN), who oversees the day to day delivery of care. There is also one full-time registered nurse, one full-time licensed practical nurse and a RN who works “on call” as needed. Shifts are normally ten hours a day, five days a week.

The weekend is covered by a five- hour shift on both Saturday and Sunday. During off hours the nursing supervisor and the medical authority are on call.

Although there is a centralized medical unit, medical staff routinely is moving about the campus and interacting with the residents. All new medical personnel receive facility orientation, medical orientation and OJT training. All nurses have basic life support certification through the American Heart Association. Nurse supervisor, Joni Suhr, presented a genuine enthusiasm for the care of the residents, which is shared by the other medical staff. A number of the residents refer to Ms. Suhr as Mama Suhr.

The residents received at YRTC have a history of high-risk behaviors, or there is a likelihood of a lack of previous medical care, have mental health issues and are more susceptible to chronic illnesses. Residents arriving at the facility receive a health screening within one hour of arrival. They receive a full nurse's assessment within two to three days which includes bloodwork. The residents are then seen by the physician within seven days, who also has access to the results of the blood work. This exceeds the standard.

Also, upon admittance the residents receive a manual to aid in the adjustment to the correctional setting. This document contains information regarding medical services, sick call process, grievance procedures and hygiene rules. The residents are also informed about MRSA, AIDS, Hepatitis and the spread of HIV through blood-borne pathogens. Additionally, they are provided with written material designed to help them complete the treatment program.

YRTC has a disability placement program that provides housing accessible to residents with needs. This includes accessible lockers, beds with grab bars, accessible TTY phones, volume control phones and accessible dayroom tables. Residents needing disability services are housed in the Dickson living unit.

YRTC users Kearney Regional Medical Center and CHI Good Samaritan Hospital for inpatient treatment. There is an agreement for emergency transportation with Kearney Fire EMS which has a response time of three to four minutes. Also, Good Samaritan ambulance can be utilized with the response time of five to seven minutes. Non-emergent medical transportation is done by facility staff to either a hospital or a community provider for offsite appointments and consultations.

During the last audit there was a recommendation for a response vehicle for medical staff to use during emergencies due to the vast size of the complex. A vehicle has since been acquired and is utilized as needed. The medical staff maintains an emergency response bag which contains emergency protocol medications.

Sick call is accessed through a written request placed in a designated, lockbox in the housing units. Sick call is provided seven days a week in general population and in the special housing unit, Dickson cottage.

The average number of monthly patient encounters is between 175 and 200. This includes sick call as well as basic health issues and educational encounters with residents of the facility. Sick call requests are triaged daily and the patient is normally seen within two to three days. Any patient with symptoms is seen within 24 hours.

Specialty services such as optometry, orthopedics, physical therapy, ENT, dermatology, ophthalmology and audiology are provided through contracted offsite specialists. The turnaround time to see a specialist normally is one to two weeks. Chronic health issues such as asthma and diabetes are addressed on campus with scheduled clinics and treatment. Patients who require infirmary level care or negative pressure rooms are admitted to one of the two hospitals utilized.

YRTC has a dispensary and acquires its medications through Diamond Pharmacy. Ordered medications are normally delivered next day by FedEx. STAT medications are provided through the local Walgreens pharmacy. There are a number of stock medications maintained at YRTC. The RN supervisor audits the dispensary weekly. Medications are stored in a medication room and secured behind double locks. A random inventory count on sharps, controlled medications and narcotics was conducted during the audit. All inventories were accurate, up-to-date and well documented.

Youth Program Specialists (YPS) are trained to administer medication to the residence during off hours of the medical staff. The training is done by the nursing supervisor and documented in training records. Certifications were reviewed during the audit were found to be current. Medications are administered two times a day seven days a week. Administration times are 7:00 a.m. and 6:00 p.m. The medications are administered from secure medication cabinets within the individual cottages.

A paper Medication Administration Record (MAR) is utilized for documentation. It was the auditors' recommendation that consideration be given to converting the MAR to an electronic file that will integrate with electronic medical records.

Prior to administration of medication, the resident's identification is confirmed with a comparison picture. Mouth cavities are checked after the administration of the medication. Each cottage has a medication refrigerator, though infrequently used. The nurse supervisor or the RN audits and replenishes the cabinets weekly or as new medications are added. No-shows or refusals for medication are documented and referred to the physician. The nurse supervisor reviews the MAR's for missed dosages.

Residents are not allowed to keep medications on their person or allowed over the counter medications. Insulin shots are administered at the point of contact, in the housing unit. These are self-administered under strict supervision. There were no insulin dependent diabetics in the facility at the time of the audit.

At the time of the audit there were 50 residents on prescription medications. There were three residents on controlled medications.

Expired, unused, discontinued and recalled medications are disposed by returning to the pharmacy for credit or disposed through Stericycle. Residents are provided a 30-day supply of medication when released and the medical department schedules any follow up appointments required for the continued treatment of the youth.

There is a drug treatment program offered at the facility. Youths that require detoxification are transferred to an appropriate facility or medical center.

