Explanation of Estimate:

LB 739 would change the requirement for screening coverage for colorectal cancer for a non-symptomatic person from fifty years of age to forty-five years of age.

Currently, the State of Nebraska health plans cover these types of colorectal screenings within these requirements. There will be no changes needed in the coverages of our plans to include this requirement.

LB 739, as introduced, has no fiscal impact to the State of Nebraska health plans.

FISCAL NOTE

CASH FUNDS	_____	_____	_____	_____
FEDERAL FUNDS	_____	_____	_____	_____
OTHER FUNDS	_____	_____	_____	_____
TOTAL FUNDS	=====	=====	=====	=====

Explanation of Estimate:

LB 739 requires that most state-regulated health policies shall include screening coverage for a colorectal cancer examination and laboratory tests for cancer of any non-symptomatic person forty-five years of age or older covered under such policy, certificate, contract or plan. The previous legislation set the age of the covered person at fifty, so the proposed legislation lowers the minimum age by five years.

The Department notes that preventive services are provided at no cost-sharing under federal law, and the federal standard for colorectal screening was lowered from 50 to 45 in 2021 based on the recommendation of the U.S. Preventive Services Task Force.

The Department anticipates no fiscal impact as a result of LB 739. No increased duties are expected of the Department, however, should there be any increased enforcement requirements as a result of LB 739, such duties will be absorbed by existing resources.

Explanation of Estimate:

LB 739 requires screening coverage for a colorectal cancer examination and laboratory tests for cancer for any nonsymptomatic person forty-five years of age or older.

The University of Nebraska System health insurance plans were updated on January 1, 2022 to include the coverages required by LB 739, therefore there would be no fiscal impact.
