LB 696 would provide that solid waste transported from transfer stations to an out of state disposal facility would be subject to the solid waste disposal fee authorized under section 13-2042. As noted by the Department of Environmental Quality (DEQ), agency staff may have to devote time to identify and contact unpermitted transfer stations. It is anticipated that DEQ would be able to carry out provisions of the act using existing staff. There is the potential of additional cash fund revenue as a result of waste transported out of state being subject to the Nebraska disposal fee. The amount of additional revenue that may be realized as a result of LB 696 can not be estimated at this time.