YRTC Medical does only blood draws on site. Once the specimens are drawn, they are spun and sent to a contracted lab. There is no set schedule for sending blood samples, this is done as needed. Results are received by fax within 24 to 48 hours. STAT labs are sent directly to the provider within two to four hours. The medical department runs blood labs two to four times a month plus on incoming residents. Radiology services are provided through a private contractor, which is Kearney Regional Hospital.

All YPS staff members are trained as first responders with CPR, first aid and AED training. There is a master SDS maintained in the medical area. The facility was using paper medical records at the time of the audit but was in the process of converting to electronic records. Medical grievances are handled by the grievance coordinator in conjunction with the nurse supervisor. All issues are handled within 1 to 2 days and there were no substantiated grievances during the audit period.

MRSA precautions are used throughout the facility. Universal precautions are also practiced throughout the facility. There are first aid kits, AED units, blood-borne pathogen kits and eyewash stations throughout the cottages and common areas. There were hand sanitizing bottles located strategically throughout the entire facility. The facility does TB testing on all incoming residents, as well as new employees. Monthly tests average seven to ten a month. All residents are given yearly TB tests.

Protocols for COVID-19 had been implemented throughout the facility. These include limiting public access, education for residents, emphasized hand sanitation, distancing, in-depth screening of all incoming residents and an isolation period for all new residents.

Medical diets are coordinated with the food service program as needed. Food service has predesignated diets for a number of different medical conditions that were developed by a registered dietician.

Critical incidents were reviewed with the nurse supervisor during the audit. There was a youth that was suicidal, twice constricted his neck by ligature and both times became unconscious.

The youth was able to be revived and transported to the hospital both times and both times required no further medical treatment. The youth has since been released from the facility.

A review of the medical service outcomes was conducted and there were three areas of concern. The first was a notable reduction of mental health interventions in the past 12 months for 2019/2020. The second a notable reduction of mental health treatment plans in the past 12 months for 2019/2020. The third was the number of suicide attempts in the year 2019 for the months of February March and April.

The reduction in the interventions and treatment plans for the past year is due to the reduced population of the facility. The population of the facility has been reduced by approximately one half. The suicide attempts for 2019 was attributed to the way the numbers were tabulated for those three months. The tabulations are now made using only overt attempts at suicide.

Dental

The dental unit is housed in the medical area. The suite contains a dental chair, bite wing x-ray machine, cabinets for storage and supplies, a counter area for paperwork and a closet for Instruments not being used for that day. The area was well organized and displayed a high level of sanitation.

Dental staff consists of one dentist, one dental assistant, and a dental hygienist two times a week. Dr. Jason Herman has been with the facility for nearly 20 years and displayed an obvious passion for patient care. Dr. Herman is in the suite one day a week and will normally see everyone who has made request plus any follow-up visits that have been scheduled.

The wait time to be seen is no longer than one week. The dentist is on call for urgent conditions and will come to the facility or have the patient sent to his private office, if needed. The dental clinic normally has 60 to 80 visits per month. Patients access dental care through the sick call process.

Care provided includes basic dentistry, prophylaxis, fillings, extractions, cleaning, cancer screening, patient education, root canals and "flippers." The root canals are done off site at Dr. Herman's office. A "flipper" is an interim, partial denture for missing teeth. Dr. Herman emphasized that it was important the patient have the denture for chewing, linguistics and boost self-esteem.

During the audit a review was conducted of credentialing, review of patient records, and a random inventory of sharps, instruments and drugs. License were found to be up-to-date. Patient records were complete and legible. The inventory of sharps, instruments and drugs were found to be complete, timely and well documented. The audit also reviewed spore testing and found it was completed weekly and all testing results were well documented.

Dosimeter readings are not required by the state of Nebraska. Universal precautions are routinely utilized. Dental supplies and equipment are provided by Schien Dental Supply. Broken tools are document and disposed through Stericycle. Stericycle also disposes of any biohazard waste.

Mental Health

Mental health is staffed with a Mental Health Supervisor, a Clinical Program Director, three Mental Health Practitioners I and six Mental Health Practitioners II. Mental health care is normally provided Monday through Friday 8:00 a.m. through 4:30 p.m. One mental health practitioner is on site early to see patients who are housed in the Dickson unit. Residents in the Dickson unit are also seen on weekends.

Patients can access mental health care by verbal request and can also be referred by staff and medical personnel. Residents are seen immediately during normal business hours and in off hours there is always a staff member on call. Approximately 60 youths are seen individually each month and approximately 32 youths are seen for programming. Every resident in the facility is it seen at least once a month.

Mental health care provided includes crisis intervention, individual counseling, group counseling, medication management and drug / alcohol abuse programming. The chemical dependency treatment program is provided for youth who are mild to moderate risk level. Youths that require a high level of dependency treatment are transferred to an appropriate facility. Any youth with a severe development issue or acute mental condition is transferred to the Richard H Young hospital.

