LB 179 would make a technical revision in the administration of the Resources Development Fund in the Department of Natural Resources. The director of the Department of Natural Resources is currently directed on July 1 of each year to adjust project costs and payment limitations based upon the average increase in the construction cost index for the prior three years. LB 179 would specify that the adjustment is made on July 1 of each year after 1993. This is a technical revision that is consistent with existing Department practices and has no fiscal impact.
