Any Fiscal Notes received from state agencies and political subdivisions are attached following the Legislative Fiscal Analyst Estimate.

This bill would provide for counting Nebraska residents in Nebraska prisons for redistricting purposes, and it has the emergency clause. It states that for purposes of drawing boundaries for legislative districts and congressional districts, an individual who was a resident of Nebraska prior to being confined to a prison in Nebraska shall be counted as a resident of the county, city, or village in which the individual was a resident prior to being confined.

The Department of Correctional Services (DCS) estimates a total one-time cost of \$80,843. DCS estimates that to comply with the provisions of this bill they will need a Program Analyst at a cost of \$60,843 to collect the information, and \$20,000 to make changes to the inmate database system.

As noted on the previous fiscal note, it is the understanding of LFO that the Census Bureau will include a separate data set in official figures that states will use for redistricting purposes that includes counts of prisoners in their physical location and counts allocating them to their home districts after the state provides a list of inmates and addresses.

If this information is not available from any source including the intake process, then there could be a cost to DCS to collect this information.

However, it does not appear that this bill would be effective for the 2020 redistricting process due to timing. By the time that this information would be available to be used in the 2020 redistricting process, the other redistricting bills would have already been enacted and the Special Session adjourned Sine Die.