Any suicidal indication is referred to mental health and are monitored constantly. All youth are always site and sound supervised. Acute level ideations are monitored one on one. Dickson cottage is used for suicide observation rooms, if needed. There are suicide garments available.

YRTC does not use restraints for health services or psychiatric purposes.

Recreation:

YRTC – Kearney has a full time Recreation Manager, two Recreation Assistants, and one Recreation Aide. All recreation staff are certified in CPR, Lifeguard, and pool operations. Recreation has its own budget to purchase equipment and supplies. All living units have a schedule seven days a week where the youth are offered recreation. The recreation program has a gym, weight room, indoor swimming pool, outdoor play pads, soccer field/football field, volleyball court, and a softball field. Indoor recreational activities include movie viewing, board games, and video games. Some of the weight equipment was donated by the University of Nebraska at Kearney. Staff can utilize the weight room after working hours.

Religious Programming:

Religious services/programs are supervised by the Religious Coordinator. The Religious Coordinator is available for counseling. Prior to the COVID-19 voluntary Protestant services were conducted each Sunday at 9:00 a.m. Religious services in the Chapel have been suspended temporarily due to practicing social distancing. All faith are provided religious services, even though the majority of the youth are Protestant. The Religious Coordinator approves religious diets. The Chapel is also used for facility training for staff.

Offender Work Programs:

Youth assigned to the facility are not assigned jobs. Youth are required to maintain cleanliness and sanitation in their living areas. There is a Work Project where a youth can any job outside of the dorm and earn up to $ 2.50 per hour. Youths can participate in on-campus work assignments such as landscaping and the kitchen.

:

Academic and Vocational Education:

The West Kearney High School (WKHS) offers Academic and Vocational programs located on the campus of YRTC – Kearney. WKHS is accredited by the Nebraska State Board of Education as an accredited Special Purpose School. It is also accredited as an optional school through the North Central Association Commission on Accreditation and School Improvement, as well as Advanced ED. The school is an institutional member of the Correctional Education Association.

WKHS is staffed with one acting principal, 16 teachers assigned during audit. There is a vacant principal and three vacant teachers. The school day runs from 8:30 a.m. until 3:45 p.m., with an hour lunch break. Students work from individualized education plans. The following subjects are offered: Math, English, Social Studies, Business Information, Family Life, Physical Education Science, Health, and Life Skills. Vocational programs offered include: Art, Advance Art, Ceramics, Building Trades, and Forklift Simulator License.

Students can earn credits that transfer to their home school district. Students are also afforded the opportunity to earn a GED or their high school diploma. During the audit cycle WKHS graduated approximately five to seven youths. There is a graduation after each semester that's held in the gym. The summer graduation was suspended, due to COVID-19 and social distancing practices. WKHS did have one youth to graduate during the session.

WKHS has purchased two modular buildings that are being converted into classrooms for the female students. During the audit only one classroom was being utilized. The high school was on summer break during the audit. The acting principal was available to be interviewed by the auditors.

During the audit the youth assigned to school rotated to school. The students come twice a week, due to reduce staffing.

Social Services:

YRTC – Kearney utilizes a Biopsychosocial model of treatment. Within this model the facility treatment team is composed of Youth Counselors and case managers, mental health practitioners, clinical program director, and a contract psychiatrist through Boys Town. The treatment team focuses overall health mental health, trauma history and past and present social environments that must be considered when attempting to understand and mitigate a youth's problematic behaviors.

The facility uses evidence-based Aggression Replacement Training (ART). The philosophy is to help youth handle aggressive tendencies and anger issues. The youth participate in group meetings.

Anger Management, Social Skills and Social Decision-Making meetings are held to help youth change their behaviors and way of thinking. Every youth receives a STEPS to Change Handbook to assist them.

Upon arrival at the facility, all youth are evaluated by mental health professionals for safety issues, trauma, and other mental health concerns. Every youth receives the following assessments: YLS/CMI, How I Think (HIT) Questionnaire, SASSI for substance abuse, Marijuana Use Inventory Callous/Unemotional Traits to assess callousness. If indicated, youth may receive additional assessments for intellectual functioning, a personality assessment inventory, and risk of sex offending.

The social services program is staffed by nine mental health professionals, one mental health supervisor, one clinical program director, and 13 case managers. A contract psychiatrist provides psychiatric evaluations and psychotropic medication management.

Visitation:

Visitation is conducted Sunday through Saturday from 8:00 a.m. until 3:30 p.m. In addition to the weekly visits, visitation is also allowed on major holidays. Youth also get extra visits during the holidays. During graduation ceremonies students can have family members attend graduations. Visitation is only allowed with immediate family to include parents, grandparents, guardian, foster family, mentor, and clergy. There two indoor areas and one outdoor area for visits. Visitation was temporarily suspended during the audit, due to COVID-19 guideline with social distancing.

Library Services:

The library is located in the WKHS, under the supervision of the Librarian. The library has 6,000 books, 25 magazines, and 3 newspapers. Most books are purchase and a few are donated. All donated books are reviewed by the librarian. Youth can check out up to four books at a time. Youth can also checkout videos to view in their living area.

