This bill changes the geographic areas that apply to a grant program administered by the Nebraska Indian Commission and also expands the allowable activities the grant may apply to. The grant program is for certain types of political subdivisions associated with an Indian reservation with fewer than 6,400 inhabitants for economic, health care and law enforcement activities. The bill adds education to the allowable activities. The bill changes the geographic areas covered by the grants to political subdivisions located within 60 miles of a reservation. The bill also repeals a requirement for a public hearing.

No additional funding is sought. The current funding has not been fully expended because of the geographic restrictions. This will enable the agency to expend the remaining appropriated funds. There is no fiscal impact.
