

The Occupational regulations overseen by our board have been effective in properly qualifying applicants to take an exam and to make sure we are consistent in qualifying electricians to take an exam, this is to make sure they meet the minimum qualifications to do electrical installs in whichever caliber of a license they choose to apply for. This is consistent with the other 13 States that are part of our Reciprocal Agreement called National Electrical Reciprocal Alliance which brings approximately 1,600 additional licensed electricians to Nebraska to meet the demands of the work load in our State.