Laundry:

The laundry is located in the basement of the Dining Hall. The laundry is supervised by one Laundry worker. The laundry contains five dryers and four washers. Laundry services are conducted daily. Uniforms are washed five days a week. Each living unit has a day when linen is washed. During the audit it was observed that the lent traps had excess lent buildup. The audit team recommended that the lent traps be cleaned more frequently. Procedures were immediately implemented for cleaning the lent traps more frequently.

F. Examination of Records

Following the facility tour, the team proceeded to the Conference room B to review the accreditation files and evaluate compliance levels of the policies and procedures. The facility has no notices of non-compliance with local, state, or federal laws or regulations.

1. Litigation

   Over the last three years, the facility had no consent decrees, class action lawsuits or adverse judgments.

2. Significant Incidents/Outcome Measures

   Upon reviewing the Significant Incident Report for the audit cycle the audit team observed that the escapes were down from the previous audit report, however the team was concerned with the number of escapes. The Facility Administrator explained that the escapes have dropped during the three year audit cycle. In 2017-2018 (14) escapes, 2018 - 2019 (9) escapes, and 2019 - 2020 (13) escapes. The facility did not have perimeter fencing around the campus. The Facility Administrator tightened security practices, added hourly counts, increase perimeter security, and strategic staff positioning. In January 2019 construction of a 12 foot chain link fence was placed around the perimeter of the facility.

   A curved no climb extension was added to the top of the fence for added security. Completion of the fence is scheduled for July 2020. The audit team felt the facility was taking proactive measures to increase security for the facility.

The medical auditor reviewed the Healthcare Outcome Measures with no issues or concerns.

3. Departmental Visits

Team members revisited the following departments to review conditions relating to departmental policy and operations:

Department Visited	Person(s) Contacted
Medical	Joni Suhr, Nurse Supervisor; Jason Herman, Dentist; Jackie Buetter, Dental Assistant; Tammy Sanders, LPN; Cali Nelson, RN
School	Scott English, Director of School; Lisa Irwin, Media Center Specialist
Religious Services	Daniel Cole, Religious Coordinator
Training	Dan Theobald, Training Coordinator
Food Service	James Orme, Food Service Director; Teresa Childers, Food Service Supervisor
Recreation	Tim Smallwood, Recreation Aide; David Scoonhoven, Recreation Specialist
Front Line	Sean McKinney, Youth Program Specialist II, 1st shift; Steven Marten, Youth Program Specialist II, 3rd shift; Jamar Love, Youth Security Supervisor, 3rd shift
Living Units	Levi Hadley, Unit Manager; Barboza Washington, Youth Program Specialist II; Jacob Vega, Youth Case Manager
Administration	Paul Gordon, Facility Administrator; Mark LaBouchardiere, Facilities Director; Cindy Krolikowski, Facility Program Manager; Nicole Berggren, Juvenile Justice Administrator; Ralph Healey, Compliance Specialist; Fred Boon, Compliance Specialist

4. Shifts

a. Day Shift

The team was present at the facility during the day shift from 9:30 a.m. to 5:15 p.m. and made most of the observations above regarding conditions of confinement, health services and program offerings.

The Audit Team was able to observe count procedures in the living units, movement of youth being escorted to the dining hall, school, medical, and recreation.

b. Evening Shift

The team was present at the facility during the evening shift from 2:00 p.m. to 6:00 p.m. Members of the audit team were able to observe the change of shifts and the transfer of vital information from the day shift. A member of the audit team walked the perimeter of the fence to observe the newly constructed perimeter fence.

c. Night Shift

The team was present at the facility during the night shift from 9:15 p.m. to 10:30 p.m. The Audit Team was able to interview security staff reporting for duty prior to their shift. The night shift generally has limited contact with the youth since the youth are in bed when they arrive and in bed when shift ends.

5. Status of Previously Non-compliant Standards/Plans of Action

The team reviewed the status of standards previously found non-compliant, for which a waiver was not granted, and found the following:

Standard # 4-JCF-2A-07

The Standard is now compliant as post orders are customized for each individual position on each shift and living unit.

Standard # 4-JCF-5G-03

The Standard is now compliant as to all living units have a schedule for daily recreation, with documentation to support.

Standard # 4-JCF-5G-06

The Standard is now compliant as to the facility created documentation for each individual youth describing community services and volunteer projects, they participated in during their stay at YRTC – Kearney.

Standard # 4-JCF-6B-14

The Standard is now compliant as to the Facility Administrator now approves permitted financial transactions between juveniles, juveniles and staff, or juveniles and volunteers.

Standard # 4-JCF-6C-10

The Standard is now compliant as to the facility does not exceed ten percent vacancy rate for any 18 month period.

G. Interviews

During the course of the audit, team members met with both staff and offenders to verify observations and/or to clarify questions concerning facility operations.

1. Offender Interviews

In the course of the audit the team interviewed approximately 46 youth. The youth appeared relaxed and open to discussing their conditions of confinement and sense of safety. No youth reported feeling unsafe and none reported substantial issues communicating with staff. The youth reported that their basic needs were met.

