LB 84 would classify NAICS code 221113, Nuclear Power Electric Generation, as a renewable energy industry that would be eligible for tax incentives under the ImagiNE Nebraska Act. The state of Nebraska currently has one nuclear power plant in operation, with Cooper Nuclear Station in Brownsville, NE beginning its operations in 1974 and having an approved operating license through January 18, 2034. The Fort Calhoun facility in Blair, NE was in operation until sustaining flood damages and began the decommissioning process in 2016. As Nebraska is a public power state any new nuclear power projects would likely be undertaken by public power districts and therefore ineligible for tax credits.

Per the Energy Information Administration the fully realized investment cost of a new advanced nuclear power plant in Nebraska's energy region can be up to \$13,181,784,000. The under-construction reactor projects VOGTLE III and IV in Georgia are expected to support 800 permanent jobs and the loan for its construction amounts to \$12 billion. Per ImagiNE Nebraska, an investment of over two hundred fifty million dollars and two hundred fifty employees entitles a firm to a credit equal to 7% of the investment made in qualified property at the qualified location or locations, a wage credit for 9% for a firm with 200 employees at 200% the state average income, and a sales-tax refund exemption.

A project on the scale of a nuclear power plant would exceed the base authority of tax credits as outlined in Section 39 of the ImagiNE Nebraska Act. As cited, "The base authority shall be equal to twenty-five million dollars for calendar years 2021 and 2022, one hundred million dollars for calendar years 2023 and 2024, and one hundred fifty million dollars for calendar year 2025. Beginning with calendar year 2026 and every three years thereafter, the director shall adjust the base authority to an amount equal to three percent of the actual General Fund net receipts for the most recent fiscal year for which such information is available." ImagiNE Nebraska states that, "The director shall not approve any additional applications under the ImagiNE Nebraska Act that would include refunds or credits in the calendar year in which base authority is projected to be exceeded." Given the scale of nuclear power plant projects, any advanced nuclear power plant project would exceed the base authority and would be deemed ineligible for credit by the Director of Economic Development.

We have no reason to dispute the Department of Revenue's projections for FY28-32.

Concerning small modular nuclear reactors, the United States Department of Energy estimates that firms have a target implementation date by the late 2020s into the early 2030s. As such cost estimates and time estimates are difficult to estimate with this legislation. We are confident that there would be no fiscal impact this biennium but there may be significant fiscal impact resulting from small modular reactors achieving viability in the future.

Should any projects come to fruition as a result of this legislation there would be an increased administrative burden placed on the Legislative Auditor resulting from additional performance audits. Those costs would not be incurred in this biennium.

No fiscal impact for this biennium.

ADMINISTRATIVE SERVICES STATE BUDGET DIVISION: REVIEW OF AGENCY & POLT. SUB. RESPONSE		
LB: 84	AM:	AGENCY/POLT. SUB: Department of Revenue
REVIEWED BY: Neil Sullivan	DATE: 2/23/2021	PHONE: (402) 471-4179
COMMENTS: No basis to disagree with the Department of Revenue assessment of fiscal impact from LB 84.		

ADMINISTRATIVE SERVICES STATE BUDGET DIVISION: REVIEW OF AGENCY & POLT. SUB. RESPONSE		
LB: 84	AM:	AGENCY/POLT. SUB: Department of Economic Development
REVIEWED BY: Neil Sullivan	DATE: 1/19/2021	PHONE: (402) 471-4179
COMMENTS: The Department of Economic Development assessment of no fiscal impact from LB 84 appears reasonable.		

ADMINISTRATIVE SERVICES STATE BUDGET DIVISION: REVIEW OF AGENCY & POLT. SUB. RESPONSE		
LB: 84	AM:	AGENCY/POLT. SUB: Department of Environment and Energy
REVIEWED BY: Neil Sullivan	DATE: 1/15/2021	PHONE: (402) 471-4179
COMMENTS: Concur with the Department of Environment and Energy assessment of no fiscal impact from LB 84.

TOTAL FUNDS	=====	=====	=====	=====

**Explanation of Estimate:**

LB 84 would add nuclear energy to the list of business activities at a qualified location for purposes of the ImagiNE Nebraska Act. Specifically, the bill would add nuclear to the list of sources of renewable energy used to produce electricity in section 77-6818(1)(p), and includes this addition for conducting performance audits of tax incentives in section 50-1209(4)(g).

LB 84 will have no fiscal impact. Any expansion of qualified business activities under the ImagiNE act remains subject to limitations on the use of credits.