2. Staff Interviews

The Audit Team interviewed approximately 48 staff members from all departments. Staff appeared very satisfied with facility policies and practices and expressed confidence in the executive staff. The staff showed a dedicated committed ownership in the facility and were proud to be part of the organization.

Most interviewees were pleased the facility was headed in a more positive direction. There were consistent comments that moral is good, and staff work well together.

H. Exit Discussion

The exit interview was held at 12:00 p.m. in the Canteen with the Facility Administrator and 20 staff in attendance.

The following person was also in attendance:

John S. Lowe, Nebraska State Senator District 37

The chairperson explained the procedures that would follow the audit. The team discussed the compliance levels of the mandatory and non-mandatory standards and reviewed their individual findings with the group.

The chairperson expressed appreciation for the cooperation of everyone concerned and congratulated the facility team for the progress made and encouraged them to continue to strive toward even further professionalism within the correctional field.

July 8 – 10, 2020

Visiting Committee Findings

Non-Mandatory Standards

Non-Compliance

Standard #4-JCF-1C-04

UNLESS OTHERWISE SPECIFIED BY NATIONAL, STATE, OR LOCAL CODES, PLUMBING FIXTURES INCLUDING SHOWERS, SINKS, AND TOILETS ARE PROVIDED AS FOLLOWS:

- ALL HOUSING UNITS WITH FIVE OR MORE JUVENILES HAVE AT LEAST TWO TOILETS.
- AT LEAST ONE TOILET IS PROVIDED FOR EVERY 12 MALE JUVENILES (1:12). URINALS MAY BE SUBSTITUTED FOR UP TO ONE-HALF OF THE TOILETS IN MALE FACILITIES.
- AT LEAST ONE TOILET IS PROVIDED FOR EVERY EIGHT FEMALE JUVENILES (1:8).
- AT LEAST ONE SINK WITH HOT AND COLD RUNNING WATER PROVIDED FOR EVERY 12 JUVENILES (1:12).

JUVENILES HAVE ACCESS TO OPERABLE SHOWERS WITH TEMPERATURE CONTROLLED HOT AND COLD RUNNING WATER, AT A MINIMUM RATIO OF ONE SHOWER FOR EVERY EIGHT INMATES (1:8). WATER FOR SHOWERS IS THERMOSTATICALLY CONTROLLED TO TEMPERATURES RANGING FROM 100 DEGREES FAHRENHEIT TO 120 DEGREES FAHRENHEIT TO ENSURE THE SAFETY OF INMATES AND TO PROMOTE HYGIENIC PRACTICES.

FINDINGS:

At the time of the audit, Morton Housing Unit housed 16 female juveniles. Prior to August 2019, Morton Housing Unit housed 16 male juveniles. The unit is a 2-story building. The first floor is used for Program services. The second floor is where the juvenile sleeping rooms are located. Scheduling and Post Orders stipulate that juveniles are to go to their rooms/beds at 9:30pm. Juveniles are not allowed to return to the first floor. There is one restroom in the sleeping area. The restroom is equipped with one toilet and one sink.

The standard requires one toilet for every eight female juveniles and one sink for every 12 juveniles. The facility does not meet the toilet or sink ratio.

AGENCY RESPONSE:

Waiver Request

The particular issue as it applies to compliance with this standard is that the upstairs of the Morton Living Unit, in which the female youth are housed, does not have enough toilets available to accommodate female youth.

The YRTC-Kearney, since 1892, has only housed male youth. Since that time, any upgrades or modifications to buildings were made to accommodate a male youth population. The female youth who were formally housed at the Youth Rehabilitation and Treatment Center (YRTC) in Geneva, Nebraska, were temporarily re-located to the YRTC-Kearney. This move occurred due to damage sustained by the facility as girls were destroying property and low staffing contributed to an unsafe environment. This move took place on August 19, 2019 and was intended as a temporary move as repairs were made to the YRTC-Geneva facility.

Recently, Nebraska Department of Health and Human Services (DHHS), which oversees the YRTC system, has decided to make plans to re-locate the female youth to an already existing facility in Hastings, Nebraska. This move will occur in March of 2021. Nebraska DHHS will establish the YRTC-Hastings and this facility will be exclusively for female youth.

The YRTC-Kearney campus at that time will exclusively house male youth and will then be in compliance with this standard.

AUDITOR'S RESPONSE:

The audit team supports the facilities request for a waiver. The audit team observed that prior to the female juveniles arriving in August 19, 2019, the facility was in compliance with the standard, with the female juveniles being moved to another facility in March 2021, the audit felt that it would not be cost effective to make any renovations to comply with the standard. There were no complaints from the female juveniles assigned to the housing unit.

COMMISSION ON ACCREDITATION FOR CORRECTIONS

Nebraska Department of Health and Human Services
Youth Rehabilitation and Treatment Center – Kearney
Kearney, Nebraska

July 8 – 10, 2020

Visiting Committee Findings

Mandatory Standards

Not Applicable

Standard # 4-JCF-2A-18 Revised January 2011 (MANDATORY)

FOUR-/FIVE-POINT RESTRAINTS ARE USED ONLY IN EXTREME INSTANCES AND ONLY WHEN OTHER TYPES OF RESTRAINTS HAVE PROVEN INEFFECTIVE OR THE SAFETY OF THE JUVENILE IS IN JEOPARDY. ADVANCE APPROVAL IS SECURED FROM THE FACILITY ADMINISTRATOR/DESIGNEE BEFORE A JUVENILE IS PLACED IN A FOUR-/FIVE-POINT RESTRAINT. SUBSEQUENTLY, THE HEALTH AUTHORITY OR DESIGNEE MUST BE NOTIFIED TO ASSESS THE JUVENILE'S MEDICAL AND MENTAL HEALTH CONDITION, AND TO ADVISE WHETHER, ON THE BASIS OF SERIOUS DANGER TO SELF OR OTHERS, THE JUVENILE SHOULD BE IN A MEDICAL/MENTAL HEALTH UNIT FOR EMERGENCY INVOLUNTARY TREATMENT WITH SEDATION AND/OR OTHER MEDICAL MANAGEMENT, AS APPROPRIATE. IF THE JUVENILE IS NOT TRANSFERRED TO A MEDICAL/MENTAL HEALTH UNIT AND IS RESTRAINED IN A FOUR-/FIVE-POINT POSITION, THE FOLLOWING MINIMUM PROCEDURES ARE FOLLOWED:

- DIRECT VISUAL OBSERVATION BY STAFF IS CONTINUOUS PRIOR TO OBTAINING APPROVAL FROM THE HEALTH AUTHORITY OR DESIGNEE.
- SUBSEQUENT VISUAL OBSERVATION IS MADE AT LEAST 15 MINUTES.
- RESTRAINT PROCEDURES ARE IN ACCORDANCE WITH GUIDELINES APPROVED BY THE DESIGNATED HEALTH AUTHORITY.
- ALL DECISIONS AND ACTIONS ARE DOCUMENTED.

FINDINGS:

Youth Rehabilitation and Treatment Facility – Kearney does not allow the use of four/five Point restraints.

Standard # 4-JCF-2A-27 (Mandatory)

THE LEVEL OF AUTHORITY, ACCESS, AND CONDITIONS REQUIRED FOR THE AVAILABILITY, CONTROL, AND USE OF CHEMICAL AGENTS AND EQUIPMENT RELATED TO ITS USE MUST BE SPECIFIED. CHEMICAL AGENTS ARE USED ONLY WITH THE AUTHORIZATION OF THE FACILITY ADMINISTRATOR, MEDICAL DIRECTOR, OR DESIGNEE.

1. CHEMICAL AGENTS AND EQUIPMENT RELATED TO ITS USE ARE INVENTORIED AT LEAST MONTHLY TO DETERMINE THEIR CONDITION AND EXPIRATION DATES.
2. PERSONNEL USING CHEMICAL AGENTS TO CONTROL JUVENILES SUBMIT WRITTEN REPORTS TO THE FACILITY ADMINISTRATOR OR DESIGNEE NO LATER THAN THE CONCLUSION OF THE TOUR OF DUTY.
3. ALL PERSONS CONTAMINATED IN AN INCIDENT INVOLVING THE USE OF A CHEMICAL AGENT MUST RECEIVE AN IMMEDIATE MEDICAL EXAMINATION AND TREATMENT.

FINDINGS:

Youth Rehabilitation and Treatment Center – Kearney does not utilize any chemical Agents.

Standard # 4-JCF-4C-47 (MANDATORY)

GUIDELINES REGARDING THE USE OF RESTRAINTS ON JUVENILES FOR MEDICAL AND MENTAL HEALTH PURPOSES AT A MINIMUM SHALL INCLUDE:

1. CONDITIONS UNDER WHICH RESTRAINTS MAY BE APPLIED
2. TYPES OF RESTRAINTS TO BE APPLIED
3. IDENTIFICATION OF A QUALIFIED MEDICAL OR MENTAL HEALTH PROFESSIONAL AND HEALTH CARE PRACTITIONER WHO MAY AUTHORIZE THE USE OF RESTRAINTS AFTER REACHING THE CONCLUSION THAT LESS INTRUSIVE MEASURES ARE NOT SUCCESSFUL
4. MONITORING PROCEDURES
5. LENGTH OF TIME RESTRAINTS ARE TO BE APPLIED
6. LESS-RESTRICTIVE-TREATMENT-PLAN ALTERNATIVES ARE DEVELOPED AND IMPLEMENTED AS SOON AS POSSIBLE
7. AFTER-INCIDENT REVIEW

FINDINGS:

Youth Rehabilitation and Treatment Center – Kearney does not use restraints for medical or mental health purposes.

Visiting Committee Findings

Non-Mandatory Standards

Not Applicable

Standard # 4-JCF-1A-03

RENOVATION, ADDITION, NEW PLANT. THE JUVENILE CORRECTIONAL FACILITY OPERATES WITH LIVING UNITS OF NO MORE THAN 16 JUVENILES EACH. THE JUVENILE CORRECTIONAL FACILITY DOES NOT EXCEED A BED CAPACITY OF 150 JUVENILES.

FINDINGS:

YTRC – Kearney is not a new plant and has not undergone any renovation or addition during this audit period.

Standard # 4-JFC-1A-04

IF THE JUVENILE FACILITY IS ON THE GROUNDS OF ANY OTHER TYPE OF CORRECTIONAL FACILITY, IT IS A SEPARATED, SELF-CONTAINED UNIT.

FINDINGS:

YRTC – Kearney is not on the grounds of any other type of correctional facility.

Standard # 4-JCF-3E-01

THE FACILITY PROVIDES SERVICES AND OPPORTUNITIES THAT ENCOURAGE JUVENILES TO TAKE RESPONSIBILITY FOR THEIR ACTIONS AND MAKE RESTITUTION TO THE VICTIMS OF THEIR CRIME(S) AND/OR TO THE COMMUNITY, WHEN REQUIRED. OPPORTUNITIES ARE BASED ON COMMUNITY INPUT AND ARE FASHIONED IN A WAY THAT SEEKS TO AMELIORATE THE HARM DONE.

FINDINGS:

YRTC – Kearney has no court orders requiring restitution and does not have contact with victims so there is no restitution program.

Standard # 4-JCF-6A-03

IF SERVICES FOR ADULT AND JUVENILE OFFENDERS ARE PROVIDED BY THE SAME AGENCY, STATEMENTS OF PHILOSOPHY, POLICY, PROGRAM, AND PROCEDURE DISTINGUISH BETWEEN CRIMINAL CODES AND THE STATUTES THAT ESTABLISH, GIVE DIRECTION, AND GUIDE PROGRAMS FOR JUVENILES.

FINDINGS:

The Nebraska Department of Health and Human Services does not serve adult offenders.

Standard # 4-JCF-5I-04

WHERE STATUTES PERMIT, JUVENILES SHOULD BE AFFORDED OPPORTUNITIES FOR GRADUATED RELEASE AND PARTICIPATION IN EMPLOYMENT AND EDUCATION PROGRAMS.

FINDINGS:

YRTC – Kearney has no opportunities for graduated release or participation in Employment/education programs.

Standard # 4-JCF-6G-07

CONSISTENT WITH JURISDICTIONAL LAWS, REGISTERED CRIME VICTIM(S) ARE NOTIFIED OF A JUVENILE OFFENDER'S RELEASE PRIOR TO ANY PLANNED RELEASE FROM CONFINEMENT AND/OR ESCAPE FROM CUSTODY. FOLLOW-UP NOTIFICATION TO VICTIMS OCCURS WHEN ESCAPEES ARE RETURNED TO CUSTODY.

FINDINGS:

There is no statutory provision for victim notification for juvenile offenders.

Significant Incident Summary

This report is required for all **residential** accreditation programs.

This summary is required to be provided to the Chair of your visiting team upon their arrival for an accreditation audit and included in the facility's Annual Report. The information contained on this form will also be summarized in the narrative portion of the visiting committee report and will be incorporated into the final report. Please type the data. If you have questions on how to complete the form, please contact your Accreditation Specialist.

This report is for Adult Correctional Institutions, Adult Local Detention Facilities, Core Jail Facilities, Boot Camps, Therapeutic Communities, Juvenile Correctional Facilities, Juvenile Detention Facilities, Adult Community Residential Services, and Small Juvenile Detention Facilities.

C		Death in Custody		
		Outcome Measures		
	(1)	Number of juvenile deaths in custody in the past 12 months divided by the average daily population in the past 12 months.		0%
		Data Collection		
		Number of juvenile deaths that were medically expected in the past 12 months.	0	

		Number of juvenile deaths that were medically unexpected other than injury, suicide and /or homicide in the past 12 months.	0	
		Number of juvenile deaths due to injury in the past 12 months.	0	
		Number of juvenile deaths due to suicide in the past 12 months.	0	
		Sexual Assaults		
		Outcome Measures		
	(2)	Number of juvenile(s) alleged sexual assaults in the past 12 months divided by the average daily population in the past 12 months.		25%
		Data Collection		
		Number of juvenile(s) alleging sexual assault in the past 12 months.	22	
D		Health Care Staffing		
		Outcome Measures		
	(1)	Number of vacant positions for full-time equivalents for each health care staff category in the past 12 month period divided by the full-time equivalents of each health care staff category as determined by the designated health authority needed to provide adequate health care in the past 12 months.		0%
		Data Collection		
		Number of physician full-time equivalent position(s).	0	
		Number of physician vacancies in the past 12 months .	0	
		Number of full-time equivalent practitioner position(s).	0	
		Number of practitioner vacancies in the past 12 months.	0	
		Number of full-time equivalent dentist position(s).	0	
		Number of dentist vacancies in the past 12 months.	0	
		Number of full-time equivalent nursing (RN) positions(s).	3	
		Number of nursing (RN) vacancies in the past 12months.	1	

		Number of full-time equivalent nursing (LPN, LVN) position(s).	1	
		Number of nursing (LPN, LVN) vacancies in the past 12 months.	0	
		Number of full-time equivalents of each health care staff category as determined by the designated health authority needed to provide adequate health care in the past 12 months.	14	
		Qualified Staff		
		Outcome Measures		
	(2)	Number of staff with lapsed licensure and/or certification in the past 12 months divided by the number of licensed and/or certified staff in the past 12 months.		0%
	(3)	Number of specified health care positions with a written job description divided by the number of specified health care positions in the past 12 months.		100%
		Data Collection		
		Number of staff requiring a license and/or certification (include physician, psychiatrist, physician assistant, nurse practitioner, R.N., L.P.N., psychologist, et. al. therapists requiring licensure in the past 12 months.	13	
		Number of lapsed licensure and/or certification (include physician, psychiatrist, physician assistant, nurse practitioner, R.N., dentist, psychologist, et al. therapist requiring licensure) in the past 12 months.	0	
		Number of specified health care positions in the past 12 months.	14	
		Number of specified health care position with a written job description in the past month.	14	
		Fair Treatment of Staff		
		Outcome Measures		
	(4)	Number of health care staff grievances decided in favor of staff in the past 12 months divided by the total number of health care staff grievances filed in the past 12 months.		0%

	(5)	Number of health care staff terminations demotion hearings in which administrative decision was upheld in the past 12 months divided by the number of health care staff terminations or demotion hearings held in the past 12 months.		0%
		Data Collection		
		Number of health care staff grievances filed in the past 12 months.	0	
		Number of health care staff grievances decided in favor of the health care staff in the past 12 months.	0	
		Number of health care staff terminations and demotion hearings in which the program decision was upheld in the past 12 months.	0	
		Number of health care staff terminations or demotion hearings held in the past 12 months.	0	
		Employee Health		
		Outcome Measures		
	(6)	Number of new employees who were administered a tuberculin (TB) skin test in the past 12 months divided by the number of employees hired in the past 12 months.		100%
	(7)	Number of employees with a positive tuberculin skin test conversion in the past 12 months.		0%
		Data Collection		
		Number of new employees hired in the past 12 months.	71	
		Number of new employees who were administered a tuberculin (TB) skin test in the past 12 months.	71	
		Number of employees administered tuberculin (TB) skin test in the past 12 months.	7	
		Number of employees with a positive tuberculin (TB) skin test conversion in the past 12 months .	0	
E		Mental Health		
		Outcome Measures		

	(1)	Number of intake mental health screenings (intersystem or intrasystem) completed at admission in the past 12 months divided by the number of admissions in the past 12 months.		98%
	(2)	Number of juveniles receiving a mental health appraisal in the past 12 months divided by the number of admissions in the past 12 months.		98%
	(3)	Number of juveniles with a Mental Health Treatment Plan in the past 12 months divided by the number of youth requiring ongoing mental health intervention in the past 12 months.		100%
	(4)	Number of suicide attempts divided by the average daily population in the past 12 months.		0%
	(5)	Number of completed suicides divided by the average daily population in the past 12 months.		0%
		Data Collection		
		Number of juveniles receiving a mental health screening at admission (intrasystem and intersystem) in the past 12 months.	103	
		Number of juveniles receiving mental health appraisals within the past 12 months.	103	
		Number of intrasystem transfers within the past 12 months.	0	
		Number of intersystem transfers within the past 12 months.	0	
		Number of juveniles requiring ongoing mental health intervention in the past 12 months.	53	
		Number of juveniles with a mental health treatment plan in the past 12 months.	53	
		Number of suicide attempts in the past 12 months.	0	
		Number of completed suicides in the past 12 months.	0	
F		Substance Abuse		
		Outcome Measures		

	(1)	Number of juveniles receiving a substance abuse screening in the past 12 months divided by the number of admissions (intersystem or intrasystem) in the past 12 months.		95%
	(2)	Number of juveniles referred to a chemical dependency program divided by the number of youth identified as requiring a chemical dependency program in the past 12 months.		13%
	(3)	Number of juveniles completing an alcohol and drug abuse education program in the past 12 months divided by the number of admissions in past 12 months.		95%
		Data Collection		
		Number of intersystem transfers in the past 12 months.	0	
		Number of intrasystem transfers in the past 12 months.	0	
		Number of juveniles identified as requiring a chemical dependency program in the past 12 months.	82	
		Number of juvenile placed in a chemical dependency program in the past 12 months.	11

PHA-43 10/2018

After our Food Establishment Inspection Report on 03/12/2020, we were found to be deficient with regards to three logs:

1. Receiving Log
2. Thermometer Calibration Log
3. Damage/Discard Log

These logs were immediately created and put into use. They remain in active use.

3/12/2020

James Orme, Food Service Director — Date
